## Table of Contents

A Note to Instructors ..... 3
Module 1: Introduction to Managerial Accounting ..... 4
Module 2: Cost Concepts and the Schedule of Cost of Goods Manufactured ..... 7
Module 3: Job-Order Costing ..... 13
Module 4: Process Costing ..... 22
Module 5: Activity-Based Costing ..... 31
Module 6: Cost Behaviour ..... 36
Module 7: Cost-Volume-Profit Analysis ..... 42
Module 8: Budgeting ..... 50
Module 9: Standard Costs and Variance Analysis ..... 62
Module 10: Flexible Budgeting ..... 69
Module 11: Performance Measurement: ROI, Residual Income and the Balanced Scorecard ..... 72
Module 12: Relevant Costs for Decision Making ..... 76
Module 13: Capital Budgeting ..... 86

## A Note to Instructors

I hope you find this workbook useful, I just want to point out three key features:
1.) This book is totally free to you and your students. Feel free to copy it or post it to your course website and feel free to share it with colleagues.
2.) Although I am widely distributing a PDF file, I have gone to great effort to make a fully editable Word version of this document. Please contact me if you'd like to have a copy of the Word version. You can edit any of these problems to better fit in your class or simply copy and paste an entire problem into an assignment or test, with the attribution "Source: accountingworkbook.com", or "Adapted from: accountingworkbook.com".
3.) Every problem in this workbook has a video walkthrough available at http://accountingworkbook.com. I suspect the true value in this book lies in the video walkthroughs, as it will be useful for homework and particularly useful for "flipping the classroom".

Please let me know if you would like to see additional question-types or topics included in the future. I intend to add to this book frequently based on your input. Also, any feedback you can provide (particularly student feedback) would be greatly appreciated.

Please note, you do not have my permission to use this for a commercial purpose, nor do you have permission to recreate the videos found at http://accountingworkbook.com. Send me an email if you have any questions about use or attribution.

Thanks for checking out this workbook, and I hope you'll have a look at the companion website: http://accountingworkbook.com!

Module 1: Introduction to Managerial Accounting

## Author's note regarding Module 1 content:

This workbook was created to mirror most introductory management accounting textbooks; as such, this is an unusual module. The first chapter in most textbooks is composed of purely qualitative content and this workbook was built to match. Subsequent modules in this workbook will have A and B versions of numerical questions to allow students the opportunity to practice.

1-1 - Financial vs Managerial Accounting
Distinguish between financial and managerial accounting.

## 1-2-Ethics

Explain the importance of ethics in accounting.

## 1-3 - Planning, Directing and Controlling

The three main tasks of a manager are said to be planning, directing and controlling. Explain the three tasks.

1-4 - Terminology and acronyms
Define: JIT, TQM, ABC, theory of constraints, Six Sigma, and the balanced scorecard.

Module 2: Cost Concepts and the Schedule of Cost of Goods Manufactured

## 2-1A - Cost Classification

The following are costs of Big Rig Trucks, a manufacturer of large diesel vehicles.
1.) Aluminum used in manufacturing each truck's body.
2.) Factory supervisor's salary.
3.) Company president's salary.
4.) Cleaning supplies used for daily cleanup.
5.) Wages of workers who build the engines.
6.) Patent lawyer's costs.
7.) Accounting fees.
8.) Depreciation on sales person's car.

## Required:

For each cost, identify it as:
a.) Variable or Fixed
b.) Product or Period
c.) Direct Material, Direct Labour, Manufacturing Overhead, Selling, Administrative or Research and Development.

## 2-1B - Cost Classification

The following are costs of Betty's Burger Truck - a food truck operating in downtown Seattle.
1.) Cooks' wages.
2.) Propane costs to heat the grill.
3.) Gasoline costs to travel to events.
4.) Painting company logo on the side of the truck.
5.) Business license.
6.) Depreciation on the cooking equipment.
7.) Costs of improving the recipe for new bison burger.
8.) Burger meat.

## Required:

For each cost, identify it as:
a.) Variable or Fixed
b.) Product or Period
c.) Direct Material, Direct Labour, Manufacturing Overhead, Selling, Administrative or Research and Development.

## 2-2A - Schedule of Cost of Goods Manufactured

Kelowna Plumbing Supplies shows the following data related to its December 31, 2017 fiscal year:

| Raw materials inventory, January 1, 2017 | $\$ 5,000$ |
| :--- | ---: |
| Raw materials inventory, December 31, 2017 | 8,000 |
| Work in process inventory, January 1, 2017 | 23,000 |
| Work in process inventory, December 31, 2017 | 21,000 |
| Finished goods inventory, January 1, 2017 | 16,000 |
| Finished goods inventory, December 31, 2017 | 10,000 |
| Advertising | 56,000 |
| Factory supervisor's salary | 42,000 |
| Company president's salary | 85,000 |
| Property taxes - factory | 25,000 |
| Depreciation - factory | 35,000 |
| Factory maintenance | 7,000 |
| Sales commissions | 32,000 |
| Depreciation - office | 2,000 |
| Utilities expense - factory | 23,000 |
| Utilities expense - office | 11000 |
| Purchases of raw materials | 148,000 |
| Direct labour | 160,000 |

## Required:

Based on the information above, prepare a schedule of cost of goods manufactured.

