LEMIEUX DOOR COLLECTION

Choice & Selection. Words used all too often by home decoration manufacturers and retailers when, in fact, there isn't much to choose from. However, as you'll soon discover, if any company is the embodiment of these two words, it's Lemieux Doors.

Satisfaction – it all comes down to choice. Your choice. Wood, glass – panel design, shape, color, finish, texture, and even the way your door is built. We could probably make a different door an hour for an entire decade before making the same door twice. Far more than embody the concepts of choice & selection, we've completely redefined them.

However there's one thing Lemieux Doors doesn't offer any choice on – quality. Regardless of how you custom-design your door, or what method of fabrication and assembly fits your lifestyle or pocketbook, quality, and the best product warranties in the industry come standard with every single door we make. Lemieux Doors really has opened the door on style, flexibility and durability. Now it's time to cross our threshold and explore the infinite possibilities...

PERSONALIZE YOUR DOOR IMAGINATION COMES TO LIFE

Lemieux Doors is recognized as the premiere maker of custom-designed top-quality doors. But that didn't happen by accident. Since our inception, we've dedicated ourselves to creating doors that outlast the elements, endure the years, and have a timeless quality that weather even the frequent temperamental changes in trends and styles.

It's only through the use of advanced methods of fabrication and the highest quality materials that our stellar reputation has emerged. A relentless attention to detail, the dogged pursuit of excellence, and the absolute refusal to be second best have always been our driving force – and where our competitors have been known to cut corners, we've gone the extra mile. That Lemieux Doors look great is a given. But it's what goes into each and every one of them that has truly made them the envy of the industry.

PERSONALIZE YOUR DOOR AS SIMPLE AS 1-2-3

ALL THAT'S LEFT TO ADMIRE
ARE THE EXCEPTIONAL RESULTS.
IT'S THAT EASY.

With our modular approach to customizing and design, creating a door that's both an attractive, harmonious extension of your décor, and one you can call your own, has never been easier. We're also developing new ways to process estimates with our exclusive Lemieux Doors Quoting System (LDQS). We've designed our world so that yours is easier to live in, and we're convinced that better doors will always lead the way into better buildings.

LVL CORE TECHNOLOGY

WHAT WE PUT INTO EACH LVL DOOR IS EXACTLY WHAT YOU'LL GET OUT OF IT. EXCEPTIONAL QUALITY AND DURABILITY.

Laminated Veneer Lumber (LVL). The name instills a sense of robustness and durability. LVL derives its strength from an impressive number of tightly bonded wood veneers, glued together layer upon layer, forming a solid tension-resistant core. Since the layers of veneer are arranged on edge, our LVL core withstands all tendency to warp and twist. It's a small detail that makes a big difference, and the advantages of employing this proven design allows us to avoid using weaker MDF as a core material. Our competition doesn't use LVL because it costs more. But Lemieux understands that the benefits of a longer lasting, better built product far outweigh the higher cost. **Every LVL doors comes with a solid 20-year warranty against warping.** Available in all species, panels, glasses and design.

MOST COST COMPETITIVE

WOOD CORE

Wood, pound for pound it's stronger than steel! It's impressively resilient and is better suited to shock and stress than many other building materials. But more than being merely solid and an ideal component in any quality door, wood is natural. Lemieux Doors obtains all of its wood from ecologically sustainable sources.

Our wood-core doors carry with them all of those qualities wood is renowned for – and one that's sure to please your bottom line. Economy. It's probably the most competitively priced option available with a quality-to-price ratio that's nothing short of enviable. That's an advantage anyone can appreciate.

FIRE-RATED

Lemieux carries a full line of fire-rated doors and jambs. They range from 20 (negative and positive), 60, and 90-minute-rated models, in sizes up to 4/0 width and 8/0 height, and are available in a range of custom sizes and designs, with either a primed paint finish, or a choice of 16 different species of stain grade.

