Sleep, home respiratory, and respiratory drug delivery

**PHILIPS**

**RESPIRONICS**

sense and simplicity

## Content

- 3 **Sleep therapy**  
*CPAP therapy, bi-level therapy, data management, humidification*
- 21 **Home ventilation**  
*Noninvasive ventilation systems, invasive ventilation systems, software*
- 27 **Airway clearance**
- 31 **Patient interface**  
*Minimal-contact masks, nasal masks, full-face masks, programs*
- 49 **Oxygen**  
*Concentrators, portable concentrators, home oxygen filling system, liquid portable oxygen, oximeters*
- 63 **Sleep diagnostics**  
*In-lab PSG systems, portable diagnostics, screening devices, actigraphy, sensors, titration systems*
- 77 **Respiratory drug delivery**  
*Peak flow meters, mouthpieces, chambers, masks, spacers, kits, compressor nebulizers, ventilation accessories, inspiratory muscle trainers*
- 91 **Light therapy**
- 95 **Accessories**  
*Airway clearance, diagnostics, home ventilation, oxygen, patient interface, respiratory drug delivery, sleep therapy*
- 125 **Warranties and manuals**
- 129 **Literature**  
*Literature, media, posters*
- 135 **Medical education**
- 141 **Programs**

# Terms and conditions

The following policies apply to products included in this reference guide:

- Policy for the Advertisement of Philips Respironics products by U.S. Homecare Dealers (Advertisement Policy)
- U.S. Homecare Dealer Minimum Advertised Price (MAP) Policy for Specified Sleep and Home Respiratory Therapy Products (MAP Policy)
- U.S. Sales Only Policy for U.S. Homecare Dealers
- End-User Only Sales Policy for U.S. homecare dealers

## Credit policy

Net 30-day terms are available to qualified accounts. All accounts with invoices exceeding these terms will be contacted by our collections department.

A 1.5% monthly finance charge will be assessed on all past due invoices.

## Freight and shipping terms

F.O.B. Shipping Point; accordingly, title and risk of loss pass at shipping point.

All freight charges will be prepaid and added to the invoice.

## Returned goods

Philips Respironics strives to ship quality products strictly in accordance with your order. However, we expect that occasionally, you will need to return a product to Philips Respironics, Inc. In order to allow us to process product returns quickly and efficiently (and issue credit as appropriate); please follow these guidelines when returning a product.

- Obtain a Returned Goods Authorization (RA) number from our Customer Service Department by calling 800-345-6443 or 724-387-4000 before returning any product. Please be ready to provide the Philips Respironics invoice number, the Philips Respironics order number, or your purchase order number when requesting an RA. Credit memos cannot be processed in a timely manner if this information is not provided.
- Please mark the RA number clearly on the outside of the boxes you return. Unauthorized returns may be refused and returned at the customer's expense. All returns should be shipped prepaid. The issuance of credit for returned product is subject to inspection and approval of the product by Philips Respironics personnel.

- In order to cover our cost associated with processing returns, a 20% restocking fee may be imposed. This fee will be waived for returns resulting from a Philips Respironics shipping or order entry error if the error is identified within 10 days of receipt or for the return of a defective product.
- The above process differs for patient interface products. Please contact Customer Service for further information.

## Quantity and/or price discrepancies

All quantity and/or pricing discrepancies must be communicated to Philips Respironics within 15 days of the invoice date.

## Non-returnable merchandise

Philips Respironics cannot accept returns of the following products:

- Custom-ordered product (not listed on our published price list).
- Products invoiced more than six months from the date of request for return.
- Discontinued product (not listed on currently published price list or formally discontinued).
- Product not in its original, unopened package.

## Territories

Dealers located in the United States are not permitted to resell, rent, or in any other way distribute Philips Respironics products outside the United States.

This export restriction is in place because of existing international distribution arrangements.

## Additional bi-level noninvasive ventilation (NIV) conditions

Philips Respironics requires the dealer to have appropriate medical personnel on staff to support patient training and follow-up in connection with bi-level NIV devices. Such personnel include, but are not limited to, credentialed respiratory therapists, credentialed nursing personnel or physician assistants.

# Sleep therapy

# One intelligent package

Philips Respironics System One brings key intelligent technologies together in one device.

Respironics has consistently offered smarter tools that help sleep professionals provide better care and achieve better results. Now, based on customer input, we're delivering an even higher level of sophistication in a series of intelligent therapy devices that think and act the way you've told us they should.

As the cornerstone of our commitment to help you break through emerging clinical and industry barriers, this new system was designed to deliver more than therapy; it's been created to intelligently deliver precisely what you need to manage your patients – and your practice – in today's homecare environment. Philips Respironics System One puts all-new levels of control, compliance, and efficiency right at your fingertips.

## Five components of intelligent therapy

**System One Humidity Control and Dry Box technology**  
Better humidification management to prevent rainout and water damage.

Even in changing environmental conditions, consistent humidification levels are preserved throughout each night thanks to our advanced Humidity Control technology. By analyzing ambient temperature, relative humidity, and patient flow, the device delivers optimum humidity – and ultimate comfort – to the patient while also dramatically reducing rainout. Our new Dry Box technology assures the humidifier's water source is isolated from the inner workings of the device during any normal and most uncommon conditions.

### System One Resistance Control

Optimized pressure delivery, no matter which mask is used.

System One Resistance Control achieves complete system comfort by enabling the device and mask to work optimally together. Through simple settings, the technology instructs the device to compensate for variable resistance characteristics related to different masks. The result is synchronous pressure delivery and the assurance patients can enjoy the full benefits of our Flex comfort technologies no matter which mask is used.

### Advanced event detection

Identification of complicated and changing conditions that may indicate alternative therapy.

We've built in more device intelligence so that you can make the most informed decisions possible. Our new sleep system addresses advanced sleep assessment parameters, including AHI, leak, flow limitation, and RERAs to provide optimum therapy for obstructive sleep apnea (OSA). With our new system, events can now be verified by looking at detailed patient flow waveform data captured by the device. But the real advancement is its ability to point out when the patient is experiencing symptoms beyond classic OSA.

With intelligent technology that can identify conditions such as clear airway apneas and periodic breathing, the system immediately indicates the potential need for specialized therapy. That means the care team will have the ability early on to identify different treatment that may be needed.

### Flex Family technologies

Improved patient comfort with proven pressure relief.

Our natural and clinically-proven technologies that enhance traditional pressure therapy – C-Flex, Bi-Flex, A-Flex, and now C-Flex+ in our fixed-CPAP mode advanced units – are an excellent way to establish improved patient comfort, and increased compliance. Thanks to our advanced Digital Auto-Trak algorithm that detects the onset of inspiration and exhalation, our flex technologies deliver just the right pressure relief for every breath, making it easier for patients to adapt to therapy. Each Philips Respironics System One device with a Flex option also has an on-board Flex Demo mode to allow patients to feel the difference for themselves. It's as easy as pressing a button.

### Encore data management and reporting

Intelligent patient management for improved compliance.

The best intelligence is only valuable if it's easily accessible. That's why we've made sure vital patient information is available through multiple options of data transfer and reporting including memory cards and modems.\* Our new devices now include on-board data memory. Putting more patient intelligence in your hands is a key component of effective patient therapy and compliance management.

\*Not available in all countries.

### SleepEasy with C-Flex

Designed to give your patients an affordable therapy option while allowing you to reap efficiency gains by proving compliance without the time and effort associated with collecting data cards or downloading devices. The SleepEasy with C-Flex system is extremely simple to set up and use. The basic functionality and straightforward user interface make it quick and easy for the DME to set up and simple for patients to use. That makes the perfect platform for the enhanced SleepEasy with C-Flex system.

# CPAP therapy

## SleepEasy

Like all aspects of healthcare, the sleep therapy business is changing rapidly. But one thing hasn't changed: You need solutions that improve the health of your patients – and the health of your business. The SleepEasy sleep therapy system was designed to help you achieve both. It's a simple, reliable, value-priced CPAP that you can trust – and that patients will use.

Part number		HCPCS
1043237	SleepEasy <i>Includes integrated heated humidifier.</i>	E0601, E0562

## BiPAP autoSV Advanced with Encore SmartCard

BiPAP autoSV Advanced blends proven technologies to make treatment and management of complicated sleep apnea cases easier and more effective. The first thing you'll notice is how auto EPAP plus an advanced back-up rate make titration simpler. Then how our sophisticated servo-ventilation algorithm continually monitors and adjusts to changing patient therapy needs. To round it out, our renowned Bi-Flex technology helps to assure patient comfort and helps to promote long-term compliance. It all adds up to advanced thinking that helps you make the complex quite a bit simpler.

Data management software and accessories

# Data management

## EncoreAnywhere

Incorporating the best features of our Encore data management system – including the Encore SmartCard, data downloading, compliance reporting, and prescription management – EncoreAnywhere adds even more features and efficiencies. Through its web-based portal, clinicians, physicians, sleep testing personnel, and other care providers can access patient information anytime, anywhere. And, of course, the EncoreAnywhere system is highly secure to help you meet your requirements for HIPAA compliance.

## EncorePro2

With increased intelligence yet less complexity, EncorePro2 enhances your ability to manage patients and your business.

Popular features such as the Encore data card, data downloading capability, compliance reporting, and prescription management continue to be in demand and make an encore appearance in this new generation more intuitive and more secure functionality. It's the best of the old along with the very best of the new.

# Humidification

**1056209**

## **System One Humidity Control**

**See page 122**

The System One heated humidifier integrates with all Philips Respironics System One devices. Even in changing environmental conditions, consistent humidification levels are preserved throughout each night thanks to our advanced Humidity Control technology. By analyzing ambient temperature, relative humidity, and patient flow, the device delivers optimum humidity – and ultimate comfort – to the patient while also dramatically reducing rainout.

**1063785**

## **System One water chamber**

**See page 122**

The water chamber is compatible with the System One heated humidifier (part number 1056209).

# Humidification

## 1049109

### M Series heated humidifier

See page 122

The M Series heated humidifier integrates with all M Series devices. It features an easy-turn dial and doesn't need to be reset during the night if therapy is temporarily suspended. The hidden water chamber is easier to use, easier to fill, and delivers continuous humidification throughout the night.

## 1051081

### M Series pass-over humidifier

See page 121

Designed to be a visual and functional complement to the REMstar M Series, the M Series pass-over humidifier integrates with all REMstar M Series models and provides continuous cool pass-over humidification throughout the night. The M Series pass-over humidifier shares the same redesigned "hidden" water chamber as the M Series heated humidifier, which is easier to remove, fill, clean, and insert.

## 1003757 and 1003758

### M Series water chambers

See page 122

The side-by-side water chamber (part number 1003757) is compatible with obsolete A/C humidifiers (part numbers 1037652 and 1029090).

The J-tube water chamber (part number 1003758) is compatible with part numbers 1049109 and 1051081.

## 1003756

### M Series universal chamber kit

See page 122

The universal kit provides one chamber bottom with both a J-tube and side-by-side chamber top.

**If it's a breakthrough in sleep therapy...  
it's likely our innovation.**

Our commitment to sleep therapy started in 1985 with the first commercial CPAP machine and grew from there. Through the years, advancement after advancement followed including: BiPAP bi-level systems, Flex pressure relief, and Encore with SmartCard data monitoring technologies. After 25 years of innovation, we are still making history in sleep therapy. Our latest breakthrough, Philips RespiRONICS System One, continues that tradition. By offering you and your patients the most intelligent, advanced technology available, we're once again delivering on our promise to develop innovations that help improve the lives of patients with sleep apnea. # Noninvasive ventilation systems

## BiPAP AVAPS, C Series

BiPAP AVAPS noninvasive ventilator has been developed to help clinicians provide better, more efficient care for patients including children as young as seven years of age and who weigh more than 40 pounds.

Improved patient care, automatic adjustments to meet changing patient needs, plus simplified patient management. And it all comes together in a light, quiet, and easy-to-use device that clinicians and patients are sure to appreciate.

## BiPAP S/T, C Series

Philips Respironics, a pioneer in noninvasive ventilation (NIV) and a global leader in the respiratory medical device market, introduces the next generation BiPAP S/T ventilatory support system. By combining Respironics' proven bi-level technology with a new, improved platform, the NIV system rated "Best Brand"\* by homecare providers just got better for you and your patients.