## 2-2B - Schedule of Cost of Goods Manufactured

Vernon Bakery shows the following data related to its August 31, 2017 fiscal year:

| Raw materials inventory, September 1,2016 | $\$ 2,400$ |
| :--- | ---: |
| Raw materials inventory, August 31, 2017 | 1,600 |
| Work in process inventory, September 1, 2016 | 200 |
| Work in process inventory, August 31, 2017 | 150 |
| Finished goods inventory, September 1, 2016 | 1,000 |
| Finished goods inventory, August 31, 2017 | 900 |
| Rent on the commercial kitchen | 12,000 |
| Depreciation of delivery vehicle | 1,500 |
| Salary paid to head baker | 42,000 |
| Purchases of raw materials | 58,000 |
| Delivery costs | 2,500 |
| Utilities expense - office | 600 |
| Depreciation - kitchen equipment | 2,000 |
| Dividends paid to shareholders | 10,000 |
| Utilities expense - kitchen | 1,200 |
| Marketing | 3,000 |
| Wages paid to kitchen cleaning staff | 16,000 |
| Wages paid to assistant bakers | 65,000 |

## Required:

Based on the information above, prepare a schedule of cost of goods manufactured.

## 2-3A - Schedule of COGM, Schedule of COGS and Income Statement

Outdoor Supplies manufactures gear for hunting and camping. The company shows the following data related to its December 31, 2017 fiscal year end:

| Raw materials inventory, January 1, 2017 | $\$ 14,000$ |
| :--- | ---: |
| Raw materials inventory, December 31, 2017 | 17,000 |
| Work in process inventory, January 1, 2017 | 31,000 |
| Work in process inventory, December 31, 2017 | 20,000 |
| Finished goods inventory, January 1, 2017 | 84,000 |
| Finished goods inventory, December 31, 2017 | 68,000 |
| Direct labour | 275,000 |
| Factory supervisor's wages | 64,000 |
| Company president's salary | 120,000 |
| Purchases of raw materials | 425,000 |
| Depreciation (60\% factory, 40\% office) | 240,000 |
| Property taxes (80\% factory, 20\% office) | 20,000 |
| Sales commissions | 100,000 |
| Repairs and maintenance (100\% relate to the factory) | 15,000 |
| Utilities expense (90\% factory, $10 \%$ office) | 30,000 |
| Sales revenue | $2,050,000$ |
| Advertising | 215,000 |

## Required:

Based on the information above:
a.) Prepare a schedule of cost of goods manufactured.
b.) Prepare a schedule of cost of goods sold.
c.) Prepare an income statement (assuming a tax rate of $20 \%$.)

## 2-3B - Schedule of COGM, Schedule of COGS and Income Statement

HiSing manufactures beverages for the Taiwanese market. The following data relate to its July 31, 2017 fiscal year end:

| Raw materials inventory, August 1, 2016 | $\$ 185,000$ |
| :--- | ---: |
| Raw materials inventory, July 31, 2017 | 140,000 |
| Work in process inventory, August 1, 2016 | 25,000 |
| Work in process inventory, July 31, 2017 | 35,000 |
| Finished goods inventory, August 1, 2016 | 375,000 |
| Finished goods inventory, July 31, 2017 | 390,000 |
| Direct labour | $1,200,000$ |
| Sales commissions | 400,000 |
| Factory supervisors' wages | 240,000 |
| Company president's salary | 250,000 |
| Purchases of raw materials | $3,250,000$ |
| Property taxes (75\% factory, 25\% office) | 100,000 |
| Depreciation (90\% factory, 10\% office) | $1,700,000$ |
| Repairs and maintenance (95\% factory, 5\% office) | 200,000 |
| Utilities expense (90\% factory, 10\% office) | 600,000 |
| Sales revenue | $10,300,000$ |
| Advertising | $2,000,000$ |

## Required:

Based on the information above:
d.) Prepare a schedule of cost of goods manufactured.
e.) Prepare a schedule of cost of goods sold.
f.) Prepare an income statement (assuming a tax rate of $25 \%$.)

Module 3: Job-Order Costing

## 3-1A - Job Order Costing vs Process Costing

For each of the companies listed below, note which costing method would be more appropriate: Job Order Costing (J), or Process Costing (P):
a.) A company that does car repair
b.) A company that does architectural design
c.) A company that makes yoga mats
d.) A company that gives immigration consulting advice
e.) A company that refines oil into gasoline
f.) An accounting firm
g.) A company that manufactures crayons
h.) A company that makes designer handbags

## 3-1B - Job Order Costing vs Process Costing

For each of the companies listed below, note which costing method would be more appropriate: Job Order Costing (J), or Process Costing (P):
a.) A company that produces cutlery
b.) An engineering company
c.) A home renovation contractor
d.) A fire extinguisher manufacturer
e.) A custom cabinet manufacturer
f.) A pop songwriter
g.) A cellphone maker
h.) A cellphone repair shop

## 3-2A - Predetermined overhead rate: costing an individual job

Tony's Tables makes high-end, custom boardroom tables. The company applies overhead costs to jobs on the basis of direct labour hours. The company estimates manufacturing overhead for the year to be $\$ 320,000$. The company expects its direct labour workforce to work for 20,000 hours during the year.

