# How to integrate your eBay store.

1. Go to **Settings**, click on **Manage Stores**.

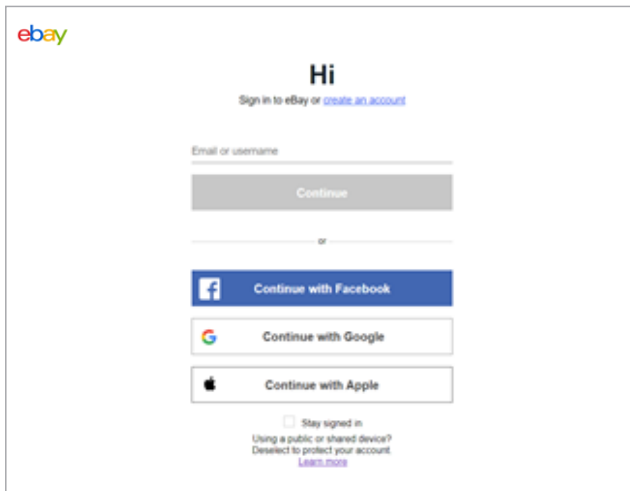

2. Click on the eBay icon.

When you click on the eBay icon, the system will take you to the eBay website.

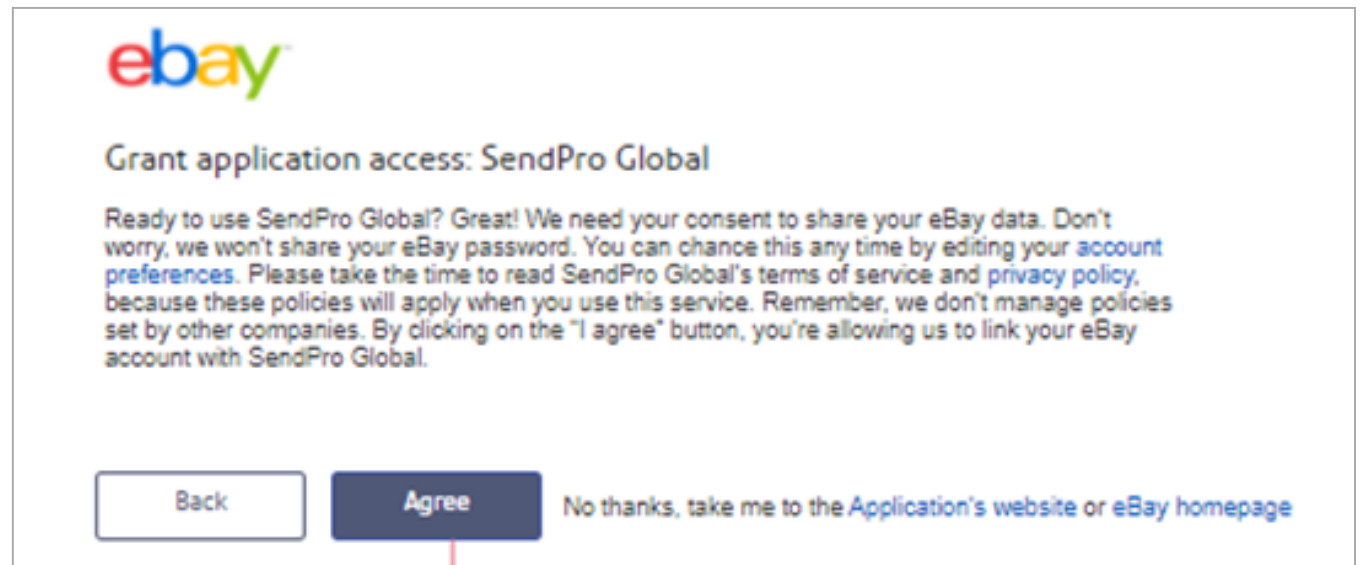

3. Log-in by filling in your email ID/username and account password.

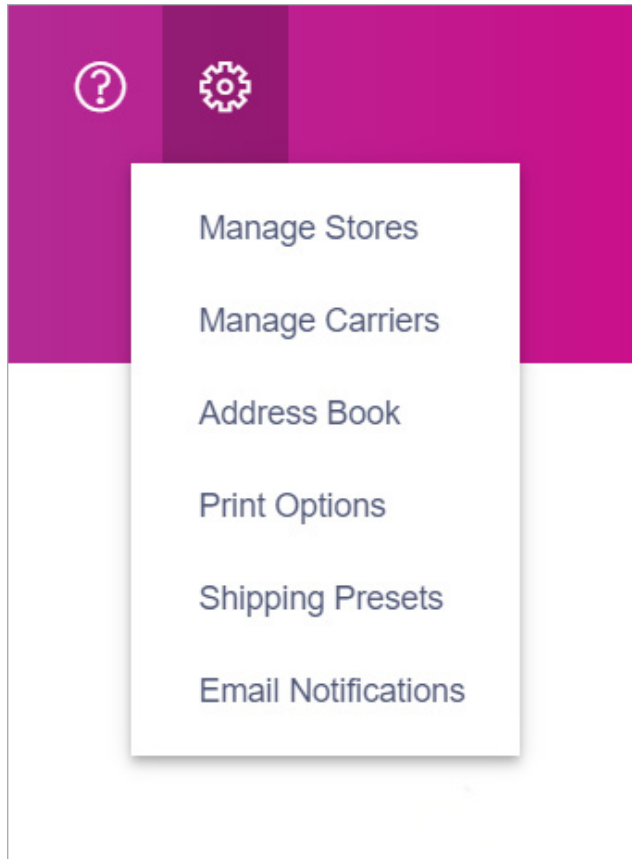

4. eBay will then ask you to grant application permission to SendPro Online – the screen will say: Grant application access: SendPro Global

