Detailed Project Report (DPR)

Model Template for NHB Scheme No.2

Scheme.2	Capital Investment Subsidy Scheme For Construction/ Expansion/
	Modernization of Cold Storage for horticultural produce and products.

Nature of Project	Tick mark	
Construction (New) - Type-2		
chambers of < 250 MT		
Add on to- CA and	i) CA Generator	
Modernisation	ii) Specialized CA Doors	
	iii) CA Tents	
	iv) Progamme Logic Controller (PLC)	
	equipments	
v) Dock Levelers		
	vi) High Reach Material Handling	
	Equipment (MHE)	
vii) Advanced Grader		
	viii) Stacking System	
	-	

Submitted by		
 (Applicant) with full	l correspondence	Address

Detailed Project Report (DPR) will have to be signed by the applicant (s) / authorised person (in case of legal entity) on each page with date -along with Horticulture and Project Finance Expert wherever applicable.

1. About the Applicant / Promoter and his/her entrepreneurship

A. About Applicant / Promoter

1.1.In case of Individuals or Group of farmers (if applicable)	
Individual	
Name of Farmer / Entrepreneur/Individual/ Proprietor	
2. Parents or spouse name of Individual	
Group of Farmer growers / SHG- Promoters	
1. Name of Group	
2. Names of all members of group with their father, mother/husband/ wife name	
1.2.In case of Legal entity (if applicable)	
Name / Title	
1. Incorporation / Registration number / CIN & date of registration	
2. Act under which Registered	
3. Registering authority	
4. Name of CEO/CMD/MD/	
5. If it is FPO/ FPC/ Producers Co-op society / Growers Co-operative Marketing federation- Please specify	
6. If it is Reg. Society/ Company/ Corporation / Partnership firm / Proprietary	
firm- Please specify 7. Name of Promoter (s)	
8. Status of the promoter / applicant in the legal entity-please specify	
8. Status of the promoter / applicant in the legal entity-please specify	
9. Whether the promoter / applicant is authorised by the Legal entity- Yes/No	
10. In case of Company/partnership firms / legal person a. Certified copy of Company/Partnership incorporation/ registration certificate issued by Competent Authority, as applicable b. Certified copy of MoA/Bye Laws c. Certified copy of Board of Directors Resolution duly passed and authorizing signatory of application to apply for IPA d. Certified copy of latest Audit Report, if applicable i. (are to be made available in case the project and the	
application is considered for processing State Yes/No 11. NGO- Specify details including registration No.	

1.3.Government Institutions / G	Organisations—Please specify (if applicable)			
(i) Marketing Board / Agricu	ultural Produce Marketing Committee APMC			
(ii) Municipal Corporation				
(iii)PSU/ Agro-Industries Co	rporation			
(iv)ICAR/CAU/SAU/ Gover	nment R&D Institution			
1.4.Statutary registration	(for both promoter and legal entity based on applicability)			
a. PAN No				
b. Aadhaar No.	Yes/No			
c. Udyog Adhaar No.				
d. GST				
e. Passport No.				
f. Any other				
1.5.Correspondence Address	Postal Address with PIN code			
	Telephone			
	Mobile			
	Email id			
	Fax if any:			
1.6.Project / Site Address				
1.7.Social Category	General / SC/ST			
(In case of legal entity the	OBC			
CEO and Board of Directors	Minority			
social category is to be				
mentioned)	In case of SC/ST applicants a Certified copy of			
	Caste Certificate issued by Competent Authority			
	is to be enclosed. In case of others a self-			
	declaration is to be enclosed.			
1.8.Location: TSP / NE Region	In case of TSP a self-attested copy of notification			
/ Hilly States	is to be enclosed.			
1.9.Gender	Male / Female/Transgender			
1.10				
	(i)			

B. Applicant/ Promoters' Entrepreneurship:

- 1.10.CV / Biodata of Applicant (s) / Promoter (s) (Authorised by legal entity) in brief: (If applicants are more than one, all are to provide their CV / Biodata)
 - a. Name of Applicant/ Promoter:
 - b. Fathers & Mothers name:
 - c. Spouse Name
 - d. Date of Birth
 - e. Place of Birth (village/town/city, District and State)
 - f. Permanent Address:
 - g. Educational qualification (Higher Secondary, Under graduation Degree and above)

Education	Name of	Board /	Year of	Remarks
Metric/ U	education /	College /	Pass	
	specialisation	University/		
		Institute		

h. Horticulture and project proposal specific Trainings if any undergone

Training	Duration and Period	Institute with address	Purpose for undergoing training

