Landscape Institute CPD day | 27 & 29 January 2021

Health, Wellbeing and Place:
How landscape delivers positive
change
#LICPDDAY

CPD

**Landscape
Institute**
Inspiring great places

Welcome

We are delighted to welcome you to the Health, Wellbeing and Place: How landscape delivers positive change CPD event

Joining Hopin

To join the event on hopin please use the following link:

<https://hopin.com/events/health-wellbeing-and-place>

You will need to create a profile in hopin to join the event, which will only take a few minutes. When you click on the link to join the event, hopin will take you through the stages to set up your profile.

Once you are in the online conference, you will see on the left-hand side of the screen the different conference rooms.

- **Reception** – this is where you can see details about the event including the agenda
- **Stage** – this is the main conference stage and is where the speaker sessions will be taking place
- **Sessions** – this is where the breakout sessions will be taking place
- **Networking** – this is where speed networking will be taking place
- **Expo** – this is where you can visit our sponsors

We do encourage delegates to have a look at the virtual event on hopin, to familiarise yourself with the platform and say hello to other delegates.

Please note the same registration details can be used for both days. If you have any issues joining please contact events@landscapeinstitute.org

Event hashtag

#LICPDAY

Copy of presentations

These may be available post event subject to our speakers' permission. We will be in touch to let you know how to access this in due course.

We hope you enjoy Health, Wellbeing and Place: How landscape delivers positive change CPD. If you need any assistance or have any questions on the day, please feel free to ask a member of the LI staff on hopin.

08:50 Sponsor showreel
Conference room: Stage

09:00 Welcome and opening remarks

Jane Findlay CMLI PLI
President of the Landscape Institute

Paul Lincoln
Landscape Institute

Laura Schofield CMLI
Landscape Institute

Conference room: Stage

09:05 Session 1: Keynote: From movement to memories: How landscape shapes our health and wellbeing

Landscape Architects have an important role to play. The causes of ill-health today are different from those 50 years ago, and we must continue to shape places that support the mental and physical health of 21st century populations. Uncover the research available in this keynote session, such as the 'Putting Health into Place' report from the Healthy New Towns project, which provides extensive practical advice on how to build the healthiest places possible.

Julia Thrift, Town & Country Planning Association (TCPA)

Chair: Jane Findlay CMLI PLI, Landscape Institute
Conference room: Stage

09:45 Break and sponsor exhibition
Conference room: Expo

27 January 2021 Agenda

10:00 Session 2a: Creating healthy communities: Evidence, policy, practice

The evidence linking green infrastructure and health is compelling. We now need to rethink how we understand and communicate the diverse uses and benefits of our green assets. This workshop will discuss the role green infrastructure plays in promoting and protecting the health and wellbeing of the population, and how it can be used not only to meet public health objectives, but wider local priorities. We will also uncover new and upcoming resources that give practical support for the development and maintenance of good quality GI.

Carl Petrokofsky, Public Health England

Chair: Jane Findlay CMLI PLI, Landscape Institute
Conference room: Stage

2d. Breakout Session

Building with nature: Putting people and wildlife at the heart of development
 Understand the Building with Nature benchmark for high quality infrastructure, developed to accredit both physical development and policy documentation. This session will draw upon the rich evidence that exists to support a nature-friendly approach to development and realise our potential as healthy and happy communities.

Dr Gemma Jerome, Building with Nature

Chair: Laura Schofield CMLI, Landscape Institute
Conference room: Sessions

27 January 2021 Agenda

2c. Virtual Site Visit

Exploring Bankside Urban Forest

A virtual tour of Bankside Urban Forest. At this session you will find out how landscape partnership coordinated by Better Bankside is transforming the network of streets and spaces across Bankside through a range of large, small, temporary, permanent and tactical projects with green infrastructure and creative placemaking at their heart. We will discuss how a partnership approach is delivering transformative change to the public realm in an inner-city environment. This session will then uncover how green infrastructure is being successfully woven into Bankside's medieval street pattern. You will also find out how local workers are actively participating in maintaining these projects, and the health and well-being benefits this brings.

Valerie Beirne, Bankside Urban Forest

Chair: Paul Lincoln, Landscape Institute

Conference room: Sessions

11:05 Break and sponsor exhibition

Conference room: Expo

11:30 Session 3a: Exploring health impact assessment

What are Health Impact Assessments (HIA) and how can they support landscape and land use planning? This session will introduce the concept and methodology of HIAs and consider how (and why) HIA can support the interpretation of Health & Well-Being within the context of landscape/land use planning. This is particularly important now more than ever following Covid-19 and how the focus needs to shift to enable 'A Green Recovery'. Presentation and discussion.