5. Your store is now connected.

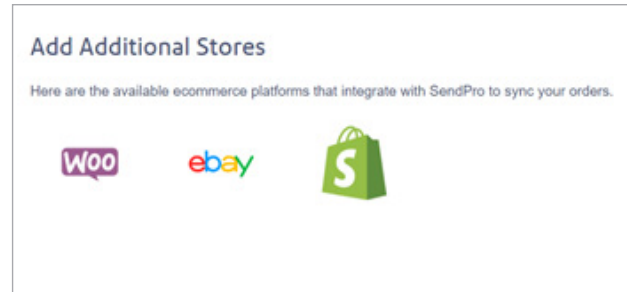

# How to integrate your Shopify store.

1. Go to **Settings**, click on **Manage Stores**.

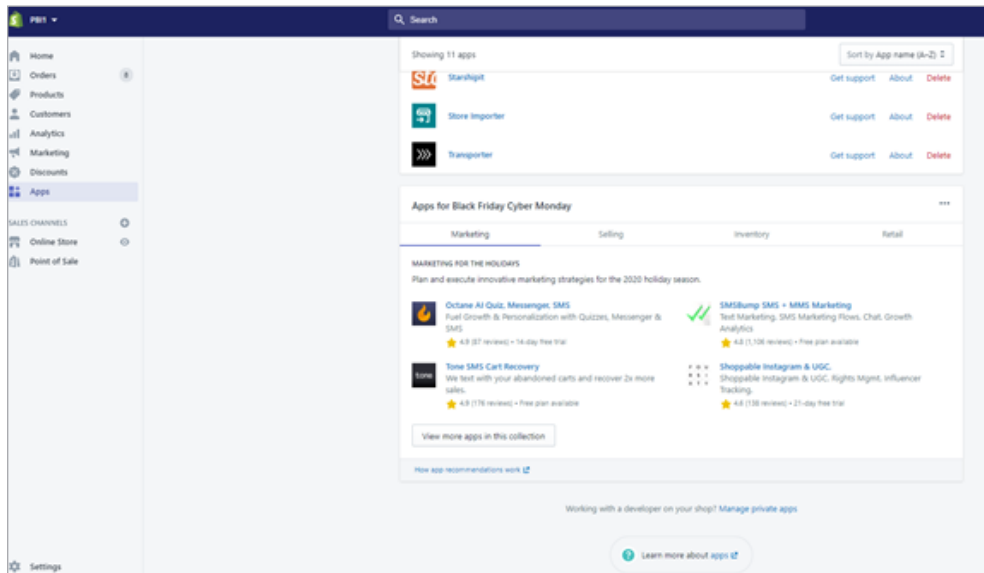

2. Click on the Shopify icon.

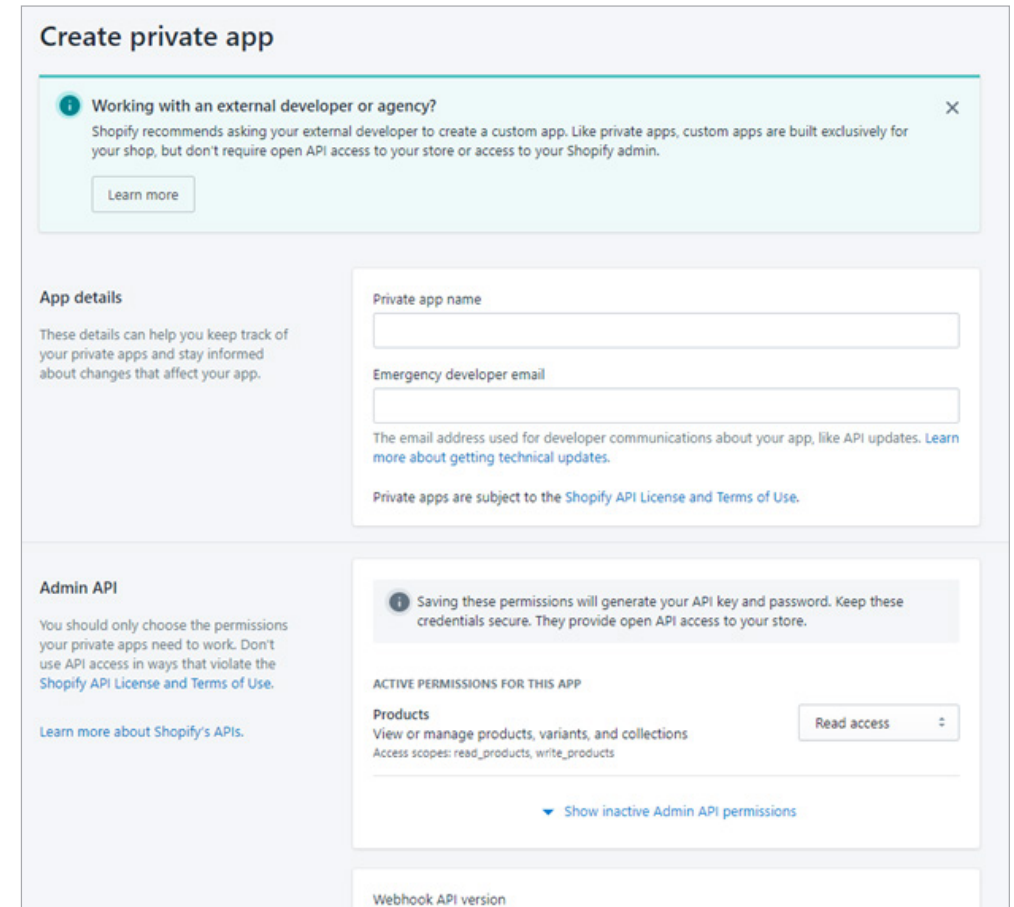

3. When you click on the icon, the system will ask you to fill out your Shopify account information. To get these details, you'll need to create a private app within Shopify.

- To find your Shopify account information, log-in to your Shopify account, go to the Apps tab (on the left menu), click on Manage Private Apps (at the bottom of the screen).