\*Source: 2008 Homecare Provider Survey by Echo Strategies. Survey funded by and on file with Philips Respironics.

# Invasive ventilation

## Trilogy100 ventilator

The originator of bi-level technology has developed Trilogy100, a remarkably versatile ventilator that meets the needs of adult and pediatric patients alike. Leveraging well-known Respironics technology, Trilogy100 provides clinicians with an array of treatment options by delivering Volume Control Ventilation or Pressure Control Ventilation through either noninvasive or invasive methods with advanced leakage compensation. This built-in flexibility makes Trilogy100 ideal in treating a wide range of respiratory conditions or those respiratory conditions that require frequent changes to the patient's prescription.

# Software

## DirectView ventilation management software

Now, physicians can more efficiently manage ventilation therapy with unprecedented access to information. DirectView streamlines reporting to help clinicians identify adjustments necessary to maintain effective treatment and improve patient care.

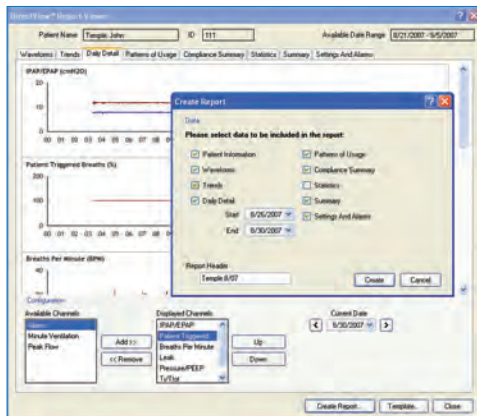

DirectView enhances your clinical evaluation with quick access to full patient therapy information including waveforms, trends, usage patterns, and summary also allows prescription management through the use of an SD memory card.

### Part number

1005297	DirectView software package <i>Includes DirectView CD, SD card, and SD card mailer.</i>
1055635	DirectView software (online download only)

### Accessories

# Airway clearance

Part number		HCPCS
CA-3000	CoughAssist MI-E, automatic	E0482
CM-3000	CoughAssist MI-E, manual	E0482

## CoughAssist

Is a noninvasive therapy that safely and consistently removes secretions in patients with an ineffective ability to cough.

CoughAssist clears secretions by gradually applying a positive pressure to the airway, then rapidly shifting to negative pressure. The rapid shift in pressure produces a high expiratory flow, simulating a natural cough.

## Respironics Simplicity nasal mask

Is a small, lightweight nasal mask worn just on the tip of the nose. By having no contact with the bridge of the nose, it helps avoid common pressure points. As a result, both men and women wearers can enjoy a positive seal without irritation. Patients also will enjoy an unobstructed view – in fact, they can even wear their eyeglasses.

# Minimal-contact interfaces

## ComfortLite 2 nasal mask

Inspired by the men and women who have difficulty getting used to conventional nasal masks – or prefer something nontraditional. With this unique design, we offer the choice of three different cushion types – a pillows cushion, the Simple Cushion, and Direct Seal cushion – for a more personal, more comfortable fit. And, because we use the “halo” headgear and forehead mechanism for stability and adjustment, the mask barely touches the face. This allows the cushion to provide a reliable seal with no pressure points.

## ComfortGel nasal mask

Establishing a good seal and comfortable fit is a critical part of successful long-term therapy. The ComfortGel provides both for men and women wearers. We've paired our proprietary blue gel with a proven dual-layer cushion design for an unparalleled seal. The adjustable StabilitySelector simplifies fitting and optimizes seal, while the premium headgear with convenient ball-and-socket headgear attachments makes it easy to remove the mask.

## EasyLife nasal mask

With its patented Auto Seal technology, the EasyLife nasal mask nearly eliminates the need for manual mask adjustments. Its innovative, lightweight design features a unique dual-cushion construction - the inner cushion creates an instant, self-adjusting seal, while the outer cushion provides comfortable support. The only manual steps necessary are intuitive headgear adjustments, making fitting as easy as possible.

## ComfortFusion nasal mask

Your patients will love the superior seal of the pairing of the soft, replaceable cushion and the StabilitySelector, enhanced by a premium soft forehead pad and our Fusion headgear. You'll enjoy the convenience of two cushion sizes in our FitPack that will fit nearly all of your patients. The DuoPack kit includes a mask, plus an additional cushion of the same size – helping to further reduce your inventory and optimize your mask replacement program.

## ComfortSelect nasal mask

An ideal mask for a wide range of patients, ComfortSelect's textured, dual-layer cushion design and adjustable forehead arm help deliver a comfortable fit and guard against mask leaks. The adjustable StabilitySelector and soft silicone forehead pad help patients find the right fit to reduce pressure points and mask leaks – without over-tightening the headgear. The ball and socket headgear attachments make it easier to keep that perfect fit – they allow you to remove the mask from the headgear without loosening the headgear straps. The built-in “silent” exhalation port disperses the air for quiet operation.

## ComfortClassic nasal mask

ComfortClassic features a dual-layer silicone cushion with an outer membrane that fills with air to create a comfortable seal. The thicker inner section provides stability. A dual-position gel spacer molds to the patient's forehead for even greater comfort and stability, and a "silent" exhalation port gives you a mask that may help to improve patient compliance.

## Respironics Profile Lite Nasal Gel Mask and Respironics Profile Lite Youth Mask

The soft, light cushion is extremely comfortable right out of the box. The gel cushion and forehead pad gently rest against the patient's face for a soft, pillowy fit. The Profile Lite is fully customizable. For a more personalized seal, a 10-minute customization process molds the mask to the individual's facial contours.

All units include an exhalation port and appropriately sized gel spacer.

# Full-face interfaces

## ComfortGel Full full-face mask

Combines an all-new design with some very familiar – and popular – components. Our comfortable forehead cushion and enhanced StabilitySelector combined with our popular blue gel replaceable cushion to create a level of comfort and stability no other full-face mask can approach. The unique sure seal technology (SST) provides a membrane-thin layer over the gel cushion to follow the contours of the face better, allowing wearers to quickly achieve the comfortable seal they need.

## FullLife full-face mask

We took a minimalist approach in developing FullLife. We made it smaller and lighter, yet ensured that it is durable. The conventional forehead pad was eliminated to provide a clear line of sight in the process. We reduced leaks with a dual-textured, grooved cushion that creates a robust seal even with patient movement. Our straightforward, step-by-step numbered headgear system reduces application and removal effort while improving fit. With less noise, FullLife is more comfortable to live with. And with just one faceplate to fit all sizes – plus our FitPack and DuoPack options – FullLife is more comfortable for you as well.

# Full-face interfaces

## ComfortFull 2 full-face mask

This mask provides comfort and seal for many patients whose therapy is compromised by mouth breathing. That performance is achieved by its dual-flap cushion, the unique seal-assuring StabilitySelector, a safety entrainment valve built into the swiveling elbow, and our fully adjustable premium headgear. With an extensive range of features, ComfortFull 2 helps to improve patient compliance and enables you to fit more patients with fewer sizes and less inventory.

## FitLife total full-face mask

A solution for patients who have difficulty wearing conventional masks or who simply prefer a clear line of sight. FitLife addresses a number of patient issues. Facial hair, dentures, nasal bridge breakdown, facial irregularities, and claustrophobia are issues that can greatly impact the ability to establish effective therapy and comfort. FitLife quickly establishes a robust seal around the less pressure-sensitive perimeter of the face, while maintaining an unrestricted view.

# Full-face interfaces

## Respironics Total face mask

A comfortable alternative for patients who may not be able to obtain a good seal with a nasal mask, experience skin breakdown, or who are claustrophobic, the Total face mask covers the entire face, and has no pressure points. An effective seal is created around the outside of the face minimizing leaks, while providing optimal airflow through the nasal passages.

## Supply replacement products and tools

Our FitPacks have multiple sizes in one package to support one “grab and go” package for initial fittings or to convert patients from other masks. The FitPack may allow the flexibility to cover at least 85% of fittings with a single mask purchase, reducing inventory.

Our DuoPacks come with a complete mask plus a same-size replacement cushion to support your supply replacement efforts. As some payers reimburse for two cushions per month, the DuoPack gives you the initial cushion on the mask and the first replacement.

The collaterals may help you remind patients to contact you if they need replacement masks or other replacement accessories.

# Concentrators

## EverFlo concentrator

Delivers a great performance and demands so little in return. It's small, quiet, and designed to be easier and less expensive to operate. Plus, EverFlo reduces scheduled maintenance visits. So now you can control oxygen therapy costs and deliver all the features you and your patients want with one 31-pound concentrator that's bound to be the star of your business.

Part number		HCPCS
1020000	EverFlo oxygen concentrator	E1390
1020001	EverFlo oxygen concentrator with oxygen percentage indicator (OPI)	E1390
1039362	EverFlo oxygen concentrator, transfill	
1039363	EverFlo oxygen concentrator with OPI, transfill	
1057012	EverFlo oxygen concentrator with EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057013	EverFlo oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057974	EverFlo oxygen concentrator with EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392
1057976	EverFlo oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392

*Units include a patient manual.*

## Accessories

### Filters

1038831	Compressor intake filter
520	Micro disk filter

### Tubing

1039642	Humidifier connector tube
---------	---------------------------

### Miscellaneous

H537-1	Stand-alone pediatric flow meter
H644	Integrated pediatric flow meter
528	Flow meter locking kit
H649	Caster brake kit
1038571	Warranty, 2-year with compressor

Part number		HCPCS
1020015	EverFlo Q oxygen concentrator	E1390
1020014	EverFlo Q oxygen concentrator with OPI	E1390
1039365	EverFlo Q oxygen concentrator, transfill	
1039364	EverFlo Q oxygen concentrator with OPI, transfill	
1057014	EverFlo Q oxygen concentrator with EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057016	EverFlo Q oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057987	EverFlo Q oxygen concentrator with EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392
1057988	EverFlo Q oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392

Units include a patient manual.

## EverFlo Q ultra quiet 40 decibel stationary oxygen concentrator

Our compact, 31-pound EverFlo Q is the first ultra-quiet concentrator available at an affordable price. The new EverFlo Q combines the small size, light weight, and low maintenance of our popular EverFlo oxygen concentrator, with the added value of an ultra-quiet sound level. With EverFlo Q, you get the benefits of an ultra-quiet concentrator without the burden of paying an ultra-large premium. And, that's good for you and your patients.

# Concentrators

## Millennium M10 concentrator

Delivers up to 10 LPM of oxygen reducing the delivery costs associated with 5 LPM and above oxygen patients. The M10 is engineered to reduce the cost of providing oxygen at higher liter flow and has fewer parts than any other concentrator on the market. Fewer parts, combined with greater reliability, help you to reduce expenditure on accessories and unnecessary inventory. The Millennium M10 is designed to be the highest performing and most reliable oxygen machine available.

Part number		HCPCS
M10600	Millennium 10-liter oxygen M10 concentrator	E1390
M10605	Millennium 10-liter oxygen M10 concentrator with OPI	E1390
M10600-10	Millennium 10-liter oxygen concentrator, transfill	
M10605-10	Millennium 10-liter oxygen concentrator with OPI, transfill	

*Both units include a patient manual.*

Accessories		HCPCS
1014653	High flow starter kit <i>Includes cannula, 25' tubing, connector</i>	A4615*, A4616*
1014654	High flow nasal cannula	A4615*
1017796	Inlet filter replacement kit	
1017768	High flow oxygen tubing, 25'	A4616*
1014655	Oxygen tubing connector	

*\*Accessories are not separately billable to Medicare except when used with patient owned equipment. Other payers may reimburse separately for these items.*

*Check with the specific payer. See the replacement parts catalog for additional replacement parts.*

# Portable concentrators

Part number		HCPCS
900-000	EverGo system <i>Includes black carrying case.</i>	E1390, E1392
900-002	EverGo system <i>Includes navy blue carrying case.</i>	E1390, E1392
1057012	EverFlo oxygen concentrator with EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057013	EverFlo oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057974	EverFlo oxygen concentrator with EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392
1057976	EverFlo oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392
1057014	EverFlo Q oxygen concentrator with EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057016	EverFlo Q oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes black EverGo case.</i>	E1390, E1392
1057987	EverFlo Q oxygen concentrator with EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392
1057988	EverFlo Q oxygen concentrator with OPI and an EverGo portable concentrator <i>Includes blue EverGo case.</i>	E1390, E1392

## EverGo portable oxygen concentrator

Is a portable oxygen therapy solution that truly gives your most active patients the freedom they deserve. Its extra-long battery life gives them the freedom to be spontaneous, and its larger oxygen capacity means patients can test their limits – without being limited by the device.