Lee Parry Williams, Public Health Wales

Chair: Jane Findlay CMLI PLI, Landscape Institute

Conference room: Stage

27 January 2021 Agenda

3b. Breakout Session

Tackling health inequality with intelligent digital design

This session will explore how to tackle health inequality with intelligent digital design. Landscape has the potential to positively impact on the health, wellbeing and resilience of our less socially, economically and physically mobile people, if suitably targeted.

How can we help local authorities with this urgent task? Could intelligent landscape design combine with digital mapping to provide a way to speed up the delivery and enable positive change? Alison and Diana will explore some of the issues and potential solutions. Diana will consider how GIS analysis can support and inform prioritisation of landscape interventions, and will explore the range of data available to Local Authorities and landscape professionals to identify priorities at a strategic level. Alison will discuss projects in Thamesmead and Glasgow where delivery of quality, accessible green space is having a measurable impact.

Alison King CMLI, LUC & Diana Manson, LUC

Chair: Laura Schofield CMLI, Landscape Institute

Conference room: Sessions

3c. Breakout Session

Transforming places, transforming Lives

In this session, the Land Trust will uncover the ways in which their approach to green space management transforms the mental and physical wellbeing of users. As supporting evidence, Alan will unpack the Trust's innovative 'Health for Life' project, run in partnership with the Countess of Chester Hospital, and dissect the impact of the Green Angels volunteer training programme, amongst other health initiatives led by the national land management charity.

Alan Carter, Land Trust

Chair: Paul Lincoln, Landscape Institute

Speakers

**Jane Findlay CMLI
PLI**

President of the
Landscape Institute

Jane Findlay is a Landscape Architect, the founding director of Fira and President Elect of the Landscape Institute. She is an experienced masterplanner and designer of the large and complex projects, particularly experienced in the design of the healing landscape for healthcare and delivered some of the most complex healthcare projects in the UK. Jane is passionate about promoting the psychological and physical benefits that quality landscape design plays in all aspects of the public realm. She has developed a specialism in symbolism and remembrance through landscape design. Jane continues to advise the National Memorial Arboretum in South Staffordshire.

Paul Lincoln
Landscape Institute

Paul Lincoln is Executive Director, Creative Projects and Publishing at the Landscape Institute and Commissioning Editor for Landscape, the LI's quarterly journal. Paul managed the LI's 90th Birthday Festival in the Queen Elizabeth Olympic Park and at Chelsea Flower Show. He has curated three exhibitions with the Building Centre, including Beyond the Green Belt and Rethinking the Urban Landscape. He also led the Capability Brown 300th Anniversary Festival project on behalf of the LI.

**Laura Schofield
CMLI**
Landscape Institute

Laura is the LI's Membership Development Manager. Prior to joining the LI, Laura built up her career in multi-disciplinary consultancy, specialising in the delivery of Landscape Management projects and services. As an experienced landscape professional and Chartered Member of the Landscape Institute, Laura brings her knowledge, understanding and passion for the landscape profession to the role. She has supported LI on a range of membership initiatives and projects such as new Entry Standards, Registered Practice scheme, Fellows campaign, and Training Partnerships. She is also engaging with members and practices including through events, the LI's branches, and sector leadership forums.

CPD

Speakers

Julia Thrift is Director of Healthier Place-making at the Town and Country Planning Association (TCPA). She works to facilitate cross-disciplinary collaboration to create well-designed places, spaces and buildings that make it easier for people to live healthier lives. Earlier in her career, Julia was a Director at the Commission for Architecture and the Built Environment (CABE).

Julia Thrift
Town & Country
Planning Association
(TCPA)

Carl Petrokofsky is a Public Health Specialist who has worked for the NHS, Department of Health and Public Health England for over 40 years. Between 2013 – June 2018, he led and managed the 'Healthy Places' programme, focusing on how spatial planning of the built and natural environment and the design of housing and the public realm, active travel and transport, and access to green infrastructure can promote better health and wellbeing. Carl is a Visiting Professor at the University of the West of England (UWE) working with the WHO Collaborating Centre for Healthy Urban Environments.