- i. Current profession with details of Turn over, Accomplishments if any.
- j. Previous profession during the last 5 Years with details of Turn over, Accomplishments if any
- k. Experience- General and Horticulture & Cold storage
 - a. General (Other than Horticulture) specify the activity, establishment/ Office, location etc.
 - b. Horticulture-General: State specific activity- crop production, PHM etc. including project site, area, number of years, accomplishments etc.
 - c. Horticulture-Experience in proposed activity/ Cold Storage: provide the name of establishment/office, location, number of years, specialisation etc.
- 1. Any information that establishes the applicants' entrepreneurship (Should be able to enclose evidence during Market & Financial Viability stage and during JIT):

1.11. Registrations with any Government Agency if any

Government Agency	Provide registration No. details with date
	and location of registration
a. Warehouse Development &	
Regulatory Authority (WDRA	
b. MSME	
c. MSME/SSI	
d. Any other	

1.12.Commitment by the applicant: In case the project is approved for pre-IPA technical feasibility, the promoter / CEO/CMD and technical personnel (minimum two persons) should undergo a 2 Weeks (min.10 working days) project specific training programme as found appropriate / approved by NHB.

2.3.In case of a Partnership firm/ Company / Legal person

- a. Whether the proposed activity is covered under the objectives as per Memorandum of Association (MoA) & Rules explicitly: If so please provide the Article and Rule in verbatim.
- b. Professional history of Legal entities Farmers Producer Organisations (FPOs), Self Help Groups, Partnership/ Proprietary Firms, NGOs, Companies (as a Board of Director), Corporations, Cooperatives, Co-operative Marketing federations/ Government Institutions.
- c. Management structure if it is a company/ firm etc depicting the position of the applicant.

2.Details of benefits availed / **proposed to be availed by the applicant**- either individually or as a member of Association of growers, Group of Farmer Growers/consumers, Farmers Producer Organisations (FPOs), Self Help Groups, Partnership/ Proprietary Firms, NGOs, Companies (as a Board of Director), Corporations, Cooperatives, Co-operative Marketing federations from (i) NHB and (ii) other Ministries/ organisations of Central Government and (iii) State Governments including NHM for Horticulture related projects.

Note: The beneficiary should be truthful. In case any information is received later on at any stage about his/her availing of benefit which is not disclosed hereunder will entitle NHB to reject the current proposal and recover the funds if already released.

2.1.In this / proposed project and location:

- 1. Whether the proposed project proposal has been submitted for consideration under any State Government or Central Government Scheme for financial grant? If yes give details.
- 2. Whether any subsidy has been availed from the Board, other Central Govt. organisation or State Government for the same activity on the same piece of land, khasra/ Gat/Dag/ etc either in his / her own name individually or in the name of his/her family members or through any legal entity in which he/she is the beneficiary either in the same location, project. Yes/ No. If Yes, Please provide details

						Closed)				

^{*} in case of completed projects and where proposals envisioning expansion/ modernisation are proposed, Annual Reports and Audited Statement of Accounts of the last 3 years are to be made available along with Bank appraisal during Market and Financial Viability stage both online and offline.

^{2.4.}Please provide map of earlier / other subjects and this project- Key map of project land showing project details and land boundary details

2.5. Provide the following details:

- a. Have you ever been refused / denied subsidy claim from NHB, NHM, APEDA, NCDC, MoFPI? If Yes please provide details of (i) Project code, (ii) Name of Applicant, (iii) Address (iv) Project activity etc. and the reason for such refusal / denial:
- b. If you were a recipient of Government subsidy, have you / your Bank/FI ever been asked to refund the subsidy / call back? If Yes please provide details of (i) Project code, (ii) Name of Applicant, (iii) Address (iv) Project activity etc. and the reason for such refusal / denial:

Attention:

1. In case the project application is considered for Pre-IPA, the applicant shall have to enclose No Objection Certificate from State Government / State Horticulture Mission that there is no duplication of funding for the project and the applicant shall also submit self-declaration that he/she is not availing government subsidy / grant / assistance from any other ministry.

1. About the Project, Rationale, Management and Description:

4.1. About the Project

	•	
1.	Name of the Project

4.17. Facilities, External Infrastructure and Utilities

(Power, Fuel, Water, Plant and Machinery, Effluents treatment etc.)- Required, Already available, Gaps and the management.