- Create a Private App entering app name and email ID.
  - Assign Read and Write Access on all Permissions required for the App.
  - Save

6. You can now click on the app to check the API key and details.

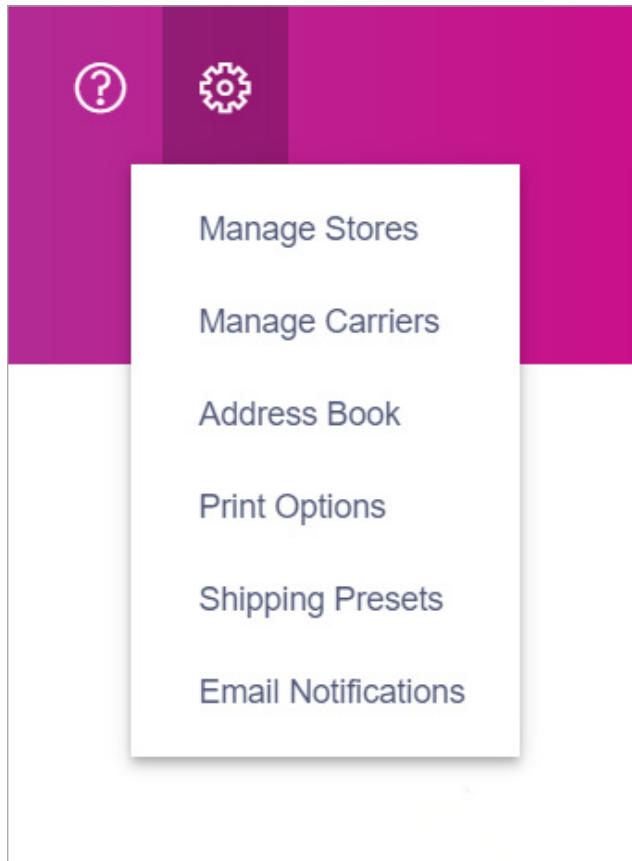

The screenshot shows the 'Admin API' configuration page in Shopify. On the left, there is a sidebar with the heading 'Admin API' and a warning: 'You should only choose the permissions your private apps need to work. Don't use API access in ways that violate the Shopify API License and Terms of Use.' Below this is a link: 'Learn more about Shopify's APIs.' The main content area has a warning icon and text: 'Keep these credentials secure. They provide open API access to your store.' There are four input fields: 'API key' with the value 'e768adcbfb3bfe5669008eef901ee2d'; 'Password' with a masked value and a 'Show' button; 'Example URL' with the value 'https://e768adcbfb3bfe5669008eef901ee2d:shppa\_6e8f0a9a951be4248a774cc6c1'; and 'Shared Secret' with the value 'shps\_0478e30882d902b57bdf6e1ccb3d65De'. A note below the URL field states: 'Private applications authenticate with Shopify through basic HTTP authentication, using the URL format https://{apikey}:{password}@{hostname}/admin/api/{version}/{resource}.json'. A note below the Shared Secret field states: 'Secrets are used to validate the integrity of webhooks.'

7. This is the information you will need add into the SendPro Online platform to connect your store. Enter the API Key, Password, Shared Secret Key and the Store URL from your Shopify account to the platform screen and click on Next. Your store is now connected

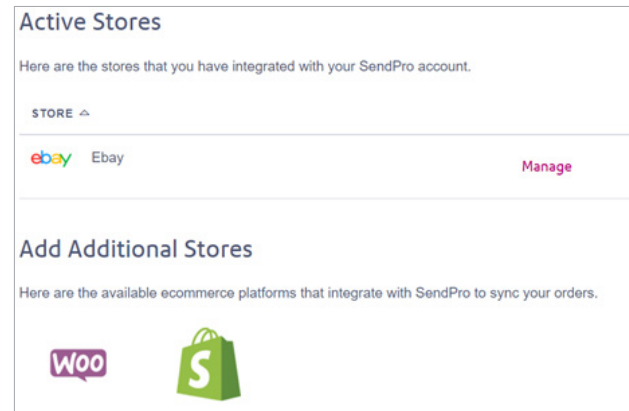

The screenshot shows a 'Connect Ecommerce stores' form with a progress indicator at the top showing three steps. The first step is active. The form includes the Shopify logo and the following fields: 'STORE URL' with the value 'https://spo-anz-test.myshopify.com'; 'STORE API KEY' with the value '5db1e407a1787c9a0c5108651420563d'; 'SHOPIFY API PASSWORD' with the value 'shppa\_8c7cbd24ac300a5a46f23d1e827a328e'; and 'SHOPIFY SHARED SECRET' with the value 'shps\_7132da6d99c29d5cdd457073e382a13'. At the bottom, there are 'Back' and 'Next' buttons.