Carl Petrokofsky
Public Health England

Dr Gemma Jerome is the Director of Building with Nature. Gemma has been developing the benchmark with a team of industry and research specialists since 2015 and is establishing Building with Nature as the 'how to' quality standards for the design, delivery and long-term management and maintenance of nature-rich development. Gemma is a qualified town planner. Through her doctoral studies she examined the role of stewardship in the longevity and resilience of community-scale green infrastructure, with a focus on health and social outcomes associated with access to nature at the residential scale.

Dr Gemma Jerome
Building with Nature

Speakers

Valerie Beirne
Bankside Urban
Forest

With a passion for cities and their people, places and wildlife, Valerie Beirne has 20 years' experience of working within the fields of urban regeneration, placemaking and landscape urbanism. A landscape architect by training, Valerie has worked with central London business improvement district Better Bankside, managing its placemaking strategy Bankside Urban Forest since its launch in 2008. Prior to that Valerie worked in local government, and for local and national environmental charities. Valerie is a member of Urban Design London Design Review Panel for Streets and Public Realm and sits on the Advisory Panel for Greenspace Information for Greater London (GIGL).

Lee Parry Williams
Public Health Wales

Lee Parry Williams has worked in the field of public health since 2001 before joining Wales Health Impact Assessment Support Unit (WHIASU) in 2015. Following graduation worked as a community health development practitioner on a number of Welsh Government funded health improvement programmes before joining the North Wales Public Health Team in 2008. He was first introduced to HIA in 2006 and has since applied HIA across various settings including the voluntary sector, planning, health and local authorities. As part of the WHIASU team Lee is involved in delivering HIA training, supporting and facilitating HIA's, and advocacy of HIA.

Alison King CMLI
LUC

Alison King sees landscape and public realm design as playing an important role in addressing the UK's health inequality crisis. She has designed schemes across a range of sites, including city parks and schools. Understanding the importance of high-quality local landscape and access to nature for all city-dwellers, Alison has developed a monitoring and evaluation method to assess the health and wellbeing impacts of LUC projects, working with the likes of Peabody and The Royal Parks to generate data and a growing evidence base. Alison has spoken at many conferences including Healthy Streets International Summit, and the WHO Health Cities.

Speakers

Diana Manson leads LUC's GIS & Visualisation team. Diana has over 15 years' experience, gained in both the UK and South Africa, and a passion for using GIS to support sustainable planning. Her combination of planning and GIS skills means she is well-placed to lead in the preparation of robust evidence studies. Diana has extensive expertise in open space and play assessments as well as green infrastructure studies. She has a good awareness of the types of data that can support planning for 'healthy' open spaces and where GIS and data analysis can add value to these assessments.

Diana Manson
LUC

Alan Carter is the Director of Portfolio Management for The Land Trust. Alan is responsible for the charity's estates portfolio, ensuring that sites are managed safely and efficiently and are delivering measurable and sustainable impact for local communities. As part of this, Alan is working on a number of significant national partnership programmes with members and stakeholders and is responsible for ensuring that fundraising projects deliver increased charitable outcomes and social value. Alan is a qualified Chartered Surveyor and prior to his current role, worked for British Waterways (now the Canal and River Trust) as a Business Development Manager.

09:05 Session 1: Keynote: The role of GI standards in the promotion of healthy places

This interactive session will explore the health and wellbeing benefits through ecosystems services, and how GI can be designed to deliver these benefits. It will introduce the National Framework of GI Standards, a 25-Year Environment Plan commitment being developed by Natural England with stakeholders to help enhance the nation's green infrastructure provision so that it can play a vital role in greening our towns and cities and in the nation's green recovery from Covid-19. This session will also look at the evidence for the health and wellbeing benefits of green infrastructure. It will discuss the purpose, rationale and content of the emerging National Framework of GI Standards, process maps, GI's mapping and analyses, design guidance and signposting to other relevant standards. You will get an awareness of the opportunities to use the National Framework of GI Standards by local authority planners, neighbourhood planning groups, developers and parks to enhance GI and to deliver health and wellbeing benefits and address inequalities as part of placemaking.