Job \#1843 shows the following cost information:
Walnut: $\quad 300$ board feet used at a cost of $\$ 15$ per board foot.
Labour: $\quad 240$ hours at a cost of $\$ 20$ per hour.

## Required:

a.) Compute the cost of the job.
b.) Assuming the company marks up their price to by three times the cost, what will the company charge its customer for the table?

## 3-2B - Predetermined overhead rate: costing an individual job

Ready Brakes specializes in brake repair in automobiles. The company applies overhead costs to jobs on the basis of direct labour hours. For the current year, total manufacturing overhead was expected to cost $\$ 50,000$. The total expected direct labour hours were anticipated to be 8,000 . The company was working on job \#842, a brake pad replacement on a Volkswagen Golf. The following costs were incurred:

New Brake Pads: \$8
Labour: $\quad 40$ minutes of employee time - wage rate of $\$ 9$ per hour.

## Required:

a.) Determine the cost of the job.
b.) Assuming the company charges a flat rate of $\$ 50$ to replace brake pads, how much gross profit will have been earned on Job \#842?

## 3-3A - Predetermined Overhead Rate, Overapplied and Underapplied Overhead

Cabinets 4 U makes and installs custom cabinets for home renovations. The company applies overhead on the basis of direct labour hours. The company estimates its annual overhead to be $\$ 125,000$ and it expects employees to work 10,000 hours. During the year, employees actually worked 11,000 hours and the actual amount spent on overhead was $\$ 130,000$.

## Required:

a.) Compute the predetermined overhead rate.
b.) How much overhead would be applied to jobs during the year?
c.) By how much was overhead overapplied or underapplied for the year?

## 3-3B - Predetermined Overhead Rate, Overapplied and Underapplied Overhead

Jake's Autobody is a car repair shop. The company uses direct labour cost as a basis for applying manufacturing overhead costs to jobs. The company estimates its annual overhead to be $\$ 140,000$ and it expects employees to work 20,000 hours at an average wage rate of $\$ 12$ per hour. During the year, employees actually worked 18,000 hours (at a wage rate of $\$ 12.25$ per hour) and the actual amount spent on overhead was $\$ 150,000$.

## Required:

a.) Compute the predetermined overhead rate.
b.) How much overhead would be applied to jobs during the year?
c.) By how much was overhead overapplied or underapplied for the year?

## 3-4A - Journal Entries of Job Order Costing

Intercity Roofing manufactures and installs custom shingles for use on damaged roofs of residential houses and apartments. The company uses a specialized manufacturing process to ensure the replacement shingles are an exact match with the existing roof. The company uses a job order costing system to apply manufacturing overhead on the basis of direct labour cost. The company estimates that during the next year, it will incur $\$ 70,000$ in overhead costs and will pay $\$ 140,000$ in direct labour costs. During the year, the following transactions occurred:
a.) Purchased $\$ 180,000$ of direct materials on account.
b.) Purchased $\$ 5,000$ of supplies on account. (The supplies consisted of glue and cleaning supplies.)
c.) Requisitioned $\$ 170,000$ of direct materials and $\$ 4,500$ of supplies for use in production.
d.) Incurred employee costs:
i. Direct labour $\$ 150,000$
ii. Indirect labour 40,000
iii. Administrative salaries 190,000
iv. Sales salaries 30,000
v. Sales commissions 90,000
e.) Advertised on local television: $\$ 5,000$
f.) Rent: $\$ 12,000$. $40 \%$ of the space related to sales offices, $60 \%$ was a shop used in production of roofing materials.
g.) Depreciation: $\$ 25,000.70 \%$ relates to roofing equipment, $30 \%$ relates to office equipment.
h.) Insurance expired: $\$ 15,000.90 \%$ relates to the factory, the remainder relates to insurance on the office equipment.
i.) Manufacturing overhead costs were applied to production.
j.) Goods costing $\$ 375,000$ were completed.
k.) The company had sales on account of $\$ 800,000$. According to cost data, the jobs cost $\$ 350,000$.

Required:
a.) For items a.)-k.) above, record journal entries. Unless otherwise noted, assume all transactions were on account.
b.) Was overhead overapplied or underapplied for the period? By how much?
c.) Record a journal entry to close overhead to cost of goods sold.
d.) Based on the information above, prepare an income statement for the company - assume a $20 \%$ tax rate.