EverGo includes two rechargeable lithium ion batteries, mobile cart, DC and AC power cords, accessory case, and a user manual.

Accessories	
900-150	Air inlet filters, 6 per pk.
900-200	Black carrying case
900-202	Navy blue carrying case
900-102	Rechargeable lithium ion battery
900-250	Accessory case
900-103	Battery charger/recalibrator
900-100	Mobile cart
900-120	DC power cord <i>For use with EverGo with serial numbers higher than 109500.</i>
900-101	DC power cord <i>For use with EverGo with serial numbers lower than 109500.</i>
900-105	AC power supply
900-104	AC power cord
900-121	Airline connector

# Home oxygen filling system

## UltraFill home oxygen filling system

Is an advanced home oxygen system that combines a stationary oxygen concentrator, filling station, and high-capacity cylinders to meet the needs of a wide range of oxygen patients, including those who are highly active or require continuous flow oxygen. UltraFill also has the needs of your business in mind with features intended to save you money by using existing inventory and lowering your operating costs.

Part number		HCPCS
1057100	UltraFill station 120V	K0738
1057101	UltraFill system with 2 cylinders, 2,000 psi and a cylinder bag, 120V <i>3,000 psi cylinders available for additional charge.</i>	K0738
1039362	EverFlo 120V, transfill	E1390
1039363	EverFlo 120V OPI, transfill	E1390
1039365	EverFlo Q 120V, transfill	E1390
1039364	EverFlo Q 120V OPI, transfill	E1390
M10600-10	Millennium 120V, transfill	E1390 (with QF or QG modifier)
M10605-10	Millennium 120V OPI, transfill	E1390 (with QF or QG modifier)

## Accessories

### Cylinders

1065705	M4 cylinder, US, 2000 psi
1065706	M6 cylinder, US, 2000 psi
1065707	M9 cylinder, US, 2000 psi
1065708	MD15 cylinder, US, 2000 psi
1065709	ME24 cylinder, US, 2000 psi
1065715	MB08 cylinder, US, 3000 psi
1065716	MC13 cylinder, US, 3000 psi
1065717	MD22 cylinder, US, 3000 psi
1065718	ME36 cylinder, US, 3000 psi

### Accessories

1065697	Chad Therapeutics, Bonsai oxygen conserving device
1065698	Chad Therapeutics, 3100 pediatric regulator
1065699	Chad Therapeutics, 4800 regulator
1065700	Chad Therapeutics, 3100 regulator
1065701	Small cylinder bag (M9/MC13)
1065702	Medium cylinder bag (M4/M6/MB08)
1065703	Large cylinder bag (MD15/MD22)
1065724	Cylinder cart (MD15/ME24/MD22/ME36)
1065696	UltraFill transfer tubing

# Liquid portable oxygen

Part number		HCPCS
1019900	GoLox portable liquid oxygen system <i>Includes a shoulder strap, 4' single-lumen cannula, carrying bag, and a user manual.</i>	E0434

## GoLox portable liquid oxygen device

Eliminates the complications of conventional portable liquid oxygen devices to allow you to focus on quality care, not customer problems. Its patent-pending automatic refill termination feature ensures a clean, full fill every time without the hassles associated with liquid oxygen overfill. In addition, the unique GoLox fill coupler helps to prevent freezing during refill. To reduce operating costs, the GoLox portable liquid oxygen system utilizes a less expensive single-lumen cannula and requires no batteries.

Accessories	
1018019	Carrying bag
1017984	Shoulder strap

# Oximeters

## 920 and 920M hand-held oximeters

The 920 and 920M oximeters are small, easy-to-use handheld devices that deliver on-the-spot oximetry readings; perfect for home use. The 920M has the added capability of storing up to 18 hours of trend memory. Both oximeters are intended for spot check use and can be connected to an external printer.

### Part number

920	Hand-held oximeter
920M	Hand-held oximeter with memory

*Both include a 936 adult finger clip sensor, six AA batteries, and a manual.*

### Accessories

#### Hand-held oximeter

100-0433-00	Battery door
927	Extension cable, 3'
1008130	Extension cable, 10'
924	Manual
1007332	Carrying case

#### Hand-held oximeter with memory

H920M-40	Profox software <i>Download cable sold separately.</i>
1053371	Download cable
1019441	nVision software <i>Download cable sold separately.</i>
100-0433-00	Battery door

*See the replacement parts catalog for additional replacement parts.*

Part number	
920MP	920M Plus hand-held oximeter with memory <i>Includes 936 adult finger clip sensor, four AA batteries, and a manual.</i>
1028009	2500A hand-held oximeter downloadable with alarms

Accessories	
Software	
H920M-40	Profox software <i>Download cable sold separately.</i>
1019441	nVision software <i>Download cable sold separately.</i>
Miscellaneous	
920MPC-NA	920MP rechargeable battery system, wall mount <i>Includes 920MPC charger stand, NiMH rechargeable battery, power supply, and an operator manual.</i>
1053371	Download cable
920MPC	Charger stand only, replacement
1007355	920MP NiMH rechargeable battery
1007332	Carrying case

See the replacement parts catalog for additional replacement parts.

## 920M Plus hand-held oximeter with memory

The 920M Plus handheld pulse oximeter provides on-the-spot oximetry readings, and is designed to be easy to use for both healthcare professionals and patients. The 920M Plus features overnight recordings (72 hours of memory), is compatible with all Respironics sensors, uses disposable or rechargeable batteries, and interfaces with Profox and nVISION software.

## 2500A hand-held oximeter with memory and alarms

The 2500 handheld oximeter is a small, versatile digital pulse oximeter for accurate assessment of blood oxygen saturation and pulse rate. It is ideal for ambulatory monitoring and overnight recordings. The 2500A has two-button operation, is compact, has three power options, and features visual and audible alarms. Compatible with nVision and Profox software.

# Oximeters

## 9550 finger oximeter

Features auto-on for fast, easy spot checks, enables 2500 spot checks or 21 hours of continuous use, auto on/off, and a smaller, wider viewing angle for user convenience.

### Part number

1029216	9550 finger oximeter <i>Includes batteries, carrying case, and a lanyard.</i>
---------	--

### Accessories

1029432	Lanyard, black
1029381	Carrying case

See the replacement parts catalog for additional replacement parts.

## Part number

950	Finger pulse oximeter
-----	-----------------------

*Includes two AAA batteries and a manual.*

## Finger pulse oximeter

Weighing just two ounces, this durable, self-contained unit delivers an accurate pulse rate and blood oximetry in just seconds. It has auto on/off and a 1-year warranty.

## Accessories

100-0338-00	Gripping insert
-------------	-----------------

100-0339-00	External spring
-------------	-----------------

100-0340-00	Lanyard, black
-------------	----------------

1008811	Carrying case
---------	---------------

*See the replacement parts catalog for additional replacement parts.*

# Oximeters

## GO<sub>2</sub> pulse oximeter

The quality construction and high accuracy of the GO<sub>2</sub> finger oximeter allows your patients to take greater control of their lives while creating a new opportunity for your business. Oxygen patients now have a quality alternative in an accurate, affordable, and portable oximeter allowing them the freedom they need to go about their activities. You have the opportunity to offer your patients a personal oximeter that provides accuracy comparable to professional oximeters. Your patients will benefit from GO<sub>2</sub>'s reliable and accurate oxygen saturation and heart rate monitoring information, which allows them to manage both their oxygen and their activity level.

### Part number

1062232	GO <sub>2</sub> finger oximeter
---------	---------------------------------

### Accessories

1062965	Carrying case
1062966	Lanyard

Part number	
1019445	WristOx ambulatory digital pulse oximeter <i>Includes a wristband, sensor, and a battery.</i>

Accessories	
Software	
H920M-40	Profox oximetry software <i>Download cable sold separately.</i>
1019441	nVision software <i>Download cable sold separately.</i>
Sensors	
1019522	Adult fingerclip sensor
953	Adult finger sensor <i>Use with 1019444 sensor adapter cable.</i>
Miscellaneous	
1019443	PC interface cable, download cable <i>For use with WristOx.</i>
1019440	Reusable wristbands, 10 per pk.
1019438	Reusable wristband extenders, 5", 10 per pk.
1019444	Sensor adapter cable
1019439	Carrying case

See the replacement parts catalog for additional replacement parts.

## WristOx ambulatory digital pulse oximeter

Is a small, lightweight pulse oximeter designed to sit comfortably on the patient's wrist. The compact design makes it ideal for monitoring daily activities and for overnight studies while giving the patient greater freedom to perform daily tasks, even exercises. It has a non-volatile 33-hour memory and three-year warranty.

## Leading the way in sleep diagnostics.

Our focus is on helping sleep technicians better handle their patient monitoring needs, in or out of the lab. We provide 24/7 technical service and support and a full line of quality products including Pro-Tech sensors. It's all about an appropriate diagnosis and healthy night's sleep for patients. Simply inspired by you.

## Alice 5

The Alice 5 diagnostic sleep system provides sleep labs with a powerful way to diagnose sleep disorders in the lab setting. The system records, displays, and prints physiological sleep study information, and is appropriate for use with infants through adults. Alice 5 simplifies the integration of lab devices through a high-tech consolidation that requires a maximum of only two cables. You're able to receive usable data for your patient analysis without sacrificing output. The system has been designed with innovative real-time impedance so you never lose sight of your patient's data.

Part number	
1017226	Alice 5 system <i>Includes a base station, headbox, speakers, microphone kit, mouse pad, power supply, AC power cord, headbox wall mounting kit, headbox carrying case, headbox shoulder strap, and a setup and user's guide.</i>

Accessories	
Core component accessories	
1017228	Headbox
1019565	Intercom microphone kit
1021566	Antenna kit
1021628	Alice Sleepware
Neuro accessories	
8051	EEG electrode cream
8052	EEG electrode prep
1020971	EEG/EMG/EOG leads, 48", 10 per pk.
1016339	EEG/EMG/EOG leads, 72", 10 per pk.
1020972	EEG/EMG/EOG leads, 96", 10 per pk.
1020970	EEG/EMG/EOG leads, 120", 10 per pk.
P1097	Wireset, jumpers, 1.5mm
Pro-Tech sensors	
P1304	PTAF Lite
P1259	Cannulas, adult, 60 per pk. <i>For use with PTAF Lite.</i>
P1263	Cannulas, pediatric, 60 per pk. <i>For use with PTAF Lite.</i>
P1267	Cannulas, pediatric small, 60 per pk. <i>For use with PTAF Lite.</i>
P1300	Nasal/oral cannulas, adult, 5 per pk. <i>For use with PTAF Lite.</i>
P1301	Cannulas, adult, 10 per pk. <i>For use with PTAF Lite.</i>
P1302	Cannulas, pediatric, 10 per pk. <i>For use with PTAF Lite.</i>
P1303	Cannulas, pediatric small, 10 per pk. <i>For use with PTAF Lite.</i>
P1274	Thermistor 1 channel, adult, 1.5mm, Alice 5
P1336	Thermistor 1 channel, pediatric, Alice 5

