Battery Lineup

ACDelco Professional & Advantage Batteries

ACDELCO batteries are designed and built for the roughest & toughest conditions, backed by an industry leading limited warranty. We're confident that you will find what you're looking for in our ACDelco professional Series & Advantage series battery line up.

Professional Series

Professional Gold

42-month Free Replacement Warranty

Professional AGM

36-month Free Replacement Warranty

Professional Silver

30-month Free Replacement Warranty

Advantage Series

Advantage

18-month Free Replacement Warranty

Heavy Duty & Commercial Series

We carry a full line of heavy duty group size batteries, from group 31's to 8D and 4D batteries.

18-month Free Replacement Warranty

Marine/RV, Lawn & Garden, Golf Cart

- Cranking & Deep Cycle Marine batteries for any applications
- Golf cart batteries available in 6, 8 & 12 volts

18-month Free replacement on Marine & Golf Cart batteries
12-month Free Replacement on Lawn & Garden Batteries

www.ArnoldOilCo.com

Tested Tough® AGM Batteries

ULTIMATE-QUALITY AUTOMOTIVE REPLACEMENT BATTERIES

- Excellent limited warranty* coverage - 100-month (8+ years) unlimited mileage
- 36-month (3-year) FREE replacement period

Tested Tough® Max Batteries

PREMIUM-QUALITY AUTOMOTIVE REPLACEMENT BATTERIES

- Excellent limited warranty* coverage - 100-month (8+ years) unlimited mileage
- 36-month (3-year) FREE replacement period
- Motorcraft® Tested Tough® MAX (BXT-Line) state-of-the-art technology

Tested Tough® Plus Batteries

HIGH-QUALITY AUTOMOTIVE REPLACEMENT BATTERIES

- Excellent limited warranty* coverage - 84-month (7-year) unlimited mileage
- 18-month FREE replacement period
- Computer-aided grid design provides top cold-cranking performance and helps maximize current flow

Hyper Sport Series— Powersports Battery

- Lithium Iron Phosphate (LiFePO4) is the safest type of lithium battery and ready to go replacement and upgrade from acid, AGM or gel.
- 4x lighter • 4x faster charge time • 4x longer life

Super Sport Series— SLA Sealed Maintenance Free AGM

- AGM Battery
- Higher cycle than conventional batteries
- Maintenance free (no need to refill)

Ps Series — General Purpose Sealed Lead Acid Battery

- PS series has been designed with AGM technology
- Engineered for use in general purpose float & light cycle applications including fire & security systems, emergency lighting, and deer feeders

Cold Cranking Amps (CCA) & Reserve Capacity (RC)

Are you choosing the right battery for your vehicle? Basing your decision solely on Cold Cranking Amps (CCA) is simply not enough for today's high-tech fitted vehicles. While CCA is important for starting engines, Reserve Capacity (RC) is doing the work when the engine is off and powering mobile devices or using in-vehicle Wi-Fi systems. Make sure you choose the battery with the right balance of RC and CCA for maximizing battery life.

CCA Vs. RC

CCA is the number of amps a battery can deliver for 30 Seconds at 0° F and maintain 7.2 volts. A high Cold Cranking Amp battery will have more and thinner plates. This design provides higher starting energy, but cannot withstand repeated high-depth discharges when powering accessories with the engine off, ultimately ending with the battery plates disintegrating.

RC is the number of minutes a new, fully charged battery at 80° F can be continuously discharged at 25 amps and maintain a terminal voltage ≥ 1.75 volts per cell. Simply put, it's the number of minutes a battery will last with the headlights left on.

Helpful Tip! A high Reserve Capacity battery will have fewer yet thicker plates to better withstand the stress of repeated high-depth discharge cycles.

Arnold Oil Company has been serving South Texas with premium lubricants & automotive parts over 80 years.