Benefit from the advantages of using a single source for all your fire-rated door requirements. Our doors and jambs fit with a quality and durability nothing short of enviable. It's no longer a choice between form and function, because Lemieux's fire-rated door products afford your clients the peace of mind they need, and the great looks they want.

FIRE-RATED DOOR SPECIFICATIONS

Rating	Cat.	Maximum size opening				Panel profile	Prefit	Available top rail selection	Standards compliance

90	A	48"	96"	N/A	N/A	Flat, Raised (SH), V-groove (SH & DH)	0°: Prefit ≤ 1/4 3°: 3° - 0" only	Square Top Arch, Classic, Half-Arch, Half-Classic, Half-Round, Round	Both positive and neutral, UL 10(c), UBC 7-2 (1997) Part 1, NFPA 252, ASTM E2074-01, ASTM E152-81a

Category A Lemieux Doors' category A doors are manufactured with a sealing system concealed into the edges of the door. This means that no additional edge-sealing system is required between the door and frame.

Category B These doors require an additional edge-sealing system between the door and frame.

A BLUEPRINT FOR EXCELLENCE

UV SEALANT ON PRIMED PRODUCTS

Our proprietary UV coating process guarantees every door is delivered ready-to-paint, soon to be transformed into an aesthetically pleasing component of any building design. We apply two coats of UV sealer in order to achieve a smooth door surface, before factory priming. The result is one of the smoothest primed finishes you'll find in the industry, and an extraordinary door.

VENEER PANELING

Our standard veneer panels carry a lifetime warranty against splitting, so you know light won't leak, drafts won't blow, and paint or stains won't show. Nor will these panels ever bow, cup, or warp!

MORTISE AND TENON CONSTRUCTION

It's as versatile as it is strong – superior to typical dowel assembly, mortise and tenon construction permits a continuous bond for much higher adhesion – plus, on-site trimming becomes a snap!

BEST QUALITY GLUES

Our engineering team spares no effort and is constantly on the watch for the best gluing/bonding technologies. For each application a very specific type of glue is used, ensuring the most effective adhesion. Glues used at Lemieux Doors are also used for heavy-duty structural applications such as bridges and multi-story buildings. Each and every Lemieux door is manufactured in our state-of-the-art production facility and is the result of countless hours of research and development.

Lemieux Doors Collection boasts a variety of high-grade wood species, precision handcrafted using vertical stiles and horizontal rails in your choice of panels and/or glass, ready to stain or paint. Stile & rail construction offers virtually limitless door styles, configurations, panel and sticking profiles.

PANEL/STICKING OPTIONS

Raised moulding available only on square-top primed MDF doors.

STILE & RAIL DOORS DEFINED

MULLION: narrow vertical sections between panels **MUNTIN:** slim vertical pieces used to separate panes of glass; grille bar **PANEL:** pieces that fit within the surrounding stile & rail frame that come in different profile designs – single-hip, double-hip and flat **RAIL:** horizontal pieces of the door; includes top, bottom and sometimes lock rails **STICKING:** the design of the profile edge on the stile and rail; ovolo is carved and rounded; shaker is straight and squared **STILE:** vertical pieces of the door

Round-Top

Segmented

DOOR TOPS

Cap off any Lemieux door with a crown befitting a king – no longer limited to a straight top, you can indulge in a semi-circular or arched-top doors. Either of which will make a door step out of the ordinary, and into the limelight.

C30, Knotty Alder, segment
(center panel design not available)

TOP RAIL

Your imagination is the only limit to creating the look you've always wanted and the key to creating a home that is truly unique. Turn yours into a space that will be envied and admired. With all the options available for glass, panels, wood specie, designs, and applied mouldings – it's only fitting to cap it all off with a touch of class and elegance.

APPLIED MOULDINGS

A door can truly come alive when you add depth with our relief-accentuating mouldings. Transform a simple door into a structural element with dimensional impact and an impressive distinction. Lemieux offers 4 types of applied mouldings, and they're an easy way to leave your impression on a building decor. They allow you to sign each door with excellence, creating surfaces with daring and definition.