# How to integrate your WooCommerce store.

1. Go to **Settings**, click on **Manage Stores**.

2. Click on the WooCommerce logo under **Add Additional Stores**.

2. The system will ask you to select how you installed WooCommerce:

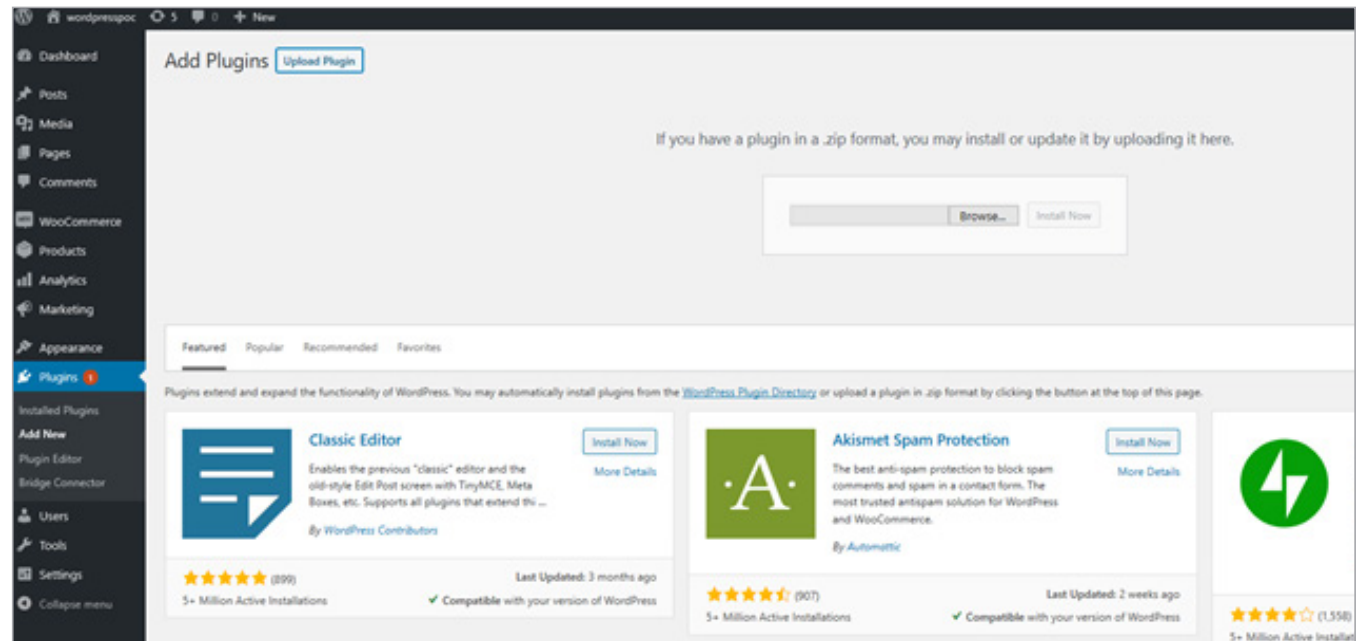

**Hosted** (Pre-install or Auto-install options when setting up WooCommerce) or

**Self Hosted** (the DIY option on WooCommerce).

## Option 1: Self-Hosted. Follow the below steps.

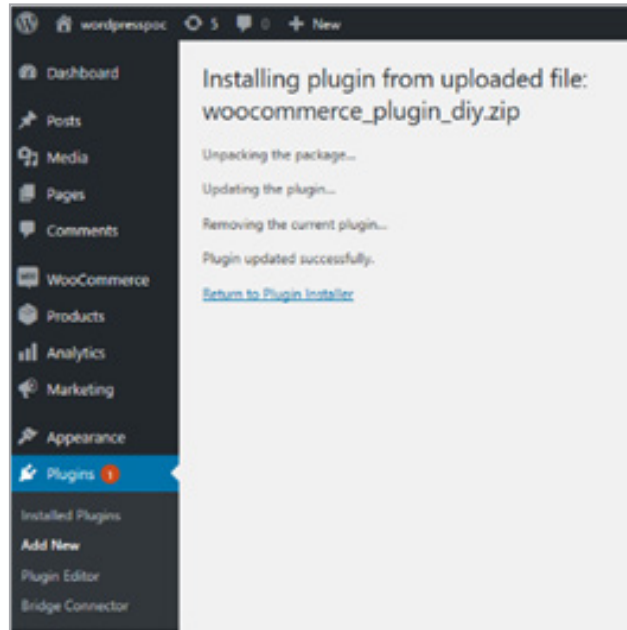

1. Click Download Plugin. The system will start downloading and once downloaded, you can save the Zip file on your computer.