Utility	Requirement	Remarks
Power	Likely Daily power requirement	
	Likely Annual Power requirement	
	Proposed Source of Power	
	Access to Power is assured or not	
	Alternative Source of Power in case of	
	breakdowns	
	Whether renewable alternate energy to power is under consideration	
Water	Source – Ground Water /Surface Water	
	Existing or New source	
	Whether NOC has been taken from CGWB / State Government Ground water regulation authority-	Yes/No
	Water measurement systems is planned	
	Daily Water requirement	
	Whether water harvesting is planned	Yes/No
	Water productivity parameters proposed if any	
	Quantity of effluents likely	/N.I.
	Water treatment plant if any proposed	Yes/No
Fuel	Access to fuel to power- Generators- Yes/No	
	Nearest fuel depot	
Effluent	Facility and method adopted for effluent	
treatment	treatment.	
Market		
connectivity		

10.16. SWOT Analysis

1	Strengths	
2	Weaknesses	
3	Opportunities	
4	Threats	

MARKET VIABILITY

1.Raw material commodities and their characteristics

S.No	Name of Commodity	Characteristics		
	proposed to be stored			
		Physical	Biological	Chemical

Horticulture produce are special as they respire even after harvest.

For single commodity storage

- 1) Harvesting time (morning/evening hours when temperature is low) and pre cooling requirement of product
- 2) Minimize mechanical injury during harvest/handling prior to storage
- 3) Requirement of operations like desapping in case of mango
- 4) Climacteric or non-climacteric nature of produce
- 5) Requirement of blanching (to inactivate enzymes in case of frozen peas)
- 6) Temperature and humidity ranges for safe storage of produce
- 7) Chilling injury temperature ranges

For Multi commodity storage

In addition to above factors of single commodity, following considerations are needed

1) The commodities mix should be such that there is match of temperature and humidity, levels of ethylene production and sensitivity for all commodities

Examples of ethylene producing and ethylene sensitive products:

- Ethylene producing: e.g. apples, avocado, bananas, pears, peaches, plums, tomatoes
- Ethylene sensitive produce: e.g. lettuce, cucumbers, carrots, potatoes, sweet potatoes
- 2) Odour transfer should be avoided by proper selection of compatible produce

Examples of odor transfers which should be avoided:

- apples/pears with celery, cabbage, carrots, potatoes or onions
- celery with onions or carrots
- citrus with strongly scented vegetables
- pears/apples with potatoes à former acquire unpleasant taste
- green pepper will taint pineapples
- onions, nuts, citrus, potatoes should be stored separately

2. Raw Material Availability

(Not to exceed 100 Km radius in production areas)

State	District	Approximate Area	Distance from Proposed Site	Major Crops Available

^{*:} Catchment area should be either Sub-Division/ Block/ Taluk etc.

In exceptional cases the radius can be beyond 100 Km to be satisfied upon physical verification.

2.2. Map of Catchment Area

1.2. Production of targeted horticulture crops in the state

Viability of Cold Storage / Infrastructure:

Commodities proposed for Storage:

Commodity / Crop	Variety / Hybrid	Share of commodity	Availability of Protocols	Source of Protocol (R&D Institution/ Company)

1.3. Target Market- As per applicability

Domestic or International. In case of International market, the applicant has to refer APEDA export requirements and should specify compliance appropriately with in the document. In case of domestic market specify the intended market

- 1. Quality grades/ specifications/ kinds of products and their targeted Domestic/ International market.
- 2. Existing / Proposed Market linkages:
- 3. MOUs/ Contract documents / undertakings/ LoA if any
- 4. Target consumption centres/ key domestic markets
- 5. Export targets/ Plans if any
- 6. In case of export, details of volume to be exported / export destination / statutory norms of export destination should be provided in the DPR.

1.4. Market Competition

Major cold storages available in the cluster with respective capacities.

Availability of Storage facilities in the **Project area** (Please attach the list)- For the latest 3 years.

Data Sheet for Cold Storage Type 2 - with CA Cold Stores

i. Product specific details

Details	Standard Parameters	Proposed by Promoters	Deviation if Any
Name of Produce	Apples		
Temp. Zone	0 to 1 °C;		
Relative Humidity	90-95%		
CO ₂ & O ₂ Level (As per WFLO Commodity storage manual)	CO ₂ = 2% O ₂ = 0.7-2%		
Freezing Point Temperature (°C)	(-) 1.7		
Specific Heat in KJ/Kg	3.81		
Respiration Rate during Loading / Pull down at 15°C in mW/kg	40.3-91.7		
Respiration Rate during Holding/ Storage at 0°C mW/ kg	6.8-12.1		
Air Circulation Rate (CMH)	 a) 165 CMH / MT storage capacity of Chamber during loading and pull down. b) 33-66 CMH/ MT min. during storage/ holding 		

