A. 2-INCH LIFT KIT WITH FOX® SHOCKS⁽¹⁾ Kit is completely engineered by Jeep® Performance Parts engineers to be the best no-compromise lift kit available for your Jeep Wrangler. Includes 2.5-inch-diameter aluminum body monotube FOX® Shocks for cooler operation, increased articulation and tire-to-ground contact. The longer front control arms optimize caster suspension tuning for on-road without compromising off-road capability. Accommodates 35-inch tires for added capability. The parts are easy to install as no driveshaft or brake line replacements are required. Kit comes in a reusable Jeep Brand wooden crate.

PERFORMANCE 44 AXLES. (Not shown). Made in the USA and built strong for hardcore Jeep Wrangler off-roaders. High-strength features include AdvanTEK® Gear technology that reduces gear set packaging with more strength and durability, allowing for a condensed carrier and improving ground clearance. Chromoly 4340 axle shafts, thicker quarter-inch steel bracket mounts, thicker 9.5-mm tubes and upgraded 1410 U-Joints also increase trail durability. A nodular iron differential cover provides extra ribbing for strength and increases overall rigidity. The high-clearance carrier design adds an additional half-inch of ground clearance, and an expanded range of gear ratios (4.56, 4.88, 5.13 and 5.38) helps accommodate for a variety of tire sizes. The direct bolt-in axle assembly allows use of OEM components and provides virtual "plug and play." Includes electronic differential lockers already installed. [77072529 - 4.56 Ratio] [77072528 - 4.88 Ratio] [77072527 - 5.13 Ratio] [77072530 - 5.38 Ratio]

MAP OUT YOUR STRATEGY

ADDING BIGGER TIRES AND WHEELS TO YOUR WRANGLER CAN REQUIRE ADDITIONAL MODIFICATIONS. BE SURE YOU UNDERSTAND HOW EQUIPMENT UPGRADES WILL AFFECT OTHER COMPONENTS AND CAREFULLY PLAN OUT YOUR BUILD.

ADDITIONAL ACCESSORY REQUIREMENTS: TAILGATE REINFORCEMENT SYSTEM, OVERSIZED SPARE TIRE MODIFICATION KIT AND CENTRE HIGH-MOUNT STOP LIGHT (CHMSL) RELOCATION KIT (OPTIONAL)

1 LARGER TIRES

Whether you're in the mud or on the rocks, beefy off-road tires are designed to give you a better off-road experience.

2 LARGER WHEELS

Just like off-road tires better connect to the terrain, off-road wheels help improve handling, acceleration, braking, traction and steering. Wider wheels can accommodate larger tires and offset for clearance to the body/frame.

3 HIGHER FENDER FLARES

Higher fender flares keep larger tires from coming in contact with the factory fender flare during articulation.

4 2-INCH LIFT KIT

A lift kit gives additional clearance to help your Jeep® better navigate off-road terrain and clear even more challenging obstacles.
