OVER SIX DECADES OF TRUST, INNOVATION AND EXCELLENCE

Known to the industry and consumers for its undisputed legacy, characterized by excellent service and an extensive range of products, Orient Electric is a force to reckon with in the Indian consumer electricals segment. Orient came into existence in the 1950s with a simple thought of making efficient, aesthetic and durable electric fans. Since then, it has grown embracing new frontiers in technology and innovation. It has become one of the leading electrical brands in India with a significant global presence and a diverse portfolio which includes fans, lighting, home appliances and switchgear. Across its entire product portfolio, the company is working to bring innovative products which are healthier, safer, energy-efficient, and add convenience to life.

Orient Electric ventured into switchgear business in 2015 and has continually leveraged technology and quality excellence to gather speed. As of today, it offers a wide range of 'safe, reliable and energy-efficient' switchgear products and modular switches that have been designed and developed keeping in mind the electrical safety requirements in the Indian context.

Inch closer to all-round protection as you turn the pages ahead.

Two great things exist in isolation and are a source of joy for some.

But when they come together, they enchant the whole world. An assurance of safety let us sleep peacefully. Being around beauty makes us smile invariably.

When safety meets beauty, it creates magic. Carrying forward this legacy, Orient Electric range of modular switches are created as a confluence of safety and design. Therefore, they're named after Salus- the Roman goddess of safety. For just like her, they represent well-being, safety and grandeur.

Safety

A confluence of technology and trust

Orient switches use 3AB technology that offer 3 layers of protection. It is technology that you can trust to keep your loved ones safe.

Extra RIB to contain the spark inside the switch cavity.

Added lid cover over the cavity to further shield the spark. Made of special material: fire-retardant and arc quenching.

Shock-resistant switch cap to reinforce the safety.

A confluence of inspiration and aesthetics

The curvy edges, stylish round corners and sleek design of Orient Electric's modular switch plates give it a unique look. This remarkable design along with the superior glossy mirror-finish is bound to make first impressions that last for a long time.