ii. Chamber Sizing and information

Details	Chambers-	Chamber - 2	Chamber- 3	Chamber-4	Chamber- 5	Chamber- 6	Chamber- 7	Chamber- 8
Product Types								
Storage Conditions								
a) Temperature – °C	0 to 2°C	0 to 2°C	0 to 2°C	0 to 2 ⁰ C	0 to 2°C	0 to 2°C	0 to 2°C	0 to 2°C
b) Relative Humidity %	90-95%	90-95%	90-95%	90-95%	90-95%	90-95%	90-95%	90-95%
Dimension of CS chambers in each (L X W X H) m								
Storage Capacity of each chamber (Cubic Meters)								
Storage Unit used (Big Bins, , Crates,								

etc.) Stacking System Used (Over stack bins/ Racking/ others)				
Total Heat load calculated per chamber group (kW)				
Total Refrigeration capacity per chamber (KW)				

iii. Enclosed Ante Room & Handling Area

Details	Standard Parameters	Proposed by	promoters	Deviation if any
Ante Room / Handling Area (L x W x H) - m	With fork lift width ≥ 4.5m and temperature ≤ 20° C	Informatio n	Temp. ⁰ C	
Refrigeration Load (KW)	Per Chamber group		1	
Number of access Doors	Atleast ≥ 1. Provide door numbers and dimension. If operation by Fork lift , the door dimension shall be 2400 mm (W) x 3000 mm (H)			
Dock Leveler System	Provide details of protected loading, unloading platform details. Minimum quantity ≥ 1 and dimensions of the dock shelter may be3400 mm (W) x 3500 mm (H) and overhead door size 2200 mm (W) x 3000 m (H).			

iv. Facility Covered Areas

Particulars	Standard Parameters	Proposed by I	Promoters	Deviation if any
CA Cold Storage Area and Height	Height 8 m to ≤ 12 m. Area would depend upon	Area (m²)		
	proposed storage capacity of Chamber and may be calculated = Storage capacity(MT)/ 3.4	Height (m)		
Ante Room – Area		Area (m²)		

and Height		Height (m)	
Process Area for Sorting and grading facility		Area (m²)	
including height		Height (m))	
Machine Room area and height	Height ≥ 4.6 m	Area (m²)	
		Height (m))	
Generator room area and height	Height ≥ 4.6 m	Area (m²)	
		Height (m))	
Admin Block area and height	Height ≥ 3.6 m	Area (m²)	
		Height (m))	

v. Building & Constructional Details

Details	Standard Parameters	Proposed by promoters	Deviation if any
Type of Building Construction (Load bearing construction)	Promoter to Specify whether building construction is RCC civilOR PEB with insulated panels		
External walls / Internal walls/ partition walls of cold store chambers	Promoter to Specify whether walls are constructed with civil works and Preinsulated panels are used.	External Walls Internal Walls Partition Walls	
Roof / Ceiling construction	Promoter to describe external roof construction and Pre- insulated panels are used.		

Lighting Fixtures in cold chambers	Fluorescent /CFL / LED lights with IP-65 fixtures		
External/Compound Area	Promoter to specify construction details of external and compound area including provision	External/ Compound Area details	
	of parking area	Parking area details

Standard Parameters	 a) CA Door opening size if operation with fork lift: Minimum 2400 mm (W) x 3000 mm (H) x 100 mm thick and manually operated sliding type. Each door shall be provided with a hatch window of size 600 mm (W) x 750 mm (H) to allow for entry for checking of fruit quality during storage and making repairs without opening the main door. The doors sealing type shall inflated type gasket / gasket with food grade Neoprene rubber? Minimum U- value of insulation shall be 0.23 W/m² K. The door frame shall be solid which can be clamped tightly against the gasketed door. b) Ante Room Door opening size if operation with fork lift: Minimum 2400 mm (W) x 3000 mm (H) x 100 mm thick and manually operated sliding type. The doors sealing type shall be gasket with food grade Neoprene rubber. The U-

Type of Evaporators/ Air Cooler	a) Ceiling Suspended/Wall mounted typewith SS-304 Coil & aluminum fin with fin spacing 6.25 -8.5 mm and axial fan preferably blowing fans with air throw as per chamber size, unit casing-GS sheet for Ammonia application with VFD. b) The coil design temperature: Glycol in/ out = (-) 7°C/ (-)4°C	
Type of Defrosting	Electric / Hot Gas /Air/ Water/	
Humidification System & Control	With low TD Evaporating Coil only.	

Note:

As per Montreal and Kyoto protocol; Global steps have been taken in reducing the depletion of the ozone layer and the CO_2 emission. Many countries in the world agreed in reduction of synthetic coolants like HCFC, HFC specific those with a high level of GWP (Global Warmth Potential) including India. In the Montreal and Kyoto protocol, it has agreed to phase out use of HCFC and HFC refrigerant by 2030. Therefore, HCFC and HFC refrigerant based refrigeration system not included here.