Accessories	
P1337	Thermistor 1 channel, pediatric small, nasal bridge mount, Alice 5
P1344	Thermistor oral, adult Alice 5
P1818	zRIP inductive effort, Alice 5 adult kit <i>Includes two belts, zRIP module, wireset.</i>
P1819	zRIP inductive effort, Alice 5 pediatric kit <i>Includes two belts, zRIP module, wireset.</i>
P1736	zRIP Alice 5 replacement module
P1806	zRIP adult RIP belt (single belt)
P1807	zRIP pediatric RIP belt (single belt)
P1133	zRIP replacement wireset
P1822	zRIP effort sensor, large
P1586	CT2 Piezo sensor, adult (with belt)
P1592	Pro-Tech extension strap for Piezo effort belts
P1587	CT2 Piezo sensor, pediatric (with belt)
P1694	Body position sensor
P1716	Snore sensor
1009963	Actimeter
ECG accessories	
1016360	ECG electrodes, adult, 5 per pk.
1016361	ECG electrodes, infant, 3 per pk.
1016364	ECG lead set, 4-wire, 72"
3262	ECG lead set, 3-wire, 72"
Masimo oximeter sensors	
1019529	Patient cable, oximeter sensor, 8'
1019530	Multi-site reusable sensor, Masimo
1019531	Standard multi-site wraps, Masimo, 100 per pk.
1019532	Clean shield multi-site wraps, Masimo, 100 per pk.
H5871	Reusable oximeter sensor, finger clip
H5875	Disposable sensors, adult, 20 per pk.
H5874	Disposable sensors, pediatric, 20 per pk.
H5873	Disposable sensors, neonatal, 20 per pk.
H5872	Disposable sensors, premie, 20 per pk.
953	Oximetry finger sensor, reusable
954A	Oximetry tape, single use, 25 per pk.
Computers	
1024624	Laptop PC with DVD-RW
1043167	Desktop PC
1043655	Widescreen monitor, 24"
1013805	LCD flat panel monitor, 20"
8003-10	Computer desk, Anthro, 36"
9800	Black/white laser printer
1016344	Uninterrupted power supply

Network Accessories	
1012148	Network office connect hub (switch) 16 port
H3151-50	Connecting cable, CAT-5 crossover, 50'
3151-100	Connecting cable, CAT-5 crossover, 100'
H3150-50	Connecting cable, CAT-5 patch, 50'
H3150-100	Connecting cable, CAT-5 patch, 100'
Video/audio components	
1016348	Video camera <i>Analog Bullet with IR Illumination.</i>
1016347	Video web server, Axis 2400+ (4 port)
1016311	Web/network camera (IR), Axis 221
1016349	IR projector
1020582	Video camera with pan/tilt/zoom (analog)
1016340	Speakers, Altec Lansing <i>Includes two speakers and a power cord.</i>
1049497	Audio buddy intercom kit
1026576	VideoEase CCTV balun
1032204	Modular CCTV power-thru balun
1021731	Analog video cable, 50'
1021730	Analog video cable, 100'
Miscellaneous	
1016343	Shoulder strap for headbox
1020266	Wall mounting kit
1020584	Carrying pouch for headbox
1016309	Sensor bag
1024582	Carrying case, Pelican <i>Includes sensor bag.</i>
1016310	Alice 5 mouse pad
Auxiliary signal cables	
1031797	9-pin RS232 to RS232 optical isolator
1007492	SleepLink card with serial cable
1000814	Encore shielded communications cable, 6'
1016351	A/B auxiliary input signal splitter, Alice 5/LE
1016352	Connecting cable auxiliary input, 10' base
1021728	Analog attenuator cable
1021726	Three-output analog cable
1021727	Six-output analog cable

1016360	ECG electrodes, adult, 5 per pk.
1016361	ECG electrodes, infant, 3 per pk.
1016364	ECG lead set, 4-wire, 72"
3262	ECG lead set, 3-wire, 72"
Masimo oximeter sensors	
1019529	Patient cable, oximeter sensor, 8'
1019530	Multi-site reusable sensor, Masimo
1019531	Standard multi-site wraps, Masimo, 100 per pk.
1019532	Clean shield multi-site wraps, Masimo, 100 per pk.
H5871	Reusable oximeter sensor, finger clip
H5875	Disposable sensors, adult, 20 per pk.
H5874	Disposable sensors, pediatric, 20 per pk.
H5873	Disposable sensors, neonatal, 20 per pk.
H5872	Disposable sensors, preemie, 20 per pk.
953	Oximetry finger sensor, reusable
954A	Oximetry tape, single use, 25 per pk.
Computers	
1024624	Laptop PC with DVD-RW
1020635	Tablet PC
1020929	Tablet PC docking station
1013805	LCD flat panel monitor, 20"
1043167	Desktop PC
1043655	Widescreen monitor, 24"
8003-10	Computer desk, Anthro, 36"
9800	Black/white laser printer
1016344	Uninterrupted power supply

Network accessories	
H3151-50	Connecting cable, CAT-5 crossover, 50'
3151-100	Connecting cable, CAT-5 crossover, 100'
H3150-50	Connecting cable, CAT-5 patch, 50'
H3150-100	Connecting cable, CAT-5 patch, 100'
Video/audio components	
1016348	Video camera <i>Analog bullet with IR illumination.</i>
1016347	Video web server Axis 2400+ (4 port)
1016311	Web/network camera (IR), Axis 221
1016349	IR projector
1020582	Video camera with pan/tilt/zoom (analog)
1016340	Speakers, Altec Lansing <i>Includes two speakers and a power cord.</i>
1049497	Audio buddy intercom kit
1026576	VideoEase CCTV balun
1032204	Modular CCTV power-thru balun
1021731	Analog video cable, 50'
1021730	Analog video cable, 100'
Miscellaneous	
1016343	Shoulder strap for headbox
1020266	Wall mounting kit
1020584	Carrying pouch for headbox
1016309	Sensor bag
1024582	Carrying case, Pelican <i>Includes sensor bag.</i>
1016310	Alice 5 mouse pad
Auxiliary signal cables	
1031797	9-pin RS232 to RS232 optical isolator
1007492	SleepLink card with serial cable
1000814	Encore shielded communications cable, 6'
1016351	Auxiliary split adapter
1016352	Connecting cable auxiliary input, 10' base
1021728	Analog attenuator cable
1021726	Three-output analog cable
1021727	Six-output analog cable

# Portable diagnostics

## Alice PDx

Is a portable, diagnostic recording device for OSA screening, follow-up, and diagnostic assessment of cardio-respiratory sleep disorders. This flexible and portable sleep system incorporates advanced features required to meet today's industry needs. It satisfies the portable testing requirements for levels II, III, and IV and provides capabilities of basic screening to advanced diagnostic evaluation. The Alice PDx enables your patients to be tested outside of the lab without compromising study results, helping you to avoid costs associated with retesting.

Part number	
1043941	Alice PDx device kit

Optional components	
1040808	ExG yoke

Accessories	
P1837	zRIP adult sensor kit
P1379	Oral thermistor
927	Nonin SpO <sub>2</sub> extension cable, 3'
936	SpO <sub>2</sub> finger clip sensor
953	SpO <sub>2</sub> flex sensor
1062051	Nonin finger soft sensor, small
1062050	Nonin finger soft sensor, medium
1062049	Nonin finger soft sensor, large
954A	Adult flexwrap, disposable for use with 953 sensor, 25 per pk.
P1806	zRIP effort sensor, adult single belt
P1170	zRIP wireset
P1388	Thermistor, airflow, nasal oral, adult, sensor
P1328-60	Pro-Flow nasal cannula, adult, 16", 60 per case
P1343	Pro-Flow Plus nasal oral cannula, adult, 16", 30 per case
P1391	CPAP titration kit
1053279	Battery door
1053280	Holster
1043937	Carry case
1053952	Secure digital cards, 1GB, 2 per pk.
1053194	Lanyard

# Portable diagnostics

## Stardust II

Is powerful enough to generate comprehensive seven-channel reports and small enough to be worn comfortably while sleeping – wherever, whenever. The Stardust II also enables you to meet level III and IV testing requirements.

Part number	
1025720	Stardust II recorder package
1012120	Stardust II host software kit

*Includes manual.*

Accessories	
Cables	
1006037	Optical remote cable, 15"
612214K	Serial connection RS 232
1007492	SleepLink card with serial cable
1011955	REMstar Auto serial link cable
Effort sensors	
P1805	CT2 effort sensor, adult
Oximeters	
1007199	Oximeter finger clip sensor
612054	Flexible finger oximetry Y probe kit with adult sensor tape
6131-00	Ear clips, adult, 10 per pk.
8700-00	Adhesive dots, 200 per pk.
1006393	Oximeter probe foam tape, 25 per pk.
6968-00	Adhesive foam wraps, small, 25 per pk.
6929-00	Adhesive foam wraps, adult, 25 per pk.
8943-00	Non-adhesive foam wraps, small, 25 per pk.
8836-00	Non-adhesive foam wraps, adult, 25 per pk.
8831-00	Butterfly wraps, small, 100 per ctn.
8832-00	Butterfly wraps, adult, 100 per ctn.
8828-00	Y-sensor tape strips, 20mm, 100 per ctn.
8829-00	Y-sensor tape strips, 25mm, 100 per ctn.
Thermistor sensors	
P1396	PTAF sensor kit <i>Includes one sensor and five cannulas.</i>
P1340	PTAF sensor
P1339	Thermistor sensor, adult
P1259	Nasal cannulas, 60 per pk.
P1295	Nasal/oral cannulas, adult, 30 per pk.
Miscellaneous	
1008312	Pouch
610200	Carrying case
202-1	Velcro patch, 2 x 2
1003510	Respironics screwdriver

# Screening devices and actigraphy

## RUSleeping RTS

You now have an immediate solution to offer your patients who are on a waiting list for a PSG. The RUSleeping RTS is an easy-to-use, same-day, objective method for patients who have been recommended for a PSG but can't be scheduled right away due to facility backlog.

### Part number

1037683	RUSleeping RTS <i>Includes a battery, provider manual, pack of user manual/response cards, cannula, and a travel box.</i>
---------	--

### Accessories

#### Cannulas

P1259	Pro-Tech nasal cannulas, 60 per case
P1301	Pro-Tech nasal cannulas, 10 per case

#### Miscellaneous

1037755	User guide/response cards, 75 per pk.
---------	---------------------------------------

## Actiwatch actigraphy systems

Ambulatory actigraphy devices that collect and download continuous, objective, long-term sleep/wake data. Data is collected over multiple days in a subject's ambulatory environment. The devices incorporate the comfort and aesthetics of a standard wrist watch and provide important and reliable insight into subject or patient sleep/wake behavior for clinical trial, clinical sleep, and research purposes.

### Part number

1048090	Actiwatch 2
1048091	Actiwatch Spectrum
1044809	Actiwatch 2 start-up system
1046964	Actiwatch Spectrum start-up system

*Communication dock and Actiware software are required.*

### Accessories

#### Bands

1048094	Actiwatch 2 watchband kit
1048135	Actiwatch Spectrum watchband kit
1044811	Watchband tool
1044810	Actiwatch 2 watchband pack
1048136	Actiwatch Spectrum watchband pack
1044816	Actiwatch 2 hospital band pack

#### Miscellaneous

1048092	Actiwatch 2 dock system
1048093	Actiwatch Spectrum dock system
1048137	Actiware software package

**Accessories****Pro-Flow nasal cannulas**

P1259	Pro-Flow, adult, 60 per case
P1301	Pro-Flow, adult, 10 per pk.
P1306	Pro-Flow, adult, 8.25", 60 per case
P1309	Pro-Flow, adult, 8.25", 5 per pk.
P1317-20	Pro-Flow, adult, 1.1M, 20 per case
P1328-60	Pro-Flow, adult, 16", 60 per case
P1390	Pro-Flow, adult, 16", 5 per pk.
P1263	Pro-Flow, pediatric, 60 per case
P1302	Pro-Flow, pediatric, 10 per pk.
P1330	Pro-Flow, pediatric, 8.25", 60 per case
P1331	Pro-Flow, pediatric, 8.25", 10 per pk.
P1321-20	Pro-Flow, pediatric, 1.1M, 20 per case
P1381	Pro-Flow, pediatric, 16", 60 per case
P1267	Pro-Flow, pediatric small, 60 per case
P1303	Pro-Flow, pediatric small, 10 per pk.
P1323-20	Pro-Flow, pediatric small, 1.1M, 20 per case
P1258	Pro-Flow sample pack <i>Includes two packs each P1259 and P1295.</i>

**Pro-Flow Plus nasal/oral cannulas**

P1295	Pro-Flow Plus, adult, 30 per case
P1300	Pro-Flow Plus, adult, 5 per pk.
P1308	Pro-Flow Plus, adult, 8.25", 30 per case
P1319-10	Pro-Flow Plus, adult, 1.1M, 10 per case
P1334	Pro-Flow Plus, adult, 8.25", 30 per case, no filter
P1343	Pro-Flow Plus, adult, 16", 30 per case
P1354	Pro-Flow Plus, pediatric, 30 per case
P1383	Pro Flow Plus, adult, 30 per case

**Pro-Flow MultiPurpose oral cannula**

P1350	Pro-Flow MultiPurpose, adult, 30 per case
P1368	Pro-Flow MultiPurpose, adult, 5 per pk.
P1346	Pro-Flow MultiPurpose, pediatric, 30 per case
P1369	Pro-Flow MultiPurpose, pediatric, 5 per pk.
P1348	Pro-Flow MultiPurpose, pediatric small, 30 per case
P1370	Pro-Flow MultiPurpose, pediatric small, 5 per pk.