## 3-4B - Journal Entries of Job Order Costing

Ace Cakes makes cakes and desserts for all festive occasions. The company uses a job order costing system to allocate manufacturing overhead costs to jobs on the basis of direct labour hours. The company's wages are unusually high as it employs highly skilled pastry chefs in making desserts and pays its chefs $\$ 25$ per hour. The company anticipates overhead costs for the upcoming year to be $\$ 150,000$ and expects to see its pastry chefs work for a combined total of 16,000 hours. The following transactions occurred during the year:
a.) Purchased $\$ 250,000$ of direct materials on account.
b.) Purchased $\$ 10,000$ of cleaning supplies on account.
c.) Requisitioned $\$ 240,000$ of direct materials and $\$ 9,500$ of supplies for use in production.
d.) Incurred employee costs:
i. Direct labour $\$ 450,000$
ii. Indirect labour 50,000
iii. Administrative salaries 200,000
iv. Sales wages 80,000
e.) Advertising: $\$ 3,000$
f.) Property taxes: $\$ 8,000.10 \%$ of the space related to sales offices, $90 \%$ was the kitchen.
g.) Depreciation: $\$ 55,000.80 \%$ relates to kitchen equipment, $20 \%$ relates to office equipment.
h.) Insurance expired: $\$ 15,000.90 \%$ relates to the kitchen, the remainder relates to insurance on the office equipment.
i.) Manufacturing overhead costs were applied to production.
j.) Desserts costing $\$ 790,000$ were completed.
k.) The company had sales on account of $\$ 1,800,000$. According to cost data, the jobs cost $\$ 720,000$.

Required:
a.) For items a.)-k.) above, record journal entries. Unless otherwise noted, assume all transactions were on account.
b.) Was overhead overapplied or underapplied for the period? By how much?
c.) Record a journal entry to close overhead to cost of goods sold.
d.) Based on the information above, prepare an income statement for the company - assume a $25 \%$ tax rate.

Module 4: Process Costing

## 4-1A - Production Report

Bertuzzi Tires has three departments. Its first department (the Processing Department) shows the following data for the month of July:

Work in process, beginning:
Units in process $\quad 8,000$
Stage of completion with respect to materials $80 \%$
Stage of completion with respect to conversion 35\%
Costs in the beginning inventory:
Materials cost $\quad \$ 110,500$
Labour cost \$33,000
Overhead cost \$26,000

Units started into production during the month 94,000
Units completed and transferred out 92,000
Costs added to production during the month:
Materials cost \$950,000
Labour cost \$310,000
Overhead cost \$170,000
Work in process, ending:
Units in process ???
Stage of completion with respect to materials $90 \%$
Stage of completion with respect to conversion $60 \%$

## Required:

Using the weighted average method, prepare a production cost report for the company.
4-1B - Production Report
Ritchie Company has two departments. Its first department (the Melting Department) shows thefollowing data for the month of April:Work in process, beginning:
Units in process ..... 400
Stage of completion with respect to materials ..... 60\%
Stage of completion with respect to conversion ..... 85\%
Costs in the beginning inventory:
Materials cost ..... \$170
Labour cost ..... \$160
Overhead cost ..... \$300
Units started into production during the month ..... 1,100
Units completed and transferred out ..... 1,400
Costs added to production during the month: Materials cost ..... \$1,300
Labour cost ..... $\$ 800$
Overhead cost ..... \$1,700
Work in process, ending:
Units in process ..... ???
Stage of completion with respect to materials ..... 70\%
Stage of completion with respect to conversion ..... 80\%

## Required:

Using the weighted average method, prepare a production cost report for the company.

## 4-2A - Production Report

Stable Platforms manufactures tables. Materials are added at the beginning of the process and conversion costs are incurred evenly throughout the process. Data for February follows:
Production Data

|  | Units | Percent Complete |
| :--- | ---: | :---: |
| Units in process, February 1 | 120 | $75 \%$ |
| Units started into production | 380 |  |
| Units in process, February 28 | 100 | $50 \%$ |

## Cost Data

| Work in process, Feb 1: |  |
| :--- | ---: |
| Materials | $\$ 1,000$ |
| Labour | 500 |
| Manufacturing overhead | 750 |

| Costs added: |  |
| :--- | ---: |
| Materials | $\$ 4,000$ |
| Labour | 300 |
| Manufacturing overhead | 2,500 |

## Required:

Using the weighted average method, prepare a production cost report for the company.

## 4-2B - Production Report

Daring Watercraft manufactures small boats. Materials are added at the beginning of the process and conversion costs are incurred evenly throughout the process. Data for April follows:
Production Data

|  | Units | Percent Complete |
| :--- | :---: | :---: |
| Units in process, April 1 | 1000 | $60 \%$ |
| Units started into production | 4000 |  |
| Units in process, April 30 | 1500 | $20 \%$ |

## Cost Data

| Work in process, April 1: |  | $\$ 25,500$ |  |
| :--- | ---: | :--- | ---: |
| Materials | 3,000 |  |  |
| Labour | 6,000 |  | $\$ 90,000$ |
| Manufacturing overhead |  | 12,000 |  |

## Required:

Using the weighted average method, prepare a production cost report for the company.