Refrigeration Equipment Details

xii. Compressor /Rack Detail

Compressor/Racks	Standard Parameters	Proposed by Promoters	Deviation if any
Quantity	3 No. each of 50% capacity (2 Working during Loading/ Pull down and one preferred as standby) in case of ammonia.		
Make & Model			
RPM			
Operating Parameters	-11° C SST / 38° C DST		
Refrigeration Capacity at -11° C SST / 38° C DST			
Power consumption in BkW -11 ⁰ C SST / 38 ⁰ C DST			
Total Connected Motor			

(KW)		
Remarks/Standby		

xiii. Condenser Details

(Air / Water cooled condenser with recommended parameters)

- a) For Atmospheric: Consider 20 -21 KW heat rejections / stand of 6 m Long and 12 nos. 50 NB pipe i.e. 72 m long pipe / stand ,
- b) Consider water circulation @ 6 LPS / 100 KW of heat rejection

Condenser Type, Make & Model	Qty.	Operating Parameters Condensing Temp. (CT) WBT, water in/out Temp (°C)	Condenser Heat Rejection Capacity (kW)	Electric Fan/Pump Motor Rating (kW)	Total Electric Power (kW)	Remarks Working/Standby

xiv. Cooling Tower Details (if applicable) (Recommended FRP Type)

1.Add on equipment for CA and Refrigeration Plant

A. Component : CA Generator

S. Nos.	Component: CA Generator	Recommended Parameters	Proposed by Promoter	Deviations if any
A.		With 1% residual Oxygen		
1	Make and Model number	Standard make		
2	Туре	PSA / VPSA		
3	Capacity of each Generator (m3/hour)	The capacity of the nitrogen generator is a function of size of the store (m³) and number of stores and the time during which the pull-down (oxygen reduction) must occur.		
4	Total volume of chamber (m3)	Specify total Volume of all CA Chamber in m ³ .		
5	Free Volume (m3)	Product normally occupies 80%		

			,	
		space. Hence free volume of chamber = Approx. 20% of the chamber volume,		
6	Pull down time (hours)			
7	Nitrogen Buffer Tank capacity	A limited amount of nitrogen can be stored under pressure so that nitrogen is immediately available on demand. The capacity could be ≥ 500 Liters		
8	Capacity of breather Bags	volume 3 m3 for a store volume up to 450 m3 is sufficient		
9	Power Consumption (kW)			
В.	CO₂ Absorber	At 3%		
10	Make and Model Number.	Standard Make and model		
11	Product Stored	Apple		
12	Capacity of Absorber (kg)	 a) Normally CO₂ production /100 MT Apples / 24 hrs. is approx 25 Kg. b) Therefore, total CO2 production will be 25 kg x total CA storage capacity in MT/ 100. 		
13	Pull down time (hours)	24 hours		
14	Power Consumption			
	(kW)			
_	Control Valves			
C.	PLC Control System for CA	PLC controlled Computerized ACS (Atmosphere control system) wherein only need input data / desired target values are fed and the system measures, checks, regulates and maintains chosen atmosphere. Every cold store has its own measuring hose which is connected directly to the ACS.		
D.	Sensors and Analyzer	Hand held analyzer for O ₂ & CO ₂ should also be provided Also temperaturesensors in all CA Chambers shall be provided at five location (near corners and one in the center)		
E.	Safety O2 monitors	Minimum 3 Nos. per facility is necessary to alert operating staff against low oxygen conditions,		
F.	Gas tight Fittings	Chambers must be perfectly gas tightened. The check is that after 30 minutes the initial pressure of 10 mmWG, it should not be reduced to < 3.4 mmWG.		
G.	Pressure relief valve	Each Chamber for CA must be		
-				-

(PRV)	provided with PRV.	

B. Component : Specialized CA Doors

S.Nos	Component :	Recommended	Offered by promoter	Deviation if any
•	CA Door	Parameters

6.2 Automation Services if any

1) Measurement Systems

	Parameter	Instrument	Frequency of	Remarks
			reporting	
1.	Air Temperature			
2.	Relative Humidity			
3.	Co2			
4.	Ammonia			
5.	Freon			
6.	Ethylene			
7.	Oxygen			
8.	Pathogens			
9.	Fire & Smoke detection			
	System			

2) SMS & Email Alerts: The Authorized person of company will receive on instant SMS and Email alert whenever there is movement of stock in our cold storage.

3) Online Stock details

- **4) Air monitoring SMS:** The authorized person in your company will receive a daily SMS on temperature and relative humidity at regular intervals.
- **5) Online Air Monitoring System:** The authorized person in the company can view online temperature and relative humidity of each chamber.
- **6) Monthly Inventory report:** The authorized person in the company shall receive product wise monthly inventory report.
- 7) Monthly Air monitoring Data logger sheet: The authorized person in the company shall get temperature recording info of every hour 24X7 for that month.
- 8) Phone aap- Growers & clients have the privilege to check the temperature and Rh in the storage of their stock at the press of a button in their phone.
- 9) Inventory Day report:- System generated day report across all location in one mail is sent to the clients.