28 January 2021 Agenda

10:00 Session 2a: Designing for an active future

Creating a built environment to support healthy active ageing is essential. Working with the Heart Foundation and experts across Australia, HASSELL have found a solution. Informed by World Health Organisation frameworks, international evidence and Australian policy, this session will provide an in-depth exploration of HASSELL's internationally-recognised Healthy Active By Design (HABD) tool. Now with an active ageing integration, an expansion of existing design principles to encompass a whole life-span approach, the tool provides a strong foundation for constructing an exemplary and inclusive built environment.

Robina Crook, Hassell

Chair: Marcus Grant CMLI, Cities & Health

28 January 2021 Agenda

11:05 Break and sponsor exhibition**Conference room: Expo****11:30 Session 3a: Holistic healthy design: A look at Cranbrook's healthy new town**

How can a health-led approach create a better understanding of sustainable development? The Cranbrook Healthy New Town pilot programme has been working with health services to identify the ways urban form affects health and wellbeing. This session will uncover the robust evidence pinpointing how collaboration, big data and a 'whole person' approach can transform the ways we design for and develop communities.

Kenji Shermer, East Devon District Council**Chair: Marcus Grant CMLI, Cities & Health****Conference room: Stage****3b. Breakout Session****Beyond biodiversity: The hidden health benefits of the urban green roof**

Green Roofs are often a hidden gem within urban environments, offering so much more than the obligatory points and scoring system of sustainability and biodiversity. They offer spaces to rest and relax alongside the added benefit of viewing the world from an elevated perspective. Within this session the types of green roofs that are currently in development will be highlighted, alongside the benefits of green roofs and the considerations to make when specifying a green roof.

Mark Wood, Green-tech**Chair: Carolin Göhler FLI, Landscape Institute Vice President****Conference room: Sessions**

28 January 2021 Agenda

3c. Product Demo**Retrofitting health and wellbeing product demonstration**

This session will consider the use of engineered systems and innovations to maximise the potential of our urban environments to deliver health and wellbeing outcomes.

The following situations will be considered:

- Opportunities for rooftop level innovation to store water, provide amenity and places for exercise
 - Providing recreation and leisure space that also manages water
 - Retrofitting healthy streets – tree pits and SuDS for enhanced wellbeing
- By the end of this session, you will know about challenges and opportunities of rooftop design, Tree Pit and Retrofit SuDS designs and overcoming challenges of retrofitting existing street scenes. It will also uncover how sports and leisure spaces can be used for multifunctional purpose.

Speakers

Marcus Grant CMLI
Cities & Health

Marcus Grant is the past deputy director of the World Health Organization Collaborating Centre for Healthy Cities, Bristol. With a background in ecological systems and urbanism, Marcus is an urban designer and Chartered Landscape Architect. Starting practice in 1986, Marcus worked in consultancy on rural and urban projects, specialising in sustainable development and population health through joining a WHO Collaborating Centre in 1996. Marcus has worked with built environment professionals globally, specialising in the role of city-region spatial frameworks, neighbourhood interventions and biodiversity. Marcus is also a Fellow of the Faculty of Public Health in the UK.

Carolin Göhler FLI
Landscape Institute
Vice President

Carolin Göhler has over 30 years' experience working as a Chartered Landscape Architect and Horticulturalist, with projects mainly delivered for public and third sector clients and employers spanning diverse green spaces, historic, botanic and play gardens. For over a decade as CEO, Carolin ran a charity with a diverse portfolio of countryside and heritage properties. Her particular interests include the promotion of hardy herbaceous perennials, green roofs and usage of ornamental native species within the public realm. Currently Carolin works as a Gardens Consultant for the National Trust, runs her own landscape consultancy and is the LI's Vice President.

Paul Lincoln
Landscape Institute

Paul Lincoln is Executive Director, Creative Projects and Publishing at the Landscape Institute and Commissioning Editor for Landscape, the LI's quarterly journal. Paul managed the LI's 90th Birthday Festival in the Queen Elizabeth Olympic Park and at Chelsea Flower Show. He has curated three exhibitions with the Building Centre, including Beyond the Green Belt and Rethinking the Urban Landscape. He also led the Capability Brown 300th Anniversary Festival project on behalf of the LI.

Speakers

Jane Houghton works at Natural England, where she is project managing the development of a National Framework of Green Infrastructure (GI) Standards, for launch in 2022. This is a commitment in the Government's 25 Year Environment Plan to green our towns and cities, connect people with the natural environment, improve health and wellbeing and address inequalities. In 2020, Jane led on the publication of an evidence review of the health and wellbeing evidence for the GI Standards. Before joining Natural England, Jane worked at the Royal Botanic Gardens Kew, in local authorities as a country park manager, and in NGOs.