## 4-3A - Production Report

Mom's Cookies has two departments, Baking and Packaging. Raw materials are introduced at the beginning of the baking process. The following is the department's work in process TAccount for May:

| Work in Process - Baking Department |  |  |
| :--- | ---: | :--- | :--- |
| May 1 balance: (50 kilograms; $60 \%$ complete as to | 750 | Completed and transferred to the |
| packaging department (_? kilograms) |  |  |
| conversion) |  |  |
| Materials: | 7,035 |  |
| Labour | 1,500 |  |
| Overhead | 9,400 |  |
|  |  |  |
| May 31 balance (40 kilograms) | $\ldots$ |  |

The beginning work in process includes material of $\$ 250$, labour of $\$ 100$, and overhead of $\$ 400$.

## Required:

Using the weighted average method, prepare a production cost report for the company.

## 4-3B - Production Report

Traffic Control Systems makes bright rubber traffic cones. The company has two departments, Melting and Forming. Raw materials are introduced at various stages throughout the melting process. The following is the department's work in process T-Account for August:

| Work in Process - Melting Department |  |  |
| :--- | ---: | :--- |
| Aug 1 balance: (200 kilograms; 80\% complete as to |  | Completed and transferred to the |
| materials, $70 \%$ complete as to conversion) | 352 | packaging department ( $\_$? kilograms) |
| Costs added: |  |  |
| Materials (2,050 kilograms) | 400 |  |
| Labour | 2,000 |  |
| Overhead |  |  |
|  |  |  |
| Aug 31 balance (40 kilograms, $50 \%$ complete as to | $\ldots$ |  |
| materials, $60 \%$ complete as to conversion) | $\ldots$ |  |

The August 1 work in process includes material of $\$ 100$, labour of $\$ 52$, and overhead of $\$ 200$.
Required:
Using the weighted average method, prepare a production cost report for the company.
4-4A - Production Report - FIFOBertuzzi Tires has three departments. Its first department (the Processing Department) shows thefollowing data for the month of July:
Work in process, beginning:
Units in process ..... 8,000
Stage of completion with respect to materials ..... 80\%
Stage of completion with respect to conversion ..... 35\%
Costs in the beginning inventory:
Materials cost ..... \$110,500
Labour cost ..... \$33,000
Overhead cost ..... \$26,000
Units started into production during the month ..... 94,000
Units completed and transferred out ..... 92,000
Costs added to production during the month:
Materials cost ..... \$950,000
Labour cost ..... \$310,000
Overhead cost ..... \$170,000
Work in process, ending:
Units in process ..... ???
Stage of completion with respect to materials ..... 90\%
Stage of completion with respect to conversion ..... 60\%

## Required:

Using the FIFO method, prepare a production cost report for the company.
4-4B - Production Report - FIFO
Ritchie Company has two departments. Its first department (the Melting Department) shows thefollowing data for the month of April:Work in process, beginning:
Units in process ..... 400
Stage of completion with respect to materials ..... 60\%
Stage of completion with respect to conversion ..... 85\%
Costs in the beginning inventory:
Materials cost ..... \$170
Labour cost ..... \$160
Overhead cost ..... \$300
Units started into production during the month ..... 1,100
Units completed and transferred out ..... 1,400
Costs added to production during the month: Materials cost ..... \$1,300
Labour cost ..... $\$ 800$
Overhead cost ..... \$1,700
Work in process, ending:
Units in process ..... ???
Stage of completion with respect to materials ..... 70\%
Stage of completion with respect to conversion ..... 80\%

## Required:

Using the FIFO method, prepare a production cost report for the company.

# Module 5: Activity-Based Costing 

## 5-1A -Activity Based Costing

E-Scoot plans to manufacture electric scooters for urban commuters. The company expects to have two models, the "Commuter" and the "Range" models. The company will use activitybased costing to apply its estimated $\$ 145,000$ of overhead costs to its products. Information about its overhead follows:

| Activity (Cost Driver) | $\underline{y y y y}$ | Estimated MOH |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  |  | $\underline{\text { Total }}$ | $\underline{\text { Commuter }}$ | $\underline{\text { Range }}$ |  |
| Assembly (Labour Hours) | $\$ 20,000$ | 10,000 | 6,000 | 4,000 |  |
| Quality control (Inspection Hours) | 35,000 | 2,000 | 600 | 1,400 |  |
| Parts Admin (Number of Parts) | $\underline{90,000}$ | 100 | 40 | 60 |  |

The following cost data is known:

|  | Commuter | Range |
| :--- | ---: | ---: |
| Direct Materials | $\$ 600$ | $\$ 900$ |
| Direct Labour | 250 | 400 |
| Number of units produced | 250 units | 150 units |

The company has not yet determined its planned selling price, but knows that the average price for competitors of the Commuter model is $\$ 1,200$. For the Range model, competitors are priced at $\$ 1,700$ on average.