2. Once you've done that, log in to your WooCommerce account and choose Plugins on the left side bar. Select Add New and click Upload Plugin.
3. Search for the Zip file you saved earlier by clicking on the Browse button; then add the file and click Install Now.

## Option 1: Self-Hosted. Follow the below steps

- The plugin will start installing.
- Once it's installed click on Bridge Connector on the left side bar and then click Connect to install the plugin. You'll then see a Store Key at the bottom of this screen.

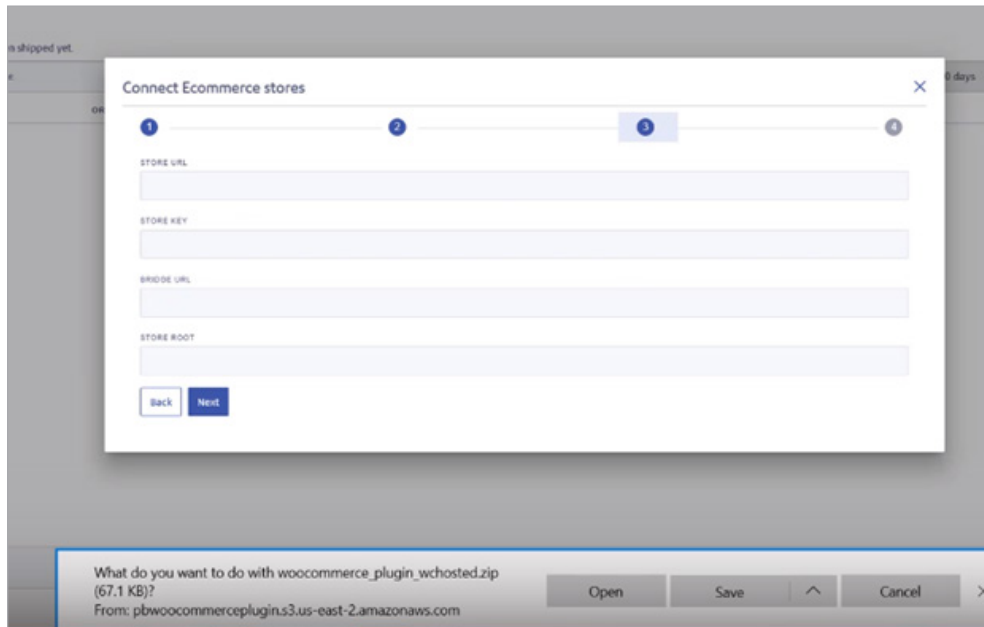

- Go back into the SendPro Online platform and add the store key along with your store URL.
- Then you're all done.