**Pro-Flow Plus MultiPurpose nasal/oral cannula**

P1373	Pro-Flow Plus MultiPurpose, adult, 30 per case
P1374	Pro-Flow Plus MultiPurpose, adult, 5 per pk.
P1366	Pro-Flow Plus MultiPurpose, pediatric, 30 per case
P1375	Pro-Flow Plus MultiPurpose, pediatric, 5 per pk.

**Cannula accessories**

P1324	Cannula adapter kit
P1107	Cannula titration filter, 50 per pk.
P1109	Cannula titration filter, 10 per pk.
P1162	Pro-Wrap, combines a therm and cannula, 100 per pk.
1041483	RUSleeping RTS kit

**Pro-Tech sensors**

As a leader in the development, manufacturing, and supply of sensors to the sleep diagnostics industry, we offer a full line of high-performance, quality Pro-Tech sensors to help you obtain the data you need. Our sensor product line includes quality sensors that detect respiratory airflow, respiratory effort, snoring, periodic limb movements, and sleep position.

Our affordable zRIP technology provides true breathing movement tracings with no false paradoxing and accurate signals for the detection of respiratory effort. The PTAF 2 pressure-based transducer is designed to generate accurate respiratory signals. These, along with a variety of Pro-Tech cannulas, thermal airflow sensors, and snore sensors are available to meet your accreditation needs. Adult and pediatric sizes are available.

# Sensors

Accessories	
Thermal airflow, reusable thermocouple	
P1221	Thermocouple 6" single element, adult
P1222	Airflow sensor 1 channel, adult
P1228	Airflow sensor 1 channel, adult, ADAM nasal only
P1229	Airflow sensor 1 channel, adult, ADAM nasal and oral
P1229-4523	Airflow sensor 1 channel, adult, Breeze nasal and oral
P1223	Airflow sensor 1 channel, pediatric
P1214	Airflow sensor 1 channel, pediatric small nasal bridge mount
P1224	Airflow sensor 2 channel, adult
P1230	Airflow sensor 2 channel, ADAM nasal and oral
P1225	Airflow sensor 2 channel, pediatric
P1226	Airflow sensor 3 channel, adult
P1227	Airflow sensor 3 channel, pediatric
Disposable airflow	
P1238	Reusable wireset
P1242	Disposable airflow sensors, adult, 10 per pk.
P1332	BreathSensor cable, adult
P1333	BreathSensor cable, Suzanne, adult
P1112	BreathSensor cable, SD20, adult
P1154	BreathSensor cable, Pocket, adult

Accessories	
Reusable thermistor	
P1246	Thermistor 1 channel nasal/oral, adult, Alice 3
P1286	Thermistor 1 channel nasal/oral, adult, Alice 4
P1274	Thermistor 1 channel nasal/oral, adult, 1.5mm, Alice 5
P1274-249	Thermistor 1 channel nasal/oral, adult, Embletta
P1312	Thermistor 1 channel nasal/oral, adult, Suzanne
P1364	Thermistor 1 channel nasal/oral, adult, Sandman Exp
P1336	Thermistor 1 channel nasal/oral, pediatric, Alice 5
P1299	Thermistor 1 channel nasal/oral, pediatric, Alice 4
P1298	Thermistor 1 channel nasal/oral, pediatric, Alice 3
P1313	Thermistor 1 channel nasal/oral, pediatric, Suzanne
P1298-249	Thermistor 1 channel nasal/oral, pediatric, Embletta
P1378	Thermistor 1 channel nasal/oral ped., Sandman Exp
P1337	Thermistor 1 channel, pediatric small, nasal bridge mount, Alice 5
P1297	Thermistor 1 channel, pediatric small, nasal bridge mount, Alice 4
P1296	Thermistor 1 channel, pediatric small, nasal bridge mount, Alice 3
P1314	Thermistor 1 channel, pediatric small, nasal bridge mount, Suzanne
P1388	Thermistor airflow nasal oral, adult, Alice PDx
Oral airflow sensors	
P1273	Thermocouple oral, 1.5mm connector, adult
P1273-249	Thermistor, oral, adult, Embletta
P1360	Thermistor, 1 channel, adult, oral, 1.5mm
P1285	Thermistor, 1 channel, adult, oral, Alice 4
P1284	Thermistor, 1 channel, adult, oral, Alice 3
P1344	Thermistor oral, adult, Alice 5
P1275	Thermistor, 1 channel, adult, 20", Flaga
P1379	Thermistor, oral, adult, Alice PDx
PTAF2 pressure transducers	
P1287	PTAF2 kit
PTAF2 cables	
P1075	Low level cable, 1.5mm
P1076	Low level cable, 1/8 male
P1077	Low level cable, 3/32 male
P1078	High level cable, 1/8 male
P1079	High level cable, 1/8 female
P1080	High level cable, 3/32 male
P1081	High level cable, 1/4 male
P1082	High level cable, 6-4 modular
P1087-025	Ext cable with coupler, 25'
P1087-050	Ext cable with coupler, 50'
P1087-100	Ext cable with coupler, 100'
P1087-200	Ext cable with coupler, 200'
P1138	High level cable 3.5mm

Accessories	
<b>PTAF Lite</b>	
P1289	PTAF Lite kit
P1304	PTAF Lite, Alice 5
P1341	PTAF SmartRecorder
<b>Pressure accessories</b>	
P1288	PTAF2 remote module
P1107	Cannula titration filters, 50 per pk.
P1109	Cannula titration filters, 10 per pk.
P1327	CPAP titration kit
P1391	Titration kit, Alice PDx
P1163	PTAF3 pressure tubes, 72", 3 per pk., Fisher & Paykel
P1164	PTAF3 dual AF tube, 36" Fisher & Paykel
<b>zRIP respiratory effort kits and sensors – zRIP kits</b>	
P1808	zRIP kit, adult
P1839	zRIP sum RT kit, adult
P1837	zRIP kit, adult, Alice PDx
P1818	zRIP kit, adult, Alice 5
P1816	zRIP kit, adult, Alice 4
P1812	zRIP kit, adult, Alice 3
P1820	zRIP kit, adult, Bio-logic
P1841	zRIP kit, adult, QDC
P1809	zRIP kit, pediatric
P1840	zRIP sum RT kit, pediatric
P1819	zRIP kit, pediatric, Alice 5
P1817	zRIP kit, pediatric, Alice 4
P1815	zRIP kit, pediatric, Alice 3
P1821	zRIP kit, pediatric, Bio-logic
P1842	zRIP kit, pediatric, QDC
<b>zRIP modules</b>	
P1732	zRIP module
P1753	zRIP sum RT module
P1736	zRIP module, Alice 5
P1735	zRIP module, Alice 4
P1734	zRIP module, Alice 3
P1738	zRIP module, Bio-logic
P1806	zRIP, adult, 24" – 74"
P1822	zRIP, adult large, 45" – 123"
P1807	zRIP, pediatric, 16" – 42"
<b>Wiresets and cables</b>	
P1133	zRIP wireset
P1137	zRIP wireset, Medicare
P1170	zRIP wireset, Alice PDx
P1176	zRIP cable abdomen, QDC
P1177	zRIP cable ribcage, QDC

Accessories	
<b>Piezo respiratory effort kits</b>	
P1461	Piezo 1 channel, adult kit
P1463	Piezo 2 channel plus, adult kit
P1572	Piezo 1 channel, adult kit, Alice 4
P1548	Piezo 1 channel, adult kit, Alice 3
P1462	Piezo 1 channel, pediatric kit
P1464	Piezo 2 channel plus, pediatric kit
<b>Piezo respiratory effort sensors</b>	
P1460	Piezo sensor 1.5"
P1571	Piezo sensor 1.5" adult, Alice 4
P1547	Piezo sensor 1.5" adult, Alice 3
P1582	CT2 Piezo sensor, adult
P1582-249	CT2, adult, Bio-logic Traveler
P1586	CT2, adult, Alice 5
P1804	CT2, adult, Alice 4
P1803	CT2, adult, Alice 3
P1589	CT2, adult, Suzanne
P1800	CT2, adult, Embletta
P1823	CT2, adult, chest, Sandman Pocket
P1824	CT2, adult, abdominal, Sandman Pocket
P1453	Piezo sensor 1", pediatric
P1585	CT2, pediatric
P1587	CT2, pediatric, Alice 5
P1814	CT2, pediatric, Alice 4
P1813	CT2, pediatric, Alice 3
P1584	CT2, pediatric, Suzanne
P1825	CT2, pediatric, chest, Sandman Pocket
P1826	CT2, pediatric, abdominal, Sandman Pocket
<b>Straps and extensions</b>	
P1592	Ext strap, 18", CT2
P1420	Velcro strap, adult, 1.5" kit
P1421	Velcro strap, adult, 1.5", size 1
P1422	Velcro strap, adult, 1.5", size 2
P1423	Velcro strap, adult, 1.5", size 3
P1416	Velcro strap, pediatric, 1.5" kit
P1417	Velcro strap, pediatric, 1.5", size 1
P1418	Velcro strap, pediatric, 1.5", size 2
P1419	Velcro strap, pediatric, 1.5", size 3
P1448	Velcro strap, pediatric, 1" kit
P1449	Velcro strap, pediatric, 1", size 1
P1450	Velcro strap, pediatric, 1", size 2
P1451	Velcro strap, pediatric, 1", size 3
P1452	Velcro strap, pediatric, 1", size 4

# Sensors

Accessories	
Body position sensors	
P1652	Sleep position indicator resistive
P1658	Sleep position indicator Lite kit
P1663	Sleep position indicator Lite module
P1664	Sleep position indicator DC
P1664-WS2074	Sleep position indicator DC, 1.5mm
P1676	Sleep position indicator resistive, Flaga
P1692	Sleep position indicator sensor, Bio-logic
P1694	Body position sensor, Alice 5
P1707	Body position sensor, Alice 4
P1706	Body position sensor, Alice 3
P1695	Sleep position indicator DC, Suzanne
P1719	Body position sensor, Sandman SD20
P1737	Body position sensor resistive, T2 Bio-logic
P1744	Body position sensor, Sandman Pocket
P1746	Body position sensor DC with 3.5mm connector
Snore sensors and microphones	
P1696	Piezo snore
P1704	Microphone snore, Alice 4
P1703	Microphone snore, Alice 3
P1705	Microphone snore, Suzanne
P1716	Microphone snore
P1718	Sensor snore, Embletta
P1742	Microphone snore, Sandman Pocket
Periodic limb movement	
P1697	Piezo PLM sensor
P1698	Piezo PLM kit
P1699	Piezo PLM sensors, 2 per kit
P1097	Jumper wireset, 1.5mm
P1689	Velcro strap, PLM sensor, large
P1690	Velcro strap, PLM sensor, small
Sensor testers	
P1711	ST-3 kit
P1722	ST-3, Alice kit
P1315	Continuity test wireset ST-3
Accessories, Sandman Pocket	
P1740	VelcroStrap armband low
P1741	VelcroStrap armband up
P1156	Wireset ECG
P1157	Wireset ground

# Titration systems

## OmniLab Advanced multi-mode titration system

An all-in-one system to help make titrating patients more efficient. You can now avoid the inconvenience of interrupting therapy to move patients to another room to titrate on a different therapy. Six modes with multiple technologies – including Respiroics BiPAP autoSV Advanced and Respiroics BiPAP AVAPS – are accessible directly from your PC, so you can titrate more types of patients than ever before.

