HITACHI

Cambridge-Hitachi is a joint venture between Cambridge University Press and Hitachi Software Engineering. This exciting new partnership brings you educational solutions that combine exceptional curriculum-based software with inspirational interactive technology.

Cambridge-Hitachi products are available across a broad curriculum and age range. From lesson planning to classroom activities they will allow you to teach in exciting new ways, especially in conjunction with Hitachi's interactive whiteboards.

Software published by Cambridge-Hitachi can be found throughout this catalogue, where you see the logo.

Our service to schools

At Cambridge we aim to provide the highest possible standard of service to our school customers.

Customer support

Through our range of product information services we help you to make the right choice of materials for your school.

Evaluation Service

Certain books in this catalogue are available for evaluation purposes. If you would like to evaluate any Cambridge book, please contact your local Cambridge office/agent or Customer Services (Education) at the address opposite.

Website

www.cambridge.org/education/international

Click to evaluate our teaching resources, download free sample chapters, get updates on new publishing or order catalogues. Everything you need to make an informed buying decision at the touch of a button.

Education Information Line

 +44 1223 325014

Requests for product information, catalogues and general enquiries are handled through our international marketing department. Our friendly, knowledgeable staff will be pleased to help you.

Software information

- For technical support for any Cambridge software email our helpdesk cd-rom@cambridge.org
- Prices quoted for Cambridge-Hitachi software are for single-user versions. For prices of extra copies and network licences please refer to our price list at www.cambridge-hitachi.com or contact your local office/agent.
- Cambridge-Hitachi software will operate across a range of platforms but has enhanced features when used on Cambridge-Hitachi whiteboards.

Ordering

Orders may be addressed to your normal supplier or to Customer Services (Education) at the address below. Cambridge University Press offices and agents are listed at the back of this catalogue.

New edition

SMP Interact

The highly acclaimed and complete course

SMP Interact is a comprehensive book-based course for 11–16 year olds that motivates students and supports effective teaching.

● ● ● New Framework edition for key stage 3 (11–14)

The new Framework edition supports a teacher-led, discussion-based approach as recommended by the key stage 3 Framework for Teaching Mathematics.

● ● ● Full colour edition for GCSE (14–16)

Designed for all specifications, this freshly written material has been highly praised for motivating students and contributing to enhanced achievement.

Easy to use ...

New Framework edition

The structure is simple – one book per year in each of three tiers:

- 7C, 8C and 9C provide an 'Extension' tier offering greater pace and challenge
- 7S, 8S and 9S form the 'Core' tier, which keeps pace with the Framework's yearly teaching programme
- 7T, 8T and 9T provide a 'Support' tier.

GCSE course

SMP Interact for GCSE covers the whole of each tier in one book. So whether you use a linear or a modular specification, fitting this flexible course to your GCSE scheme of work is easy.

Excellent value ...

Go to page 5 to see our value for money prices.

Extension

Core

Support

Teacher's guides

Teacher's guides and practice books

Teacher's guides accompany all key stage 3 pupils' books offering an essential resource for planning of the type advocated in the Framework. Also available are practice booklets that are clearly referenced to the pupils' books and ideal as a homework resource.

Teacher's guides and practice books accompany all GCSE students' books, providing a wealth of teaching ideas and additional practice.

New edition

SMP Interact: new Framework edition

Professionally rewarding

The new Framework edition has been developed by listening to you, the user. Its motivating pupils' books and supportive teacher resources make it a pleasure to use.

Ideal for the Framework's three-part lesson

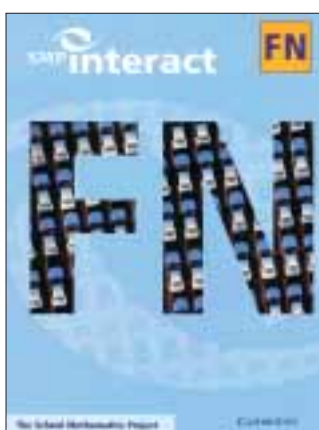

- New sections in the teacher's guides provide a rich vein of ideas for oral and mental starters.
- Advice throughout the teacher's guides, linked to beige T-bars on the edge of the pupils' pages, supports the teacher's central role in the main part of the lesson, particularly in managing effective whole-class discussion.
- Clear objectives and progress checks in blue panels, together with other key summaries, form an essential resource for the final plenary.

Effectively structured

Framework content is presented coherently in a one-book-per-year structure. Three carefully differentiated tiers fulfil a broad range of needs.