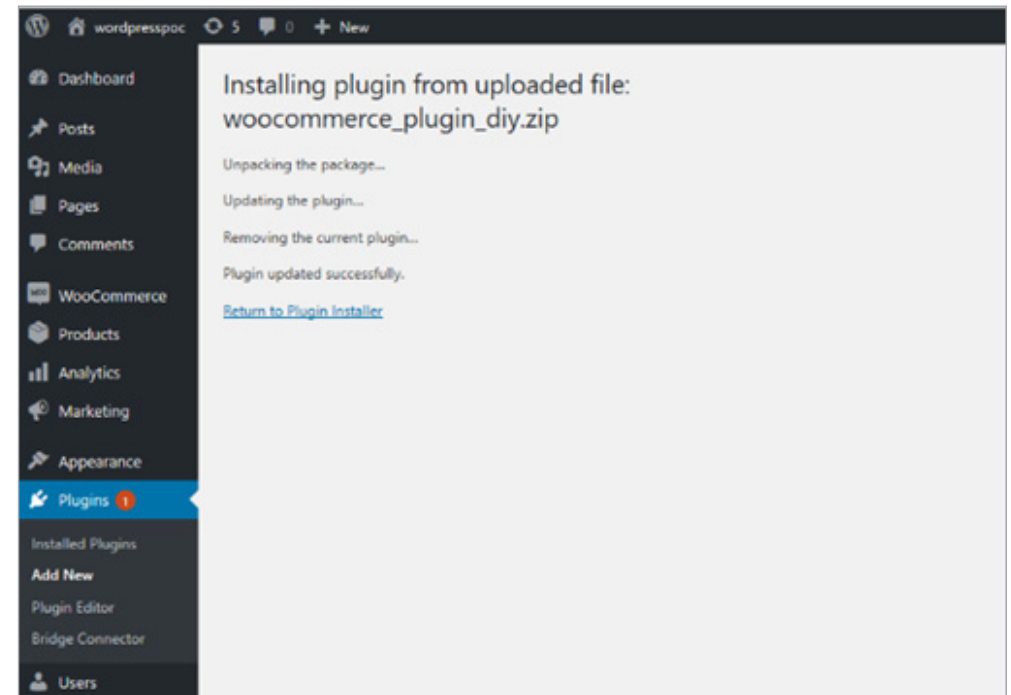

## Option 2: Hosted. Follow the below steps.

1. When you select Hosted, the below screen will pop up, along with the option to download the plugin. Click save and download the Zip file to your computer.

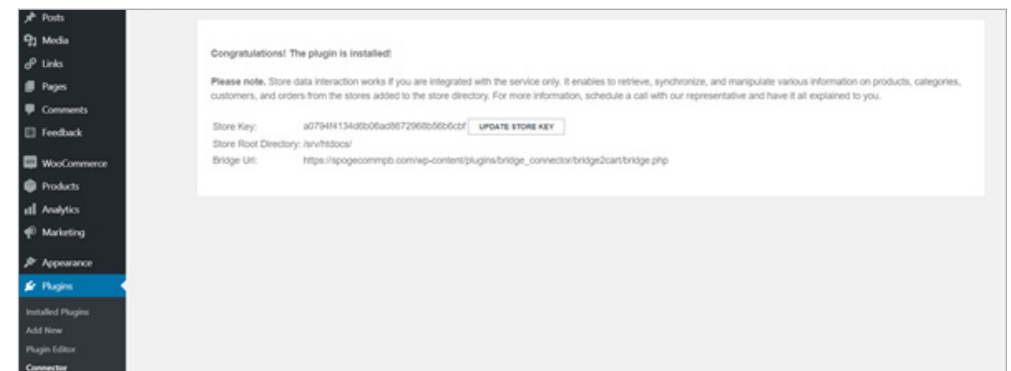

2. Once you've done that, log in to your WooCommerce account and choose Plugins on the left side bar. Select Add New and click Upload Plugin.

3. Search for the Zip file by clicking on the Browse button, then add the file and click Install Now.

4. Once it's installed click on Bridge Connector Plugins on the left side bar and then click Connect to install the plugin. You'll then see Store Key, Store Root Directory and Bridge URL.
5. Go back into the SendPro Online platform, and add this Store Key, Bridge URL and Store Root along with your store URL.
6. Then you're all done.
