## **Exempt Schools/BOCES from Time Off for Voting**

*Support legislation that would exempt school districts and BOCES from new requirement to provide 3 hours paid time off to employees to vote.*

ASBO New York has collected the signatures of school leaders representing 365 school districts and BOCES who support exempting school districts and BOCES from new paid time off for voting requirements included in the 2019-20 state Budget.

These new requirements for paid time off will cause a multitude of financial, logistical and academic problems for school districts and BOCES to implement. Below are some of the concerns we have:

- This new requirement applies to multiple elections held throughout the year that will impact the academic calendar.
- Districts already face shortages of substitute teachers; if all school districts needed to find substitutes on the same day, “it would make operating the district nearly impossible.”
- Beyond substitute teachers, school districts would need to have substitute bus drivers, disrupting and potentially limiting transportation as well as instruction.
- There is no clarity on the mechanisms for identifying whether employees are registered to vote and use their time off to vote.
- It would be a particular strain during elections that fall during Regents Examination Days, which are “all hands on deck in terms of staff” for many districts.
- For districts using election day as a Superintendents Conference Day, uncertain schedules will minimize the effectiveness of professional development and training to improve teaching and learning.
- Employers are required to post the information on time off 10 days before the election. Are they “required to know dates of election for villages, towns, fire districts, etc.” outside of their district where employees reside?
- Given the administrative burden and scarcity of substitutes, many districts would close for election days. How would these closures affect the requirement to have 180 days of instruction for full state aid?
- Many districts report polls open from 6:30AM to 9:00PM and employee schedules from 7:30 to 3:00PM, leaving ample time for employees to vote without reducing their work time.

When it comes to school districts, the mandate for time off on election days is a solution in search of a problem. The overwhelming majority of school district employees already have three or more full hours before or after their working days during the time polls are open. To protect students from these disruptions, we ask that you pass legislation before the June Primary Election, which is also during Regents Exams, to exempt school district and BOCES from this new requirement.