Jane Houghton
Natural England

Robina Crook is a Senior Associate at HASSELL and has led the development of the three collaborative phases of the HABD tool since 2013. Her town planning training, urban design expertise and urban strategies understanding has informed the production of the HABD tool. Robina's experience in the private and local government sectors informs all her decision making. A member of the Planning Institute of Australia (PIA) and previously Vice President of the Western Australian branch of PIA and policy officer has also informed a deep understanding of the needs of those designing and creating great public realm.

Robina Crook
Hassell

Sarah Preston is Senior Adviser for the 'Connecting People with Nature' initiative at Natural England and has worked for the organisation since 2006. Currently, she specialises in strategic work, connecting people and their communities with the natural environment for positive physical and mental health outcomes. Sarah is working closely with NHSE to embed this approach more systematically, particularly through the mechanism of social prescribing. Sarah is also Grant Manager for Natural England's Growing Care Farming project, which is being delivered by Social Farms & Gardens. She has previously worked on a number of other Natural England programmes including Walking for Health and Access to Nature.

Sarah Preston
Natural England

Speakers

Iain Tuckett
Coin Street
Community Builders

Iain Tuckett is Group director of Coin Street Community Builders, a social enterprise that believes in mixed uses, a diverse economy and a diverse community. "We want our neighbourhood to be a place where people connect with each other, where they can build their confidence and skills, and feel they belong. Most importantly we want our community and neighbourhood to be resilient to life's challenges." Iain has overseen all Coin Street developments to date including completion of the South Bank riverside walkway, refurbishment of Oxo Tower Wharf for mixed uses, and construction of Coin Street's neighbourhood centre, 'The Green Room' restaurant.

Kenji Shermer
East Devon District
Council

Kenji Shermer has worked as Urban Designer for East Devon District Council for the past 6 years and was Cranbrook Built Environment Lead for the NHS England Healthy New Town Pilot, focussing on evidence to find ways to address the wider determinants of ill-health in commercially-led development. Kenji has a background in design, planning and psychology and is interested in the way our environments affect health and happiness and how this relates to what we like or dislike about the spaces we live in.

Mark Wood
Green-tech

Mark Wood is the Business Development Director for Green-tech Ltd, a leading supplier of products that protect, enhance and improve the landscape environment. With over 20 years' experience of working within the landscaping and construction industries, Mark has witnessed the market develop from large price-driven projects to more environmentally aware developments that improve urban environments, communities and the daily life of residents and workers. Mark sits on the committee of Gro (UK Green Roof Organisation) and was recently involved in the development of the first British Standard for roof garden substrates.

Speakers

Charlotte Markey has an MSc in Urban Planning and 15 years experience working to integrate green infrastructure and SUDs into the built environment. She has worked on several EU funded projects focused on evaluating the impact of green urbanisation innovations on air quality, urban heat island and water management.

09:05 Session 1: Keynote: Creating healthy places – the Singapore experience

The global pandemic has put health infrastructure under the spotlight in every country in the world. This doesn't just mean hospitals, but also community-based health which is crucial to caring for our ageing population, opportunities for integrating wellbeing into our parks and green spaces. Ed Baker will present Singapore as a case study looking at the interrelationship between urban planning, landscape design, the countries and strategic health initiatives and in the context of the Covid-19 response.

This session will also include a recent case study – the Broadway Malyan planned Health City Novena. Commissioned by Singapore's National Healthcare Group and the Singapore Health Ministry, it is an integrated "health city", a 17-hectare mixed-use built around and existing hospital in central Singapore incorporating healthcare, medical education and community uses, as well as the National Centre for Infectious Diseases (NCID) which has become the centre of Singapore's Covid-19 response.

29 January 2021 Agenda

10:00 Session 2a: International responses to a green Covid recovery

Romy gives us an overview of the insight that Vestre has gained during the last 9 months into the Covid-19 response across Scandinavia, the UK, the USA and Germany. The session will explore the similarities and differences in the countries' approach to the pandemic and its impact on the public realm. It will also cover Vestre's learnings about the re-distribution of streets and public space will be presented. The session will cover several aspects of sustainable recovery - the environmental (including greening cities to improve air quality); the economic (reviving areas that have been severely impacted by Covid-19); and social (ensuring previous societal inequalities are not worsened post-Covid).
Romy Rawlings CMLI, Vestre

2b. Breakout Session
How well considered design can improve wellbeing

As we adjust to life with the risk of coronavirus, the great outdoors has never been more important. Join us from the safety of your own home for a virtual presentation discussing how adding green infrastructure through well considered design can make cities healthier places to live, which will enhance wellbeing. You will hear an enlightening presentation from industry expert Euan Taylor (Kinley), with live Q&A at the end of the session.