Part number	
1043343	OmniLab Advanced lab titration system core package <i>Includes an integrated heated humidifier, interface card/cable, and a cable adapter.</i>

Accessories	HCPCS*
<b>Filters</b>	
1005945	Ultra-fine filters, disposable, 2 per pk. A7038
1005964	Pollen filters, reusable, 2 per pk. A7039
<b>Humidifiers</b>	
1005792	Integrated heated humidifier E0562
1011785	Integrated pass-over humidifier E0561
1035162	Heated humidifier replacement chamber A7046
<b>Tubing</b>	
622038	Reusable patient tubing, 6', gray A7037
<b>Software</b>	
1022090	PC direct
<b>Miscellaneous</b>	
1007492	SleepLink interface card/cable
1006102	SleepLink cable adapter
1049830	Flapper valves, 10 per pk.
1022895	USB to serial adapter
1000814	Shielded communication cable, 6'
1006966	Analog output module (AOM)
1024625	CAT-5 cable kit, 10' <i>Includes appropriate serial adapter (crossover and non-crossover).</i>
1024626	CAT-5 cable kit, 50' <i>Includes appropriate serial adapter (crossover and non-crossover).</i>
1024627	CAT-5 cable kit, 100' <i>Includes appropriate serial adapter (crossover and non-crossover).</i>

\*Only valid if device is being used in the home for therapy.

Sleep diagnostics

How  
active is  
your  
action  
hero?

Busy kids with asthma need the portability, speed and reliability of MicroElite. This miniature, conveniently portable jet nebulizer compressor system fits in the palm of your hand, delivers treatments in as little as eight minutes, and nebulizes the same medications as larger compressors. So, if you and your action hero are always on the go, ask your doctor or pharmacist how MicroElite can help simplify your life.

# Peak flow meters

## ASSESS

Measure airway obstruction easily, accurately, and cost-effectively. Peak expiratory flow rate (PEFR) provides an objective, clinically-relevant measurement of airflow – at a fraction of the cost, bulk, and inconvenience of conventional spirometry. And, when seconds count, you can count on ASSESS to deliver those measurements with superior accuracy and reproducibility. Everything about ASSESS, from its easy-to-use design, to its easy-to-read scale, to its transparent construction that encourages regular cleaning, to its virtually indestructible polycarbonate body, is designed to make it work better and last longer.

Part number		HCPCS
HS710-012	ASSESS full range peak flow meters, 12 per pk.	A4614
HS750-012	ASSESS low range peak flow meters, 12 per pk.	A4614

*Both units include an adult and pediatric mouthpiece.*

## AsthmaCheck

AsthmaCheck's easy-grip handle directs hands away from the airflow path and ensures accurate measurements every time. Like all of our peak flow meters, it has a built-in three-zone management system and an easy-to-read scale which is suitable to all patients (60 – 810 l/min).

Part number		HCPCS
HS740-012	AsthmaCheck, 12 per pk.	A4614

# Peak flow meters

Part number		HCPCS
HS742-010	AsthmaMentor, 10 per pk.	A4614

## AsthmaMentor

Turn our peak flow meter into your asthma action plan and teach your patients better asthma management in minutes. AsthmaMentor has been designed to help clinicians teach patients what to do when their asthma conditions change. AsthmaMentor's unique features make the most of the time you have with your patients. The exclusive built-in AutoZone system automatically calculates green, yellow, and red zones when the top of the color bar is set at a patient's personal best or predicted average PEF. The asthma action plan sticker, which provides color-coded areas where you can write medication instructions, can be affixed to the back of the meter. Your instructions are then easily matched with daily peak flow readings, helping your patient comply with them.

Part number		HCPCS
HS755-012	Personal Best full range peak flow meters, 12 per pk.	A4614
HS756-012	Personal Best low range peak flow meters, 12 per pk.	A4614

## Personal Best peak flow meter

Wherever Personal Best goes – in the hospital, office, or home – it sets a new standard for convenience, compliance, and confidence. And Personal Best goes anywhere...easily. A lightweight, self-contained, portable design puts peak flow monitoring at your fingertips – or your patients' – all day long. Plus, a rugged, sterilizable construction helps it stand up to the roughest use day after day. Personal Best encourages compliance with its comfortable oval mouthpiece and easy-to-use built-in handle. And it improves patient communication with its high-legibility scale and NAEPP-endorsed three-zone management system. Available in both full range (60 – 810 l/min) and low range (50 – 390 l/min).

# Mouthpieces and chambers

## Disposable and one-way valve safety mouthpieces

Safety mouthpieces reduce the risk of cross-contamination during multi-patient screening with Personal Best, ASSESS, AsthmaMentor, and AsthmaCheck peak flow meters. The one-way valve prevents patients from inadvertently breathing in air through their meters during PEFr testing.

Part number	
HS711-100	Disposable adult mouthpieces for ASSESS, 100 per pk.
HS712-100	Disposable pediatric mouthpieces for ASSESS, 100 per pk.
HS715-100	Disposable pediatric plastic mouthpieces for all Respironics' peak flow meters, 100 per pk.
HS757-100	Disposable mouthpieces for Personal Best, AsthmaMentor, and AsthmaCheck, 100 per pk.
HS713-200	One-way valve safety mouthpieces for ASSESS, 200 per pk.
HS714-200	One-way valve safety mouthpieces for Personal Best, AsthmaMentor, and AsthmaCheck, 200 per pk.

## OptiChamber Advantage valved holding chamber

OptiChamber Advantage valved holding chamber helps your patients get the best part of their asthma inhaler medication in the most efficient way. With optimal performance and optimal value, OptiChamber Advantage gives you and your patients the advantage in metered dose inhaler therapy. And OptiChamber Advantage is an ideal pediatric chamber that easily adapts to all patient needs. Multi-sized pediatric masks attach directly to the mouthpiece for superior fit and comfort when assisting infants and small children with inhaler medications. When no longer needed, the masks can be removed for optimal drug delivery without buying a new chamber. OptiChamber Advantage's replaceable low-resistance valve is sensitive enough to respond to the lowest of pediatric flow rates. And its MDI adapter accommodates all HFA inhalers, making OptiChamber Advantage the most versatile and cost-effective product of its kind.

Part number		HCPCS
HS80010-010	OptiChamber Advantage, 10 per pk.	A4627
HS80702-001	Replacement valves, 2 per pk.	

# Chambers and masks

Part number		HCPCS
HS80110-010	OptiChamber with small mask, 10 per pk.	A4627
HS80210-010	OptiChamber with medium mask, 10 per pk.	A4627
HS80310-010	OptiChamber with large mask, 10 per pk.	A4627

## OptiChamber with mask

OptiChamber Advantage with masks was designed to optimize delivery of a metered dose inhalers asthma medication. Detachable masks (small, medium, and large) allow children and adults to switch to the mouthpiece with ease. Designed to optimize patient value and ease of use, the replaceable valve facilitates cleaning and provides longer, trouble-free performance.

Part number		HCPCS
HS81111-010	OptiChamber small face mask, 10 per pk.	A4627
HS81211-010	OptiChamber medium face mask, 10 per pk.	A4627
HS81311-010	OptiChamber large face mask, 10 per pk.	A4627

## OptiChamber masks

Our detachable valved holding chamber masks provide an effective seal and conform to fit different facial geometries. Built-in reinforcements help prevent the mask from collapsing and assist in maintaining a seal, especially when your pediatric patients are not cooperative. Available in small (0 – 18 months), medium (1 – 6 years), and large (6 years +) sizes.

# Spacers, chambers, and asthma kits

## OptiHaler

OptiHaler fits any lifestyle – it's the spacer your patients will actually use. OptiHaler's compact size and specially engineered shape make it easy for active asthma patients to get improved drug delivery without having to carry a bulky valved holding chamber. So when you prescribe OptiHaler, you're making sure that your patient's asthma action plan fits into their lifestyle and just about everywhere else.

Part number		HCPCS
HS765-010	OptiHaler, 10 per pk.	A4627

## ProChamber valved holding chamber

ProChamber is the professional model valved holding chamber for the acute respiratory care setting. Its proven clinical performance and great value make ProChamber the choice for the budget-conscious clinician.

Part number		HCPCS
HS2003-050	ProChamber valved holding chambers, 50 per pk.	A4627

## AsthmaPACK

Pick a PACK (Personal Asthma Care Kit) for patient compliance and implement three key elements of the NAEPP asthma treatment guidelines with one prescription-peak flow monitoring, MDI drug delivery, and asthma education. One prescription will give your patients a comprehensive, clinician-directed, patient-managed asthma plan with the tools needed to better understand their asthma, monitor their conditions objectively, and take their prescribed medications correctly and consistently.

Part number		
HS720-010	AsthmaPACK, 10 per pk.	
HS722-010	AsthmaPACK II, 10 per pk.	
HS724-010	AsthmaPACK III, 10 per pk.	

*Includes a peak flow meter, spacer, instructional video, and educational self-help booklet.*

# Asthma kits and compressor nebulizers

## Part number

HS725-010 AsthmaPACK children's asthma care kits, 10 per pk.

Includes a Personal Best Low Range, OptiChamber Advantage, coloring book, crayons, self-help booklet, instructional DVD, and a carrying case.

## AsthmaPACK children's asthma care kit

AsthmaPACK children's asthma care kit makes learning to manage asthma child's play. This just-for-kids kit makes learning fun with engaging cartoon characters and age-appropriate devices. An exciting feature of this kit is the interactive bilingual (English/Spanish) coloring and activity storybook, "Tucker Tackles Asthma."

# Nebulizers

## SideStream disposable nebulizer

The SideStream disposable nebulizer offers fast, efficient, and economical drug delivery. It provides consistent drug delivery time after time and can be used with all commonly prescribed respiratory medications. It can be used for two weeks before replacing.

Part number		HCPCS
HS800	SideStream disposable nebulizer, 50 per pk.	A7003

## SideStream reusable nebulizer

The SideStream reusable nebulizer provides maximum aerosol quality and respirable output for the delivery of most commonly prescribed medications. The unique venturi design offers faster drug delivery and shorter treatment times. It can be used for six months before replacing.

Fast treatment times – delivers 2.5 ml of drug output within seven minutes.

Highly efficient – 80 percent of drug output volume is below five microns in size.

Part number		HCPCS
HS860	SideStream reusable nebulizers, 10 per pk.	A7005

## SideStream Plus reusable nebulizer

The SideStream Plus breath-enhanced nebulizer features an easy-action inspiratory valve that opens on inspiration to boost medication delivery and closes on exhalation, preserving medication and reducing waste. Significantly less pressure is required to open the inspiratory valve compared to other breath-enhanced nebulizers, making treatments easier for pediatric and elderly patients. And its proven SideStream five-jet venturi design provides a high respirable fraction and shortens treatment times.

Part number		HCPCS
HS870	SideStream Plus breath-enhanced nebulizers, 10 per pk.	A7005

# Nebulizer kits

Part number		HCPCS
1028125	SideStream custom nebulizer kits, 25 per pk.	A7003 and A7004

*Includes two complete SideStream disposable nebulizers and two replacement nebulizer cups.*

## SideStream custom nebulizer kit

SideStream provides superior performance and faster treatment times (SideStream utilizes five aerosol-producing jet holes compared to a conventional nebulizer's one). The SideStream kit provides a two-month supply of product in every package.

# Masks

## SideStream masks

The SideStream mask is recommended for use with the SideStream high-efficiency nebulizers. The reusable mask is contoured to fit the face. The pediatric mask is recommended for ages five and under; the adult size for ages six and up.

Part number		HCPCS
1025529	SideStream pediatric masks, 50 per pk.	A7015
1025531	SideStream adult masks, 50 per pk.	A7015
1052521	SideStream Plus adult mask	A7015

## SideStream pediatric eye-safe masks

Sami the Seal and Tucker the Turtle child-friendly masks are designed to appeal to children and have been shown to reduce aerosol deposition in and around the eyes. Used with SideStream nebulizers, Sami and Tucker pediatric masks are made of soft, flexible material for comfort and fit.

Part number		HCPCS
HS880	Sami the Seal pediatric mask	A7015
1044382	Tucker the Turtle pediatric mask	A7015

# Ventilation accessories

Part number		HCPCS
HS8001	SideStream tee adapter kit	A7003

## SideStream tee adapter kit

A complete SideStream disposable nebulizer with mouthpiece and tubing packaged with a tee adapter for use in a ventilator circuit.

Part number	
HS762-010	OptiVent, 10 per pk.
HS763-020	OptiVent with 15mm adapters, 20 per pk.

## OptiVent MDI in-line spacer

The OptiVent MDI in-line spacer is designed to optimize drug delivery and reduce fluid accumulation. Convenient and easy to use, it does not need to be expanded when used with a ventilator circuit.