Book FN

Book FN offers additional help and support with number work for pupils following the T course in years 7 and 8. Book FN has an accompanying teacher's guide and a set of resource sheet masters.

SMP Interact for GCSE

You can be assured that *SMP Interact for GCSE* works. This extensively trialled course has been praised for building students' confidence, while boosting their motivation and hence their achievement and results. Teachers welcome the wealth of ideas in the teacher's guides, which are designed to build confidence without limiting the teacher's own creativity and initiative.

SMP Interact for GCSE

- provides fresh, extensively trialled material that supports and motivates students
- clearly states objectives and includes questions for self-assessment
- offers real exam questions from a variety of boards to help build students' confidence
- has clearly marked links to advice in the teacher's guide

Protect your department's budget with our excellent value price promise ...

We guarantee to maintain list prices until July 2005. All the prices are shown in the panels below.

Mathematics: IGCSE

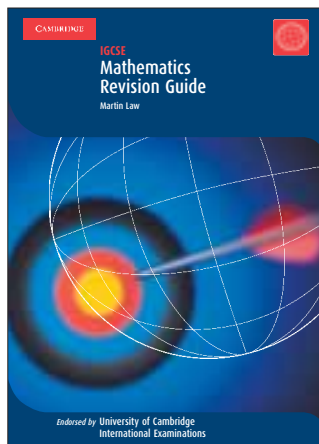

Mathematics: IGCSE is a new textbook written specifically for the University of Cambridge International Examinations (CIE) IGCSE syllabuses (0580, 0581). It has been written by an experienced mathematics teacher and endorsed by CIE, ensuring that it is up to date and comprehensive in its coverage of the syllabus. The book contains all the material covered in both the core and extended IGCSE mathematics syllabuses.

Main features

- Comprehensive coverage of the IGCSE syllabuses (0580, 0581)
- Designed for face-to-face learning, but encourages self-assessment and independent thinking
- Well structured and student-friendly text
- Examples drawn from all over the world, and relevant to real life situations
- Glossary boxes explaining new and difficult words

Mathematics Revision Guide: IGCSE

This comprehensive revision guide meets the requirements of the University of Cambridge International Examinations (CIE) syllabuses for IGCSE Mathematics (0580, 0581).

Designed as an ongoing reference book or for final exam preparation, this revision tool is a must for all IGCSE Maths students.

Features include examination hints and practice questions with answers; grade descriptions indicating syllabus requirements; practice exam papers; clear differentiation between core and extended sections.

Teaching and Assessing Skills in Mathematics

This handbook is part of the Professional Development for Teachers series, published in association with University of Cambridge International Examinations (CIE). The handbook provides clear, practical and up-to-date guidance on teaching and assessing mathematics skills for IGCSE and O Level. It offers ideas and strategies about effective classroom practice, coursework setting, and integrating different skill areas.

Both new and established Mathematics teachers should find this handbook an ideal class companion.

● ● ● Prepare a tailor-made test quickly and easily

There are hundreds of questions in the ready-made question bank, organised by topic and level for ease of selection. Choose from a range of different question types. Alternatively input your own questions for precise assessment of students' learning.

● ● ● Assess performance and identify areas of strength and weakness

With *Testmaker* you can find out prior knowledge and misconceptions before teaching, check progress as you go and develop students' thinking skills. *Testmaker* enables you to quickly find gaps in your students' knowledge and find out how individual students are progressing.

● ● ● Let the software do the marking for you

Tests can be taken on screen, saved and the marks recorded and analysed by the software. *Testmaker* is an ideal tool for analysing class results and student performance quickly and simply.

System Requirements

Testmaker 2 minimum system requirements:

- 400 Mhz or above Pentium (or equivalent) processor
- Windows 98/Me/2000/XP
- 64 MB of RAM
- 20 MB hard drive space
- 800 x 600 256 colour or higher screen resolution
- Mouse or compatible pointing device

Perfect Times® CD-ROM

Worried about numeracy skills? Raise your pupils' standards in times table with these fun and interactive games.

Perfect Times® is a vital new resource for learning and reinforcing multiplication and division skills.

● ● ● Ideal for all ages and abilities

Perfect Times® can raise standards in all ages and is perfect for children and adults, whatever their ability level.

● ● ● Learn and strengthen multiplication and division skills

The software includes numerous activities, help on how to play, hints and useful information.

● ● ● Speed and accuracy of recall is automatically recorded as printable graphs

Perfect Times® has the facility to assess pupils' fluency of recall.