INTERIOR FRAMES FOR ROUND AND ARCH-TOP DOORS ONLY

Because we also carry a full line of interior frames for round and arch-top doors, every component of your door design originates from the same source. Gone are the annoying structural and aesthetic incompatibilities that can arise from multi-sourced materials. Our turnkey solutions are designed to fit, last, and of course, to impress.

WOOD SELECTION

The suppleness of maple, the warmth of pine, the richness of mahogany – your choice of wood can make all the difference. What matters is that it suits your tastes and style, and achieves the effect you’re looking for. Lemieux Doors prides itself on offering an impressive selection of woods that adapt gracefully to any decor and give your home an irresistible ambiance.

We’ve traveled the world so that we might bring you the best, managed-forest woods available. Responsible forest management is an important part of our philosophy, and ensures access to a renewable supply for years to come. That’s more than can be said for resource depleting materials like steel, and fiberglass!

Lemieux offers 17 attractive stain-grade species and, excluding the double-primed variety, are all 100% stain grade. And because we’ve standardized the use of the stain-grade species across all our products, Lemieux’s applied moldings, jambs, and fire-rated doors can be perfectly matched to any other of our components.

FRENCH DOORS COLLECTION

This is a company that prides itself on its specialty for exceptional French doors. We avoid the use of nails and staples using a clamp-glazed method perfected by Lemieux in 1992, resulting in a clean, unblemished finish. It's an innovation that's had a definite impact, and helped Lemieux Doors become a leader in North American French door sales. Time-tested mortise & tenon construction, and a pioneering UV sealer system all contribute to the production of these outstanding French doors.

Explore our wide range of glazing on pages 24 to 27.

LE CHATEAU COLLECTION

This stunning collection of panel doors is available in an almost endless range of design combinations, each of which will add undeniable sense of elegance and distinction to any room. Constructed from MDF panelling for increased strength and stability, these doors are resistant to cracks and leaks caused by thermal expansion and contraction. Advanced engineering of rails and stiles creates a door that is not only lighter, but requires no special screws for installation.

Enjoy a sense of added depth and heightened impact by adding distinctive applied mouldings to any Le Chateau door.