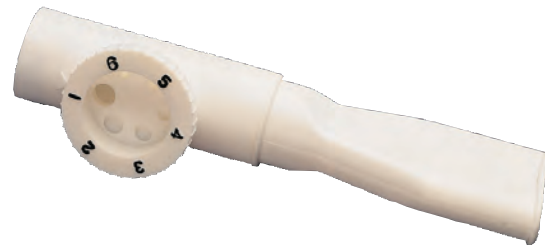

# Inspiratory muscle trainers

## PfFlex IMT

PfFlex is a highly-effective inspiratory muscle trainer designed to increase respiratory muscle strength. The PfFlex trainer is based on the principle of resistance to intake of air into the lungs which makes respiratory muscles work harder. Resistance is controlled by six fixed orifice settings.

Part number		HCPCS
HS553-010	PfFlex IMT, 10 per pk.	E1399

## Threshold IMT

Provides consistent and specific pressure for inspiratory muscle strength and endurance training, regardless of how quickly or slowly patients breathe. This device incorporates a flow-independent, one-way valve to ensure consistent resistance and features an adjustable specific pressure setting (in cm H<sub>2</sub>O) to be set by a healthcare professional. When patients inhale through Threshold IMT, a spring-loaded valve provides resistance that exercises respiratory muscles through conditioning.

Part number		HCPCS
HS730-010	Threshold IMT, 10 per pk.	E1399

## Threshold PEP

Threshold PEP is used for airway clearance, bronchial hygiene, or as an alternative to chest physical therapy. Threshold PEP incorporates a flow-independent, one-way valve to ensure consistent resistance with adjustable specific pressure settings (in cm H<sub>2</sub>O) which are set by the healthcare professional. When patients exhale through Threshold PEP, the resistive load creates positive pressure that helps open the airways and allows mucus to be expelled during "huff" coughing (forced expiratory technique).

Part number		HCPCS
HS735-010	Threshold PEP, 10 per pk.	E1399

Sensors and replacement components	
P1837	zRIP adult sensor kit
P1379	Oral thermistor
927	SpO <sub>2</sub> extension cable, 3', Nonin
936	SpO <sub>2</sub> finger clip sensor
953	SpO <sub>2</sub> flex sensor
954A	Adult flexwrap, disposable, 25 per pk. <i>For use with 953 sensor.</i>
P1806	zRIP effort sensor, adult single belt
P1170	zRIP wireset
P1388	Thermistor, airflow, nasal oral, adult, sensor
P1328-60	Pro-Flow nasal cannula, adult, 16", 60 per case
P1343	Pro-Flow Plus nasal oral cannula, adult, 16", 30 per case
P1391	CPAP titration kit
1053279	Battery door
1053280	Holster
1043937	Carrying case
1070430	Secure digital card, 1GB, 2 per pk.
1053194	Lanyard
1047300	SD card reader
1062051	Nonin finger soft sensor, small
1062050	Nonin finger soft sensor, medium
1062049	Nonin finger soft sensor, large
1065281	Surgical tape, 10 yds, 12 rolls per pk.

Part number	
Optional ECG expansion yoke	
1040809	ECG yoke <i>Includes five adult ECG electrodes and sleepware analysis.</i>
1041199	ECG lead set 5-wire, 30" (pictured)
1016360	Adult ECG electrodes, 5 per pk.
Optional ExG expansion yoke	
1040808	ExG yoke, Alice PDx <i>Includes 48" and 72" leads and sleepware analysis.</i>
1020971	EEG/EMG/EOG leads, 48", 10 per pk. (pictured)
1016339	EEG/EMG/EOG leads, 72", 10 per pk.
<b>Pro-Tech sensors</b>	
Airflow sensors, cannulas	
Pro-Flow nasal cannulas	
P1259	Pro-Flow, adult, 60 per case (pictured)
P1301	Pro-Flow, adult, 10 per pk.
P1306	Pro-Flow, adult, 8.25", 60 per case
P1309	Pro-Flow, adult, 8.25", 5 per pk.
P1317-20	Pro-Flow, adult, 1.1M, 20 per case
P1328-60	Pro-Flow, adult, 16", 60 per case (pictured)
P1390	Pro-Flow, adult, 16", 5 per pk.
P1263	Pro-Flow, pediatric, 60 per case
P1302	Pro-Flow, pediatric, 10 per pk.
P1330	Pro-Flow, pediatric, 8.25", 60 per case
P1331	Pro-Flow, pediatric, 8.25", 10 per pk.
P1321-20	Pro-Flow, pediatric, 1.1M, 20 per case
P1381	Pro-Flow, pediatric, 16", 60 per case
P1267	Pro-Flow, pediatric small, 60 per case
P1303	Pro-Flow, pediatric small, 10 per pk.
P1323-20	Pro-Flow, pediatric small, 1.1M, 20 per case
P1258	Pro-Flow sample pack <i>Includes two Pro-Flow adult and two Pro-Flow Plus adult cannulas.</i>

Part number	
Body position sensors	
P1658	SPI Lite kit <i>Includes an SPI resistive, SPI lite module, and an SPI Lite cable 1.5mV output.</i>
P1663	SPI Lite module
P1664	SPI sensor, DC with 3.5mm mono connector, SPI DC
P1664-WS2074	SPI sensor, DC with 1.5mm safety connector, SPI DC 1.5mm
P1676	SPI resistive Flaga
P1677	SPI resistive kit Flaga <i>Includes a velcro strap adult 1.5" kit, SPI resistive Flaga, and two Looplock acetal 1.5" black.</i>
P1692	SPI sensor with 200 connector, Bio-logic
P1694	Body position sensor, Alice 5 (pictured)
P1695	SPI DC, Suzanne
P1706	Body position sensor, Alice 3
P1707	Body position sensor, Alice 3, Alice 4
P1719	Body position sensor, Sandman SD20
P1737	Body position sensor, resistive T2, Bio-logic
P1744	Body position sensor, Sandman Pocket
P1746	Body position sensor, DC with 3.5mm connector
Periodic limb movement (PLM)	
P1697	Piezo PLM sensor
P1698	Piezo PLM sensor kit (pictured) <i>Includes a PLM sensor, velcro strap PLM large, and a velcro strap PLM small.</i>
P1699	Piezo PLM kit <i>Includes two PLM sensors, two velcro straps PLM large, two velcro straps PLM small, and a safety male jumper wireset.</i>
P1097	Jumper wireset, 1.5mm
P1690	Velcro strap PLM, small
P1689	Velcro strap PLM, large

Part number	
Snore sensors and microphones	
P1696	Piezo snore (pictured)
P1703	Snore microphone, Alice 3
P1704	Snore microphone, Alice 4
P1705	Snore microphone, triaxial lemo
P1716	Snore microphone (pictured)
P1718	Snore sensor, Embletta
P1742	Snore microphone, Pocket
Sensor testers	
P1711	ST-3 Kit <i>Includes a continuity test wireset and a ST-3 sensor tester.</i>
P1722	ST-3 Alice kit (pictured) <i>Includes a ST-3 Alice and a continuity test wireset.</i>
P1315	Continuity test wireset, ST-3
Pocket accessories	
P1740	VelcroStrap armband low
P1741	VelcroStrap armband op
P1156	Wireset ECG
P1157	Wireset ground
Sensors	
ECG/EEG/EMG	
1016360	Adult repositionable ECG electrodes, 5 per pk.
1016361	Infant soft cloth ECG electrodes, 3 per pk.
1016364	ECG lead set, 4 wire, 72" (pictured)
3262	ECG lead set, 3 wire, 72"
1020971	EEG/EMG/EOG leads, 48", 10 per pk.
1016339	EEG/EMG/EOG leads, 72", 10 per pk.
1020972	EEG/EMG/EOG leads, 96", 10 per pk.
1020970	EEG/EMG/EOG leads, 120", 10 per pk.
3280	EEG lead set, gold cup 1.5mm socket, 72"
3281	EEG lead set, gold cup 1.5mm socket, 108"
8050	EEG electrodes, 48", 10 per pk. (pictured)
8050-96	EEG electrodes, 96", 10 per pk.
8179	Reference electrode jumper cable
8051	EEG electrode cream
8052	EEG electrode prep

## Improved patient care is now automatic

The new **BiPAP AVAPS noninvasive homecare ventilator** automatically delivers optimal therapy even as patient needs change. With the exclusive AVAPS feature, Digital Auto-Trak leak-sensing technology, and Encore ventilation data management software, BiPAP AVAPS takes patient care to the next level.

This advanced technology comes together in a light, quiet, and easy-to-use device that simplifies patient care.

## How to be a hero to your sleep referrals and patients.

Rescue referrals (and yourself) from inefficiency. Help patients be compliant. And strengthen your relationships with sleep professionals with our new Web-based sleep patient management system – EncoreAnywhere. It's so easy to learn, your referrals can be up and running quickly – saving time and money, and improving patient care. Simply inspired by you. ## If the mask fits... it's likely our innovation.

At Philips Respironics our goal has always been to develop innovations that set the standard for patient fit and comfort. That's why we were the first to introduce revolutionary gel technology – available in the ComfortGel masks – that greatly enhances comfort, seal, and fit. Recently, our dedication has continued with innovations such as the EasyLife nasal mask, FullLife full-face mask, and FitLife total face mask.

To learn more about how we deliver on our promise to develop innovations that help improve the lives of patients with sleep apnea visit [www.philips.com/respironics](http://www.philips.com/respironics).

## Technology workshops

### A guide to interface selection and fit workshop

Approved by AARC and AAST 2 hours

This interactive workshop reviews the features and fitting procedures of various masks offered by Philips Respironics. Additionally, the workshop focuses on how to optimize patient compliance and therapy adherence while selecting a patient interface.

### Interface and therapy options overview

Approved by AARC and AAST 1 hour

This presentation focuses on how to optimize patient compliance and therapy adherence, while selecting a patient interface and PAP device. C-Flex and Bi-Flex technology are discussed as well as how humidification can impact interface and therapy adherence.

### Therapeutic options for patients with sleep disordered breathing

Approved by AARC, AAST, CCMC, and ASNA 1 hour

This program was developed to update respiratory therapists and sleep lab therapists on the various forms of therapy available for patients identified with OSA and CSA. Discussion includes prevalence and impact of sleep disordered breathing and reviews the various forms of therapy available for patients identified with OSA and CSA. Alternative forms of therapy are also reviewed.

## Care and management of OSA patients in the sleep center workshops

### Titration 102: identification of complex breathing patterns and titration with servo ventilation advanced

Approved by AARC and AAST 1.5 hours

This presentation focuses on the titration goals and identification of patients with complicated breathing patterns, such as central sleep apnea, complex sleep apnea, and periodic breathing. Participants learn how to properly identify these patients and implement a titration protocol with the BiPAP autoSV Advanced system to manage these patients in the sleep center. The presentation also discusses the use of Encore data to better manage these patients in the home environment.

### Titration 103: identification and treatment of nocturnal ventilation disorders vs. OSA

Approved by AARC and AAST 1.5 hours

This presentation focuses on the titration goals and identification of patients with nocturnal ventilation disorders, such as central sleep apnea, obesity hypoventilation, and hypoventilation due to neuromuscular or restrictive thoracic disorders. Participants will learn how to properly identify these patients and implement the appropriate titration protocol to better manage these patients in the sleep center. The presentation also discusses the use of Encore data to better manage the patient in the home environment.

## Disease management and public awareness workshops

### Central sleep apnea vs. complex apnea: how do they differ?

Approved by AARC and AAST 1 hour

This program was developed to educate respiratory therapists and sleep technologists about the difference between complex sleep apnea and central sleep apnea. Examples of idiopathic central apnea, complex sleep apnea, and Cheyne-Stokes respiration are discussed, along with their respective PSG findings. Treatment suggestions and use of various PAP modalities for these forms of sleep apnea will be reviewed.

### The link between sleep apnea and co-morbid conditions: CVD and type II diabetes

Approved by AARC, AAST, CCMC, and ASNA 1.5 hours

This workshop reviews the impact of sleep disordered breathing on common co-morbidities: cardiovascular disease and type II diabetes. Participants discuss the association between OSA and these co-morbidities, current trends, and relevant clinical data. Additionally, ways to improve medical management of patients with type II diabetes or CVD who also suffer from OSA are discussed.