This interactive session will discuss the value of green space and the impact this has upon wellbeing. It will uncover the landscaping futures: the impact of landscape design on community confidence. You will also be inspired by Kinley's landscape edging and raised planter solutions.

Euan Taylor, Kinley

Chair: Darren Bowie, Kinley

29 January 2021 Agenda

2c. Breakout Session

Play in the place: the positive impact of community play on children's development and wellbeing

Enhancing green spaces and play within the public realm is key to ensure that children have the right tools to improve their development. In this session we will discuss the social, mental and physical benefits of play for children, from using nature's own source - water, wind, light to adding informal play offerings in green spaces. We'll explore the history of children's roaming within in cities, discuss why it's critical to ensure that there are a variety of play experiences for children in any play space and review the social, physical and mental benefits of play spaces.

Conference room: Stage

29 January 2021 Agenda

3b. Breakout Session

Health, wellbeing and sustainable urban design

This presentation will discuss how towns and cities will continue to change in the coming weeks and months in response to the Covid19 crisis. During this session Howard will draw on David Rudlin, Director of URBED and past Chair of the Academy of Urbanism expertise and work recently completed for the Quality of Life Foundation and on the Government's National Model Design Code. David will try and find solutions on what needs to be done to promote healthy places which contributes to our quality of life. Also discussing the constraints with current guidance, we often know what good looks like but struggle to achieve it. By the end of this session, you will know the range of best practices for so-called #Covid19Streets and how these will impact our streets and public spaces. You will find out about the ways in which people move, interact and transact in buildings and urban places. We will also uncover Healthy streets approach - discussing range of resources available that will assist in planning and designing of our necessary green spaces.

Speakers

Professor Anna Jorgensen
University of Sheffield

Anna Jorgensen is the Head of the Department of Landscape Architecture at the University of Sheffield. Anna holds a professorship in urban natural environments, health and wellbeing. Anna recently led the RCUK-funded research project Improving Wellbeing through Urban Nature (<http://iwun.uk/>) and is currently working with partners in Europe and Latin America on a Horizon 2020 research and innovation project entitled CONEXUS: Co-producing NBS and restored ecosystems - transdisciplinary nexus for urban sustainability.

Adam White FLI PPLI
Immediate Past-President, Landscape Institute

Adam White is the Immediate Past President of the Landscape Institute (LI). Adam was made a Fellow of the LI for his influential role changing how UK play spaces are designed to now take a more natural and landscape led approach. Adam is also a Chartered Landscape Architect and in 2008 he established Davies White Ltd with fellow landscape architect Andrée Davies. Their projects focus on reconnecting children with nature through play. Adam is the author of the Play England publication Managing and Maintaining Nature Play Spaces. During 2019 they worked with HRH The Duchess of Cambridge to co-design four high profile RHS.

Ed Baker
Broadway Malyan

Ed is a qualified master planner, urban designer and landscape architect with over 20 years' experience. Currently based in Broadway Malyan's Singapore studio, Ed is a creative designer with extensive experience leading a number of high profile international projects in Asia Pacific, Middle East, Europe and Africa. Ed's passion lies in the creation of sustainable places: new city planning, the regeneration of urban districts, designing city parks and transit oriented development. Ed regularly speaks at conferences on a range of planning, urban design and landscape design related subjects including resilient cities, transit oriented development, mixed-use development and place making.

Speakers

Romy Rawlings is a Chartered Landscape Architect and Commercial Director for Vestre Ltd, a Norwegian manufacturer of street furniture. Romy's entire career has been based in the landscape sector, and she is passionate about the impact of good design upon those using outdoor space. She believes that landscape architects are well placed to counter many of today's global issues, including climate change, air and water quality, social inequalities etc. Romy is an active member of the LI, and has previously been a Board member, Technical Committee member, and Chair of their Diversity & Inclusion working group.