58 LEMIEUX DOORS

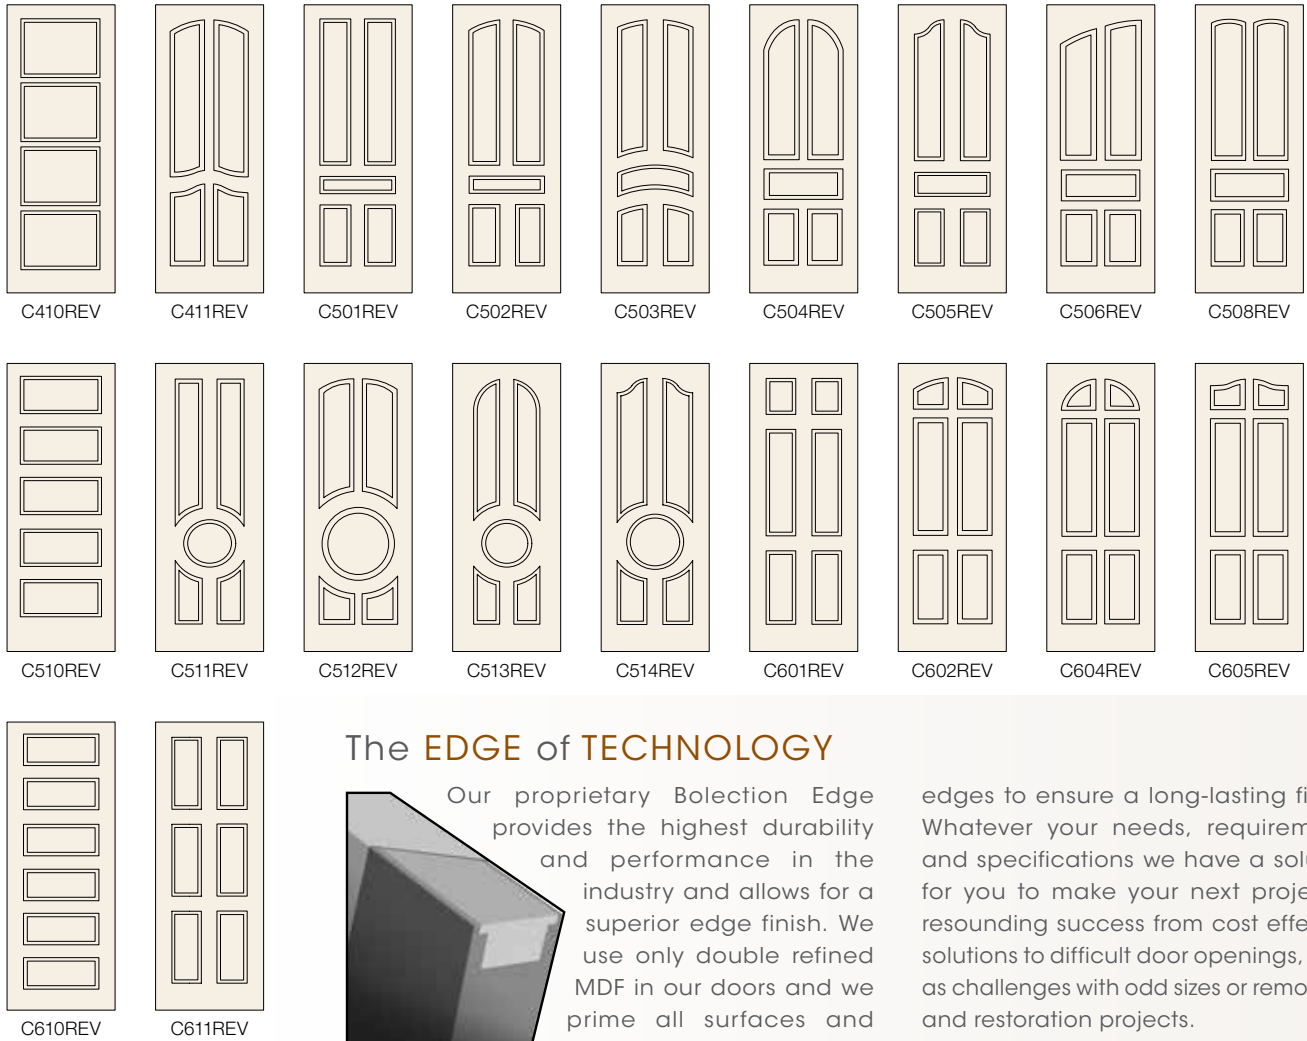

Available in Smooth and Raised Moulding Profiles

ROUTER CARVED MDF COLLECTION

The Router Carved MDF collection offers 65 surprisingly affordable designer carved doors, available in a wide variety of popular designs. Router Carved MDF doors are an excellent value for dealers who want to offer customers a full line of designer carved doors or for the discriminating homeowner and custom home builder.

- Available in 1-3/8" and 1-3/4" thicknesses
- Sizes up to 3'6" wide and up to 8'0" high
- Solid, one-piece wood composite construction will not warp, shrink or expand
- Engineered hinge edge for strong screw-holding power
- 20, 45, 60 and 90 minute fire-rated doors available
- Limited lifetime warranty

The **EDGE** of TECHNOLOGY

Our proprietary Bolection Edge provides the highest durability and performance in the industry and allows for a superior edge finish. We use only double refined MDF in our doors and we prime all surfaces and

edges to ensure a long-lasting finish. Whatever your needs, requirements and specifications we have a solution for you to make your next project a resounding success from cost effective solutions to difficult door openings, such as challenges with odd sizes or remolding and restoration projects.