## Required:

a.) Compute the activity rates for each activity.
b.) Determine the expected unit cost of each product.
c.) If E-Scoot prices its products in line with competitors, what will the margins be on each product? The largest competitors have gross profit margins of $23 \%$, how does E-Scoot compare?

## 5-1B -Activity Based Costing

EgoDrone Inc. manufactures two models of "Selfie Drones" - small toy helicopters which follow users around taking aerial video while the user participates in extreme sports. Whether the user is rafting down a raging river, or renewing their life insurance, all activities can be documented by the products two models: "Sport" or "Pro". The company will use activity-based costing to apply its estimated $\$ 350,000$ of overhead costs to its products. Information about its overhead follows:

| Activity (Cost Driver) | $\underline{y y y y}$ | Estimated MOH |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  |  | $\underline{\text { Total }}$ | $\underline{S p o r t}$ | $\underline{\text { Pro }}$ |  |
| Assembly (Machine Hours) | $\$ 40,000$ |  | 5,000 | 3,000 | 2,000 |
| Quality control (\# of inspections) | 110,000 | 550 | 250 | 300 |  |
| Machine Setups (\# of Setups) | $\underline{200,000}$ |  | 200 | 70 | 130 |

The following cost data is known:

|  | $\underline{\text { Sport }}$ | $\underline{\text { Pro }}$ |
| :--- | ---: | ---: |
| Direct Materials | $\$ 300$ | $\$ 500$ |
| Direct Labour | 50 | 80 |
| Number of units produced | 250 units | 150 units |

## Required:

a.) Compute the activity rates for each activity.
b.) Determine the expected unit cost of each product.

## 5-2A - Comparing Traditional Costing and Activity Based Costing

Double Bounce Trampolines produces two models of trampolines for backyard fun. The "Original", and the recently introduced "Deluxe". The Deluxe model introduced several safety features that were intended to scare overly protective parents into upgrading. Since its introduction, the deluxe model has been increasing in sales, but at the same time, the company's profits have been declining. The CFO believes that the company's traditional costing system may be to blame. Currently, the company uses direct-labour hours as the basis for applying overhead. The company estimates that it will incur $\$ 600,000$ in overhead costs in the next year.

The following cost data is known:

|  | Original | Deluxe |
| :--- | ---: | ---: |
| Direct Materials | $\$ 50$ | $\$ 75$ |
| Direct Labour (\$10 per hour) | 20 | 30 |
| Number of units produced | 7,000 units | 2,000 units |

The CFO wishes to explore an activity-based costing system

| Activity (Cost Driver) | $\underline{y y y y y}$ | Estimated MOH |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
|  |  | $\underline{T o t a l}$ | $\underline{S t a n d a r d}$ | $\underline{\text { Deluxe }}$ |  |
| Assembly (Labour Hours) | $\$ 100,000$ |  | 20,000 | 14,000 | 6,000 |
| Receiving (Receiving Reports) | 200,000 |  | 4,000 | 2,000 | 2,000 |
| Testing (Number of Tests) | $\underline{300,000}$ |  | 1,000 | 200 | 800 |

## Required:

a.) Under the traditional costing method:
i. Compute the predetermined overhead rate.
ii. Determine the unit cost of each product.
b.) Under activity based costing:
i. Compute the activity rates for each activity.
ii. Determine the expected unit cost of each product.
c.) Compare and comment on your answers from parts a.) and b.) above.
d.) If ABC produces more accurate cost data, why is it not more widely used?

## 5-2B - Comparing Traditional Costing and Activity Based Costing

You're in Hot Water Inc. manufactures Jacuzzi hot tubs. The company produces two models, the "Basic" and the "Superjet" which promises a jet power setting that "borders on cruel". Since the introduction of the Superjet, the company's profits have been faltering, despite increased sales. The company's senior accountant believes that the costing system may be causing problems. The company uses direct-labour hours as the basis for applying overhead. Overhead is estimated to be $\$ 300,000$.

The following cost data is known:

|  | $\underline{\text { Basic }}$ | $\underline{\text { Superjet }}$ |
| :--- | ---: | ---: |
| Direct Materials | $\$ 700$ | $\$ 1200$ |
| Direct Labour (\$15 per hour) | 60 | 90 |
| Number of units produced | 600 units | 100 units |

The CFO wishes to explore an activity-based costing system

| Activity (Cost Driver) | Estimated MOH |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: | ---: |
| Expected Activity |  |  |  |  |  |
|  |  | $\underline{\text { Total }}$ | $\underline{\text { Basic }}$ | $\underline{\text { Superjet }}$ |  |
| Assembly (Labour Hours) | $\$ 60,000$ |  | 3,000 | 2,400 | 600 |
| Quality control (Inspection Hours) | 75,000 |  | 800 | 600 | 200 |
| Machining (Machine Hours) | 25,000 |  | 40,000 | 30,000 | 10,000 |
| Parts Admin (Number of Parts) | $\underline{140,000}$ |  | 500 | 100 | 400 |

## Required:

a.) Under the traditional costing method:
i. Compute the predetermined overhead rate.
ii. Determine the unit cost of each product.
b.) Under activity based costing:
i. Compute the activity rates for each activity.
ii. Determine the expected unit cost of each product.
c.) Compare and comment on your answers from parts a.) and b.) above.
d.) If ABC produces more accurate cost data, why is it not more widely used?