Mark Grimshaw
Timberplay

Mark Grimshaw is passionate about engaging with the environment and wants children to develop via natural play opportunities. Mark holds a degree in Geography from Lancaster University, and a Masters in Urban Regeneration and Development from University of Manchester. His role at Timberplay has seen him working with Landscape Architects on play projects across the UK - most recently on, the LI Excellence in Public Health and Wellbeing award nominee project, Catherine Street Inclusive Play Park. Prior to joining Timberplay he spent the previous 12 years in a project management capacity at a Community Interest Company leading their landscape contracting division.

**Jane Findlay CMLI
PLI**
President of the
Landscape Institute

Jane Findlay is a Landscape Architect, the founding director of Fira and President Elect of the Landscape Institute. She is an experienced masterplanner and designer of the large and complex projects, particularly experienced in the design of the healing landscape for healthcare and delivered some of the most complex healthcare projects in the UK. Jane is passionate about promoting the psychological and physical benefits that quality landscape design plays in all aspects of the public realm. She has developed a specialism in symbolism and remembrance through landscape design. Jane continues to advise the National Memorial Arboretum in South Staffordshire.

David Rudlin
URBED

David Rudlin is the director of URBED, past Chair of the Academy of Urbanism and Honorary Professor at Manchester University. In 2014 he was the winner of the Wolfson Economics Prize and last year published his third book Climax City written with Shruti Hemani through RIBA Publishing. He also writes a monthly column for BD Magazine. David is one of the principle authors of the National Model Design Code for MHCLG and the Quality of Life Framework for the Quality of Life Foundation, both published in January 2021

 **Speakers**

Howard Gray is the PR & Specification Consultant Team Leader for GreenBlue Urban. He has been planting trees in urban areas for over 40 years and is passionate about ensuring that every tree has the same opportunity of realising its species potential. Understanding the many conflicts, both financial and engineering, with planting in our congested towns and cities, Howard works with designers and contractors to achieve the best result. Having worked on a number of SuDS schemes across Europe, Howard is uniquely positioned to present the GreenBlue Urban vision - enabling sustainable cities through the use of green and blue infrastructure.

Howard Gray
GreenBlue Urban

Kristina Causer has been creating playful environments for over 16 years, working in partnership with Local Authorities and landscape architects in the UK and Sweden. Passionate about the right of all children to play, Kristina was one of the founding authors of the PiPA (Plan Inclusive Play Areas) toolkit - a publication to help guide better inclusive design which is now widely used in procurement processes in the UK. Kristina leads the Innovation Hub of research and creative development at Jupiter Play, tackling key issues such as sustainability in the supply chain as well as championing the Sustainable Shoots programme.

GreenBlue Urban

Founded in 1992 Greenblue Urban was set up to research and provide solutions for assisting trees in their battle to establish in urban spaces. Onsite manufacturing using 100% recycled materials allows global distribution along with continuous product development ensures that specifiers and clients alike are using the best tree pit package products available in the world.

The GreenBlue Urban Arborsystem brings together the key elements of successful tree pit design and simplifies the planning and installation process. Landscape professionals can combine SuDS, root management, structural soil components, aeration, irrigation and chose an appropriate above ground surface grille and vertical guard in a single package.

Vestre

Vestre is a Scandinavian manufacturer of beautiful, inclusive, and durable urban furniture. For more than 70 years, we have helped create caring meeting places for millions of people.

We never compromise when it comes to material quality, lifespan and the environment; our products are manufactured only in Scandinavia and Vestre is the first company to manufacture carbon-neutral outdoor furniture (we've done so for over 10 years).

In addition, we have made a long-term commitment to sustainability in all parts of our operations and have embedded nine of the UN's Sustainable Development Goals within our business plan.

The Land Trust

The Land Trust vision is to improve the quality of people's lives by creating sustainable, high quality green spaces that deliver environmental, social and economic benefits. Passionate about identifying cost effective solutions to deliver high quality and sustainably maintained open space,

The Land Trust work with land owners who, for a variety of reasons, want to pass on responsibility (and often liability) for the management of an area of land. Ahead of taking responsibility and 'ownership' we will identify and secure appropriate long-term funding (often in perpetuity) and management regimes, ensuring that the site has a sustainable future as green open space and crucially that it delivers against our charitable objectives.

Now having ownership or long term management responsibility for over 2,000 ha of land with more than 60 spaces across England, The Land Trust are currently working on taking our first sites in Scotland.