- **10) Weekly Inventory report:** The authorized person in the company shall receive weekly inventory report.
- **11) Weekly Space monitoring report:** The authorized person in the company will get space utilization report in which client get an idea about total allotted space, utilized space & how much is vacant space.

7. Food Safety

(Includes GMP, HACCP, Allergen, Sanitation, Product Tracking and Recall Preparedness Programs etc.)

7.1. Quality Assurance Plan

- Quality factors for fresh fruit and vegetables are defined by hygiene and quarantine factors(e.g. parasites larvae, pupae, natural toxicants, contaminants, spray residues, heavy metals etc.), Cosmetic appearance: size, weight, volume, dimensions, shape, regularity, surface texture, smoothness, waxiness, gloss, colour, uniformity, intensity, spectral, physical defects, (splits, cuts, dents, bruises), texture (firmness, hardness/softness, crispness, mealiness-grittiness, fibrousness toughness), flavour factors (sweetness, sourness, astringency, bitterness, aroma, off-flavours, off-odours) and nutritional (dietary fibre, cancer inhibitors, carbohydrates, proteins, lipids, vitamins, minerals).
- Pre-storage treatments
- Sorting/ grading
- Washing/ Disinfection
- Fungicide or other treatments (physical or chemical)
- For fruits and vegetables quality two parameters should be monitored carefully (i) Chemical (pesticides, toxins and contaminants such as lead, cadmium, nitrate, etc.) residue and (ii) Micro biological infection.

S. No.	Name of	Chemical residue test		Micro	biological	test FOR

			contaminants)			
			(µg/kg)			
1	_					·
2	_					·

- Quality of produce: It is good to know the history of produce such as product maturity, prior goods preparation, previous quality inspections like colour, firmness and taste and produce grading. Produce must be tested for chemical residues, nutritional factors and microbial load before storing. Before storing and when rotating stock, it is important to remove rotting fruit from cases as one piece can affect others. The chain reaction can quickly destroy the quality of a whole case of fruit.
- Stock control: All the produce must be checked for proper packaging on delivery. Tightly packed pallets should also be avoided as crushing can occur, leading to the development of bacterial growth. Packing should be such that there is enough room for the internal fan to distribute cool air freely inside the produce Other parameters like microbially spoiled and physically damaged produce must be segregated from the disease free and sound produce for proper shelf life extension of produce in cold stores.

- Audits and procedures: Clear procedures i.e Standard operating procedures (SOP's) must be prepared and kept in place to protect temperature sensitive products. All the factors like required temperature for each produce, pre-cooling before loading, and following food-grade inspection processes must be taken into account. All the SOP's must be precise and clearly understandable to all.
- Storage: Certification of cold storage facilities and equipment must be ensured. An independent third-party firm should regularly certify any facilities storing temperature-sensitive products to verify that they are clean and that their daily operations comply with the appropriate food safety requirements. Continuous temperature monitoring systems are available that can keep track of changes in refrigerated storage temperatures, providing alerts to employees whenever something is wrong. Advance warning is a good option to fix the things before problems occur. Thermometers should be properly calibrated for cross-checking the cold store temperature and produce temperature.
- Self-audits: Self-audits must be conducted monthly to verify employee training and practices, to ensure compliance of food industry requirement for pest control, warehouse sanitation, temperature control monitoring etc.

- Quality Assurance Plan components:
 - 1. Quality Objective
 - 2. Management reviews
 - 3. Standards and Guidelines being followed
 - 4. Risk Managements
 - 5. Supplier control
 - 6. Audits and Corrective Action
 - 7. Quality Records
 - 8. Training

7.2. Quality Certification

- HACCP
- ISO 22000
- ISO 9001

7.3. SPS (Sanitary & Phyto Sanitary) Protocol

- Site history and site management
- Propagation material
- Soil management
- Irrigation and fertigation

- Harvesting
- Produce handling
- Workers health and safety
 Waste and pollution management
- Record keeping and internal self assessment/inspection
- Product Criteria
- Quarantine System
- Sampling & Methods of risk assessment
- Packaging & Labelling requirement