## Module 6: Cost Behaviour

## 6-1A - Graphing Cost Behaviour

For each of the following costs, prepare a ROUGH graph that illustrates the cost behaviour. The y -axis will be the cost and the x -axis will be the activity level.
a.) Cost of a cell phone plan. The plan charges a flat rate of $\$ 20$ per month for unlimited calling and text messaging $+\$ 0.10 /$ Megabyte. (The activity is data usage)
b.) Cost of plastic used in manufacturing small garbage bins. Each bin takes 600 grams of plastic. (The activity is the number of bins manufactured.)
c.) Cost of rent on an automotive parts manufacturing factory. (The activity is the number of good parts produced.
d.) Cost of professors' salaries to teach introductory accounting. Cost is $\$ 5,000$ per class section. Sections have a maximum size of 50 students. The university typically has between 120 and 220 students enrolled in the course. (The activity is the number of students).
e.) Wages cost for staff at a construction site. Employees are paid $\$ 15 /$ hour, but must be paid for a minimum of two hours and in two-hour increments. (The activity is hours worked).
f.) Cost of private jet rental. The cost is $\$ 500$ per hour for the first 4 hours and $\$ 300$ per hour thereafter. (The activity is rental-hours).
g.) The cost of a rental car. The cost is a flat rate of $\$ 50$ per day for the first 50 kilometers, then $\$ 0.50$ per kilometer driven. (The activity is the number of kilometers driven.)

## 6-1B - Graphing Cost Behaviour

For each of the following costs, prepare a ROUGH graph that illustrates the cost behaviour. The y -axis will be the cost and the x -axis will be the activity level.
a.) The cost of ski season's pass. The pass costs $\$ 750$ and is usable for the full ski season. (Activity is number of ski trips.)
b.) Electricity cost. The cost is $\$ 10$ per month plus $\$ 0.10$ per kWh for the first $1,000 \mathrm{kWh}$ and $\$ 0.15$ per kWh thereafter. (Activity is the number of $\mathrm{kWh} .-\mathrm{kWh}=$ kilowatt hours)
c.) Cost of beverage syrup for a restaurant. The cost is $\$ 0.25 /$ liter for the first 100 liters of an order, $\$ 0.20$ per liter for the next 100 liters of an order, and $\$ 0.18 /$ liter thereafter. (Activity is the number of liters ordered.)
d.) Cost of mufflers in the manufacture of cars. Each car requires one muffler. (Activity is the number of cars produced).
e.) Cost of a "Vacation Club" membership where customers pay $\$ 5,000$ per year to become members, then pay a $\$ 75$ fee per night of use. (Activity is the number of days used).
f.) Customer support staff costs. For each 10,000 customers, one full time customer support employee is required. Assume employees are paid a fixed salary. (Activity is the number of customers.)
g.) Staffing costs at a pipe manufacturer. Each employee can make 10 pipes per day and is paid a salary of $\$ 80$ per day. (Activity level is the number of pipes ordered per day.)

## 6-2A - High-Low Method, Scattergraph, Least-squares Regression

Danny Office Supplies shows the following data related to shipping costs for the first six months of the year:

|  | Number of <br> Packages <br> Shipped | Shipping <br> Cost |
| :--- | ---: | ---: |
| January | 100 | $\$ 1,200$ |
| February | 120 | 1,300 |
| March | 125 | 1,350 |
| April | 130 | 1,500 |
| May | 110 | 1,400 |
| June | 90 | 1,100 |

## Required:

a.) Using the high-low method, estimate the cost formula (write it in $\mathrm{y}=\mathrm{mx}+\mathrm{b}$ format).
i. Using your answer from part a.) above, assuming in July the company expects to ship 150 packages, what will be the company's estimated shipping cost.
b.) Using the scattergraph method, estimate the cost formula.
c.) Using the least squares regression method, estimate the cost formula.
d.) Are there any factors other than the number of packages shipped that may contribute to a variation in shipping cost?

## 6-2B - High-Low Method, Scattergraph, Least-squares Regression

Pane of Glass Inc. produces custom glasswork for high-end homes and buildings. The following cost data relate to the company's labour costs.