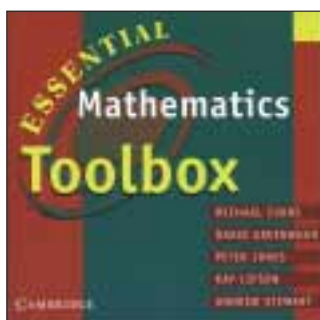

System Requirements

- 64MB RAM, 20MB free hard drive space, 800 x 600 256 colour graphics, mouse or compatible pointing device, basic audio card (optional)
- PC: 400 MHz Pentium II or equivalent (800 MHz recommended) running Windows 98 or later
- Macintosh: G3 400MHz with Mac OS 9.1 or later

Essential Mathematics Toolbox is just that – a toolbox of resources to enhance the teaching and learning of mathematics with 11–14 year olds. The *Essential Mathematics Toolbox* files and programs can be used to introduce new topics and revise learnt ones. The CD-ROM contains:

- Ready-to-view PowerPoint presentations which demonstrate key mathematical concepts and models – an ideal introduction to new topics or revision of current ones.
- Files for Excel, Cabri Geometry and Geometer's Sketchpad which provide visual demonstration and practical reinforcement of concepts.
- Spreadsheet activities for use in all secondary classrooms, grouped by topic within each level.

Complete coverage of both AS and A Level syllabuses

This new series contains full coverage of both the AS and A Level syllabuses (9709, 9231, 8719) from CIE. Each book within the series corresponds to a syllabus unit, except syllabus units P2 and P3 which are contained within a single book.

Clear and easy-to-use format

Each title has been designed to be accessible and user friendly. Each chapter starts with a list of learning objectives. Mathematical concepts, terminology and notation are explained clearly and key results and procedures appear in boxes for easy reference.

Practice exam papers

The books contain plenty of exercises, as well as revision exercises and practice exam papers – all written by experienced examiners.

These textbooks are also highly suitable for use with other advanced level mathematics syllabuses.

Highly motivating approach

This series eases the transition from GCSE to A Level mathematics by using a highly motivating approach which develops ability and confidence in mathematics and its applications. Students are encouraged to 'show how' and 'explain why' throughout the course to build confidence in their mathematical understanding.

Mathematical concepts clearly introduced

Each section within a chapter consists of work developing new ideas followed by an exercise for practice in using those ideas. Opportunities for teacher-led discussion and small-group work are highlighted where topics would benefit from further exploration.

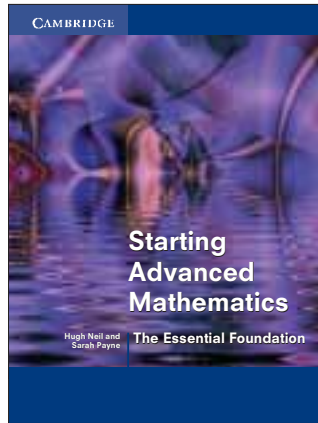

Support and consolidation at all levels

Support material within some chapters provides consolidation of ideas where needed. There are also more demanding questions providing extra challenges.

● ● ● Easy to use and confidence building

The three books provide further examples for practice and contain questions on many topics covered by advanced level specifications. Students can select topics for practice where they need it and at the right level to match their understanding.

● ● ● Questions at four levels for graded challenges

Each chapter within the books contain four levels of questions: Basic, Intermediate, Advanced and Revision. Answers are given for all questions, some with full worked solutions intended to help students understand key topics.

● ● ● Ideal for use with all specifications

These exercise books are designed for use with any advanced level mathematics programme. Students studying AS/A Level or IB Diploma examinations will find them an excellent revision tool.

● ● ● Mathematical Challenge

Nearly 600 unusual and challenging multiple-choice problems for the top 35% of pupils aged 11–15. The first part of the book consists of past papers from the hugely popular UK Schools Mathematical Challenge. The second contains shorter papers in a similar style. Each short paper is designed to fill a 30 minute class or homework slot.

● ● ● More Mathematical Challenges

Over 100 challenging problems for pupils aged 11–15, taken from the UK Junior Mathematical Olympiad. There are also 60 additional problems in a similar style. The second section of the book consists of detailed comments and hints, whilst the third section gives outline solutions.

● ● ● Senior Mathematical Challenge

The latest addition to this popular series contains the National Mathematics Contest papers from 1988 to 1996, with comments, hints and full solutions. Additional problems are also included. These thought-provoking problems are ideal for students aged 15–18 in class or for homework.