7.4. Sanitation, Hygiene and Safety

- Safe cleaning and maintenance: All the shelves and walls of cold stores must be properly clean and in good condition. The cleaning chemicals must be documented, used and stored properly. All the lightning and ventilation aspects must be covered properly. At leat once in a year the entire cold stores should be fumigated with safe chemicals for avoiding any risk of microbiological contamination. Surrounding areas should also be checked regularly for cleanliness. Cleaning schedule and methods for cold stores be properly documented. Any signs of pests like mice and flies should be checked and taken care of.
- Personnel Hygiene: All the personnel staff dealing with cold stores should be properly trained for personal hygiene like proper hand washing. Hot water, soap, paper towels and pedal bins should be present at every wash basin.
- Use of Approved Cleaning & Sanitizing Agents
- Use of Protective Personnel Equipment's
- Separate & Segregated storage of Chemicals

7.5 Cold Storage Sanitation

- Cleaning Procedure
- Cleaning Schedule
- Monitoring & Measuring Effectiveness
- Record Keeping

7.6 Waste Management System

- Segregation of Waste as Hazardous & Non-Hazardous
- Separate Bins
- Waste Removal

7.7. Safety of Personnel

- Use of Personal Protective Equipment
- Safe Handling of Products

7.8 Training of Cold Storage Operators

- FoSTaC Training
- HACCP/GMP/GHP/GWP Training & Evaluation

7.9 Statutory requirements

8. Traceability

All traceable items must be uniquely identified and this information is shared between all affected supply chain partners. A traceable item can be: a product or traded item (e.g. case/carton, consumer item), a logistics unit (e.g. bin, container) and a shipment or movement of a product or trade item. , the identification of products for the purpose of traceability requires: i) The assignment of a unique GS1 Global Trade Item Number (GTIN) ii) The assignment of a batch/lot number. When a product is reconfigured and/or re-packed, the new product must be assigned a new unique product identifier (i.e. GTIN). A linkage must be maintained between the new product and its original inputs. Following traceability information must be supplied:

- Logistic unit identifier
- Commodity name and, where applicable, variety name
- Trading partner/buying party
- Ship from location identification
- Ship to location identification
- Date of despatch/shipment
- Grower records details related to growing/production (e.g. field, seeds, details of production inputs)
- Backward & Forward Traceability of Product

Innovation (If Any)

12. List of documents to be submitted:

11.1.Declaration by Cold Storage Expert/ Mechanical Engineer

I have read and understood the latest NHB Schemes operational guidelines and made the applicant understand the same.

In case IPA is issued for the project, I am willing to guide the growers of catchment area for scientific crop husbandry and pre-and post-harvest practices for food safety. In such instance I will render my services.

The project is technically feasible and economically viable and is bankable.

Certified that the information/contents as above furnished by me/us in the application are true to the best of my/our knowledge & belief and nothing material has been concealed.

My details are as follows:

Name of Horticulturist		(Could be any working or retired faculty / scientist in					/ scientist in

Counter signature (with name) of Promoter / Authorised Signatory of Company with seal with date.

Self-Declaration by applicant

- 1. I have read, understood and abide by the latest NHB Schemes operational guidelines including conditions, norms and pattern of assistance.
- 2. The information provided in the Detail Project Report is true to my knowledge.
- 3. In case the details provided by me viz., (i) my personal details, land, previous benefits availed by me from either Central and State Government if proved false at any stage NHB is entitled to recover any subsidy if any released by it from me.
- 4. I have availed the services of a competent Mechanical Engineer, Horticulturist and Postharvest technologist and for technical details and viability. Accordingly declaration is provided herewith.
- 5. I have availed the services of a competent Project Finance expert for the requisite project finance details and project viability. Accordingly declaration is provided herewith.
- 6. In case the project is approved for pre-IPA: technical feasibility, I shall undergo a 2 Weeks (min.10 working days) training programme at my own expenses in one of the relevant institution as found appropriate / approved by NHB.
- 7. I shall adopt scientific storage practices, technology standards and maintain proper accounts and records.
- 8. The project is technically feasible and economically viable and is bankable.
- 9. In case the project application is considered for Pre-IPA: Technical feasibility, I am bound to submit all required / requisite mandatory documents to establish veracity of my DPR and eligibility to claim subsidy under NHB Schemes in the form prescribed within 6 months of any such intimation from NHB for according In principle approval (IPA). Else I acknowledge that my application stands vacated and rejected by default of my omission.
- 10. I understand that incomplete, delayed and /or NPA projects and default cases shall not be eligible for subsidy.
- 11. In case IPA is issued and subsidy is released subsequently, the project location, plant & machinery will be **geotagged** permanently and shall not sell the any of items / plant & machinery/ components procured under the project. In case of any violation I am obliged to return the subsidy received within 30 days of notice from NHB.
- 12. I solemnly affirm/ undertake that the proposed project components in the application are a completely new activity and not a pre-existing activity or any component thereof.
- 13. In case of Plant & Machinery- only new are proposed. Reconditioned / refurbished equipment/ Plant & Machinery shall not be procured under the project.
- 14. In case of concealment of any facts in this regard, the NHB would have right to reject/cancel my application / project out right at any stage.
- 15. In case the project is approved for subsidy claim I shall undertake a MOU with NHB to comply with all the terms and conditions of the scheme guidelines as effective on the date of subsidy claim approval and any other condition/ advisory in the interest of projects success and sustainability.