### The ABCs of OSA: an overview of obstructive sleep apnea

Approved by AARC, AAST, CCMC, and ASNA 1 hour

This workshop provides a broad overview of OSA, including its prevalence, pathology, health consequences, economic impact, diagnosis, treatment, and long-term management of the disease. This presentation also discusses the link between OSA and associated co-morbidities, such as CHF, atrial fibrillation, hypertension, and type II diabetes. Issues with pain management, anesthesia, and bariatric surgery are also discussed.

## Home respiratory and care of the patient with pulmonary disease workshops

### Clearing the air on secretion management

Approved by AARC and ASNA 1 hour

Being able to maintain a clear airway is vital to patients who suffer from chronic conditions affecting the respiratory system. This presentation explores the differences between mobilizing and clearing bronchial secretions and provides practical guidance in choosing the most appropriate therapy.

### Portable home oxygen equipment: matching the patient to the proper device

Approved by AARC 1 hour

This workshop is aimed at increasing the knowledge of practitioners working with home oxygen patients who require portable oxygen equipment. The session covers methods of matching portable oxygen equipment to patient needs with emphasis on the various types of equipment currently available. Finally, issues faced by patients when traveling are addressed.

### Noninvasive ventilation in the home

Approved by AARC and ASNA 1 hour

This workshop focuses on the treatment of chronic respiratory insufficiency with noninvasive ventilation in the home. During this presentation, current trends, clinical criteria, and applications for noninvasive ventilation in chronic respiratory insufficiency are explored.

### Pulmonary management of the neuromuscular patient

Approved by AARC, CCMC, and ASNA 1 hour

This workshop reviews the disease process of neuromuscular patients, particularly ALS and how it impacts the respiratory system while the patient is both awake and asleep. Additionally, the importance of maintaining a clear airway for patients who suffer from chronic conditions is discussed with practical guidance to participants in choosing the most appropriate therapy for airway clearance. Finally, the American Academy of Neurology guidelines for the care of the ALS patient are reviewed as well as management of the ALS patient throughout progression of the disease.

# Medical education

## Monographs

### Bi-level rescue program

Part number 1038429

Approved by AARC and AAST 1 hour

This self-directed monograph was developed to increase awareness of bi-level therapy as an option for patients who have failed traditional CPAP therapy. It highlights bi-level therapy use in OSA, bi-level rescue study results, implementation, protocol, monitoring compliance, options, and follow-up.

### Motivational enhancement therapy (MET)

Part number 1045805

Approved by AARC and AAST 1 hour

This self-directed monograph reviews Motivational Enhancement Therapy (MET) as it relates to improving adherence to Positive Airway Pressure (PAP) treatment in patients with OSA. It uses specific behavioral interventions and theories about behavior change to help patients make a commitment to, and become more active in, their treatment. You will learn how and when to intervene, key concepts and principles of the therapy, specific questions to ask, and how to address patients' questions for effective implementation.

### An introduction to sleep diagnostic equipment

Part number 1052673

Approved by AAST 3 hours

This self-directed monograph consists of three individual chapters that review the difference between various nasal pressure airflow systems, pulse transit time (PTT) and respiratory inductance plethysmography (RIP), as they relate to the diagnosis of sleep-disordered breathing.

## Monographs (continued)

### A guide to aerosol delivery devices for respiratory therapists

Part number 1044248

Approved by AARC 4 hours

This self-directed monograph reviews the use and application of aerosol drug delivery, the science behind aerosol drug delivery, and the various forms or methods used to deliver medications to the lungs, including SVN, MDI, DPI, and spacers. The course reviews various ways to educate patients on the correct use of their aerosol therapy devices and the criteria that may be used to help select the correct aerosol delivery devices for patients.

### Sleep disordered breathing and heart failure by American Association of Heart Failure Nurses

Part number 1034064

Approved by AAHFN 1 hour

To support the growing awareness about the impact of sleep-disordered breathing in the heart failure population, Philips Respironics, in conjunction with the American Association of Heart Failure Nurses (AAHFN), has created a self-directed educational program that provides educational credits to nurses (RNs) if they successfully complete this educational monograph for one CE free of charge from the AAHFN.

## Sleep medicine and technology online workshops

### Titration 101 – how to titrate CPAP and bi-level therapy

Approved by AARC and AAST 1.5 hours

This presentation focuses on the titration goals for OSA airway management using C-Flex and Bi-Flex. The physiologic titration goals for OSA airway management are covered as well as the protocols and processes to be followed. The participants develop an understanding of how a proper titration can impact acceptance of therapy and outcomes. The rationale for CPAP and bi-level titration protocols are explained.

### Titration 102 – identification of complex breathing patterns and titration with servo ventilation

Approved by AARC and AAST 1.5 hours

This presentation focuses on the titration goals and identification of complicated breathing patterns, such as central sleep apnea, complex sleep apnea, and periodic breathing. The participants learn how to properly identify a patient with such a disorder and implement a titration protocol with the BiPAP autoSV to manage this patient in the sleep center. The presentation also covers the use of EncorePro data to better manage the patient in the home environment, as well as the sleep center.

### Data management, compliance monitoring, and interpretation of Encore reports

Approved by AAST and AARC 1.5 hours

This presentation focuses on using Encore reports to provide objective feedback in patient management of PAP therapy. Topics include what information is found in a basic Encore report and a review of various types of Encore reports, including how the data is determined and interpreted. Common questions that arise concerning Encore reports are answered.

## Hospital respiratory care online workshops

### Capnography: principles and application

Approved by AARC 1 hour

Capnography, the monitoring of ETCO<sub>2</sub> and the capnographic waveform is currently used in many areas of the hospital. Understanding the clinical application of CO<sub>2</sub> monitoring is important when utilizing this technology. This presentation will describe the various methods of CO<sub>2</sub> monitoring and the physiology of ventilation-perfusion relationships and describe the aspects of the normal capnogram, clinical interpretation of ETCO<sub>2</sub> values, analyzing the capnogram, and appropriate clinical interventions.

## Hospital respiratory care online workshops (continued)

### Respiratory monitoring: principles and clinical application of volumetric capnography

Approved by AARC 1 hour

This presentation is targeted to respiratory therapists and other clinicians interested in enhancing their knowledge of volumetric capnography. This presentation focuses on respiratory monitoring with particular reference to the principles and clinical applications of carbon dioxide elimination or VCO<sub>2</sub>.

### NPPV across the continuum of care

Approved by AARC 1 hour

In the past decade, the use of noninvasive positive pressure ventilation as an alternative to intubation and conventional ventilation has become a standard of care. Noninvasive ventilation helps reduce the need for endotracheal intubations, decreases complication rates, and improves patient outcomes. This continuing education program explores current trends and the clinical criteria for noninvasive ventilation in acute and chronic respiratory failure.

### Clinical application of ventilator waveforms and trending

Approved by AARC 1 hour

This presentation targets respiratory therapists and other clinicians interested in enhancing their knowledge of ventilator graphics and is designed to provide the learner with an introduction to ventilator graphics and the basic skills needed to interpret them. The first section examines the normal characteristics of ventilator waveforms and then reviews abnormal waveform patterns and discusses the clinical significance of each. The last section reviews the applications of trending patient data.

### Principles and application of the Cadence Self-Breathing System

Approved by AARC 1 hour

The Cadence Self-Breathing System is indicated for the management of patients that require prolonged mechanical ventilation. This presentation is targeted to respiratory therapists and other clinicians interested in enhancing their knowledge of the clinical application of this self-breathing system. This tutorial will provide an overview of system and circuit components, discuss appropriate patient selection, how to initiate a Cadence self-breathing trial, monitoring during the trial, and weaning.

Online workshops are currently available at <https://www.theonlinelearningcenter.com/>

## Improve your homecare know how

Philips Respironics **Know How Webinars** are a series of free live and on-demand webinars that help address key business and clinical issues faced by homecare providers and healthcare professionals. Know How Webinars are hosted by experts from Philips Respironics or leading clinical professionals such as doctors or therapists. Simply sign up to log in and learn. No special software is required. <http://knowhow.respironics.com>

## A drop-ship service for direct-to-you savings

SupplyDirect gives homecare providers a simple and customizable alternative to drop-ship OSA supplies to patients. This service will reduce the amount of time and money you spend on managing inventory. Available through an easy-to-use portal or convenient integration options. Simply inspired by you. [www.philips.com/respironics](http://www.philips.com/respironics)

**PHILIPS**

**RESPIRONICS**

sense and simplicity

## First Impressions program

The First Impressions program was developed to help sleep centers and homecare providers increase awareness and screening for OSA. The program includes modules for training your sales or marketing executives for the “total office call” when working with PCPs or other medical professionals to talk about OSA. In addition, there are support materials to help medical professionals implement the process of screening patients for OSA within the primary care office, cardiology office, or diabetes clinic, and why the treatment of this undiagnosed disorder can improve the patient quality of life.

## NIV Pathways program

NIV Pathways is a comprehensive set of tools that offers you proven solutions to a variety of patient management and marketing objectives. It will help you differentiate your services and make physicians aware of the advantages your company has to offer. With four separate modules that provide education and support, NIV Pathways will help you become the preferred provider of home respiratory therapy.

## Supply Replacement program

The Supply Replacement program is designed to engage your patients proactively regarding proper mask and accessory use and replacement to drive greater comfort and long-term patient compliance. The program is designed to help you achieve better set-up, management, tracking, and follow-up with patients to capture the revenue associated with ongoing mask and accessory replacement.

## SupplyDirect program

SupplyDirect is a convenient service for homecare provider customers; a direct-to-patient drop-ship program for replacement OSA supplies. The following can be shipped directly to your patients: masks, headgear, cushions, tubing, filters, chinstraps, and humidifier chambers. SupplyDirect orders are fulfilled by Respironics Logistics Services, a wholly owned subsidiary of Respironics, Inc.

## One-Touch Warranty Services program

Our One-Touch Warranty Services program provides a convenient method for product repair that reduces downtime with a shorter and simpler return process and fast turnaround. Now even better with our replace-with-new warranty for our new line of PR System One CPAP and BiPAP devices.

## Flex Family Promise program

Clinical evidence stands behind the Flex Family of pressure relief technologies. Homecare providers, sleep professionals, and patients stand behind it, and we stand behind the Flex Family, too. In fact, we'll make you a promise. If any patient is non-compliant on C-Flex, A-Flex, or our new C-Flex+, we'll credit the homecare provider 100% of the C-Flex or A-Flex unit purchase price toward the purchase of a bi-level OSA device with Bi-Flex. Some restrictions apply.

## 30-Day Mask Satisfaction Promise program

The goal of our masks is to help you fit “100% of your patients, 100% of the time.” The program takes our intent one step further – your patient will be satisfied with our mask or we'll replace it. If a patient discontinues use of a program-approved mask in favor of another mask during the first 30 days of use, we will replace the original mask at no charge.

## Sleep VIP program

The first step to lasting positive patient outcomes is to make a good first impression. That is why it is important to provide sleep labs with the products they need to successfully and comfortably titrate patients. The Sleep Ventilation Interface Purchasing (VIP) program is specifically designed to provide sleep labs and centers with the best Philips Respironics products and services available. Our VIP program features an affordable purchasing plan that enables you to titrate your patients using reliable and comfortable Comfort Series and My Life Series masks and accessories.

## Cognitive Behavioral Therapy for Insomnia (CBTI) program

This program provides sleep labs with a means to implement a behavioral sleep medicine program or enhance their current offerings without incurring the development cost and time of doing it themselves. Additionally, it enables them to implement an objective tool (Actiwatch) for therapeutic assessment as an adjunct to traditional, subjective diaries.

## Know How webinar program

The Philips Respironics Know How program is a series of live and on-demand webinars that helps address key business and clinical issues faced by homecare providers and healthcare professionals. Visit [www.knowhow.respironics.com](http://www.knowhow.respironics.com) to learn more and to register for the various sessions.

## Experience. It's as simple as that.

We wrote the book on using Gel technology in a therapy mask. Through more than 15 years of experience, we've delivered several generations of Gel masks to thousands of healthcare professionals and hundreds of thousands of their patients around the world. Take, for example, our best-selling ComfortGel nasal mask. It is a leader in the delivery of therapy to obstructive sleep apnea patients. Experience. It's what sets us – and the ComfortGel – apart and helps you to fit and satisfy 100% of your patients, 100% of the time. To learn more, contact your Philips Resprionics account manager or visit [www.philips.com/resprionics](http://www.philips.com/resprionics).