Applicant (Name and signature) and Seal if any
Date
Location:

UNDERTAKING [Refer Para 12.1 (m)]

(Fathe	(Name of the Lead Promoter/Director/ Partner/ Proprietor etc.) Son of Mr r's name) resident of (Residential address) do hereby solemnly affirm eclare/undertake as under:
1.	That I am promoter/ director/ partner/ proprietor of M/s
2.	I hereby make application and I am duly authorized in my own right/by management vide its resolution no
3.	That the term and conditions of the above scheme of the MoFPI under which an application is made by the applicant have been properly read and understood by me and I affirm that the project/ proposal comply with all the terms and conditions of the approval letter and provisions enshrined in the scheme guidelines.

- 4. That the proposed activities to be undertaken by the project/proposal are covered under the above scheme of MoFPI and no part of the scheme/infrastructure of the project is designed or assigned to be used for any activity other than the activities specified in the application at present or in the near future.
- It is certified that (name of applicant) has not obtained or applied for grants for the same project, component, purpose or activity from any other Ministry or Department of the Government of India or State Government or their agencies.
- It is certified that applicant's sister concern (s)/ related company / group company/firms as well as the applicant itself has not availed any financial assistance for a food processing project in the past from MFPI [if availed, the details shall be furnished separately].
- I also solemnly affirm/undertake that the proposed project components in the application are a completely new activity and not a pre-existing activity or any component thereof.
- In case of concealment of any facts in this regard, the MoFPI would have right to reject/ cancel my application/project out right at any stage.

- I will meet any shortfall in means of finance due to less admissibility of grant or any future reduction in grant-in-aid or any escalation caused in the cost of the project.
- 10. I shall not dispose-off or encumber or utilize the assets created wholly or substantially out of government grant for purpose other than those for which they have been sanctioned, without obtaining the prior approval of the sanctioning authority of grant-in- aid.
- 11. In case of non-implementation/ delayed implementation of the project the Ministry will have absolute right in cancelling the approval granted and also recall the grant released, if any, along with interest as per the scheme guidelines.
- In case of failure to operate the project for at least three years after commencement of commercial operation, I shall return the entire grant-in-aid with interest @ 10% per annum.
- 13. User charges/hiring rates of the facilities created under the project will be disseminated to the public including uploading of the same on the website of the project/ organization. A copy of the same will also be made available to the Ministry.
- 14. I undertake that all the information furnished in the application and the DPR with respect to the eligibility conditions, etc. are true and correct to the best of my knowledge and belief and nothing material has been concealed therefrom.
- 15. I also undertake that in the event of any information or facts furnished by me are found to be incorrect or material information concealed, during the course of implementation of the project or subsequent to implementation, the Ministry of Food Processing Industries may take action as per the provisions of scheme guidelines and/or as per the law of the land, as deemed fit and appropriate in the circumstances.

Salient features:

- 1. Scheme is open on all days during 2018-19 as per scheme design.
- 2. There will be a helpline email: helpdesk.nhb@gov.in to address queries from anybody.
- 3. There will be a provision to create an account for each applicant. Any change in status of application will be informed by an SMS and in account. All the correspondence from both sides Applicant, NHB and also of the Bank will be shown in the account.
- 4. For the best preparation: The applicant is advised to submit the application, DPR and cost of application, well in advance (6 months) from the proposed date of project start.
- 5. Applicants whose projects are rejected at Technical feasibility stage are welcome to resubmit the proposal for fresh examination with improved and corrected proposal.
- 6. The participating banks will adhere to the standard norms of appraising the project regarding Market viability and Financial viability before the release of term loan to ensure that the project is new, meets the guidelines of NHB, and the applicant has clear land title or lease hold right over the land.
- 7. The name of applicant (including entity) should be same in IPA Application, IPA, Bank Sanction and Land ownership / lease deed. Any deviation invites rejection.
- 8. Target / proposed timelines subject to Budget availability as per scheme design are:

Before	Technical feasibility	1 Month
IPA Approval	Upon submission of Bank Appraisal: Market and Financial feasibility	2 Months
Post - project	Competent committee meeting for a decision on subsidy claim after JIT report	2 Months
	Fund release in case competent authority approves subsidy claim	1 months