## Units Produced Labour Cost

| July | 400 | $\$ 15,000$ |
| :--- | ---: | ---: |
| August | 300 | 13,000 |
| September | 320 | 13,200 |
| October | 350 | 13,800 |
| November | 420 | 16,000 |
| December | 410 | 14,800 |

## Required:

a.) Using the high-low method, estimate the cost formula (write it in $\mathrm{y}=\mathrm{mx}+\mathrm{b}$ format).
i. Using your answer from part a.) above, assuming in the following month the company expects to make 250 units, what will be the company's estimated labour cost.
b.) Using the scattergraph method, estimate the cost formula.
c.) Using the least squares regression method, estimate the cost formula.
d.) Are there any factors other than the number of units produced that may contribute to a variation in labour cost?

## 6-3A - High-Low Method, Scattergraph, Least-squares Regression

Bill's Burger Restaurant has noticed a strong correlation between the number of customers served and the monthly maintenance costs:

|  | Number of <br> Customers | Maintenance <br> Cost |
| :--- | ---: | ---: |
| January | 1,300 | $\$ 4,000$ |
| February | 1,400 | 4,100 |
| March | 1,600 | 4,400 |
| April | 1,650 | 5,000 |
| May | 1,500 | 4,250 |
| June | 1,700 | 4,800 |

## Required:

a.) Using the high-low method, estimate the cost formula (write it in $\mathrm{y}=\mathrm{mx}+\mathrm{b}$ format).
i. Using your answer from part a.) above, assuming in July the company expects to have 2,000 customers, what will be the company's estimated maintenance cost.
b.) Using the scattergraph method, estimate the cost formula.
c.) Using the least squares regression method, estimate the cost formula.
d.) Are there any factors other than the number of customers that may contribute to a variation in maintenance cost?

## 6-3B - High-Low Method, Scattergraph, Least-squares Regression

Charming Clothiers manufactures neckties and bow ties. The company has the following cost data:

|  | Units Produced | Utilties Cost |
| :--- | ---: | ---: |
| July | 200 | $\$ 800$ |
| August | 220 | 810 |
| September | 250 | 880 |
| October | 350 | 950 |
| November | 300 | 900 |
| December | 150 | 850 |

## Required:

a.) Using the high-low method, estimate the cost formula (write it in $\mathrm{y}=\mathrm{mx}+\mathrm{b}$ format).
i. Using your answer from part a.) above, assuming in the following month the company expects to make 100 units, what will be the company's estimated utilities cost.
b.) Using the scattergraph method, estimate the cost formula.
c.) Using the least squares regression method, estimate the cost formula.
d.) Are there any factors other than the number of units produced that may contribute to a variation in utilities cost?

# Module 7: Cost-VolumeProfit Analysis 

## Cost Volume Profit Formulas

1. Sales - Variable Expenses = Contribution Margin

1a. Selling Price per Unit - Variable Expenses per Unit = CM per Unit
2. Breakeven point in Units $=$ Fixed Expenses

CM/unit
3. Breakeven point in Dollars $=B / E$ Units $x$ Selling Price per Unit
4. Breakeven point in Dollars $=\underline{\text { Fixed Expenses }}$

CM Ratio
5. Contribution Margin Ratio $=\underline{\mathbf{C M}}$

Sales
6. Sales - Variable expenses - Fixed Expenses $=$ Operating Profit (income)

6a. S - VE = CM; CM - Fixed = Operating Profit (Income)
7. Target Sales in Units $=\underline{\text { Fixed Expenses }+ \text { Target Operating Profit }}$ CM/unit
8. Target Sales in Dollars $=$ Fixed Expenses + Target Operating Profit CM ratio
9. Operating Leverage $=$ CM Net income
10. Safety Margin = Budgeted Sales - Breakeven Sales

7-1A - CVP Analysis, Margin of Safety, Degree of Operating Leverage
Charming Clothiers manufactures neckties and bow ties. The company has the following information:

The company's sales price is $\$ 30$ per unit. The variable costs of producing bowties is $\$ 18$ per unit. The company expects to have fixed costs of $\$ 60,000$ next year. The company expects to sell 8,000 bowties next year. Assume no taxes.
a.) Calculate the breakeven point in units.
b.) Calculate the breakeven point in dollars.
c.) How many units must the company sell to reach a target profit of $\$ 50,000$ ?
d.) Prepare a budgeted contribution format income statement.
e.) Compute the margin of safety in both dollar and percentage terms.
f.) Compute the degree of operating leverage.
g.) If sales increase by $20 \%$ in the following year, how much would net income increase (use the degree of operating leverage to compute your answer).

7-1B - CVP Analysis, Margin of Safety, Degree of Operating Leverage
Flora's Flats produces comfortable and portable women's shoes designed to be worn as a second pair of shoes after a formal event. The company has the following financial information:

The company's sales price is $\$ 20$ per unit. The variable costs of producing flats is $\$ 6$ per unit. The company expects to have fixed costs of $\$ 10,000$ next year. The company expects to sell 1,000 pairs of flats next year. Assume no taxes.
a.) Calculate the breakeven point in units.
b.) Calculate the breakeven point in dollars.
c.) How many units must the company sell to reach a target profit of $\$ 25,000$ ?
d.) Prepare a budgeted contribution format income statement.
e.) Compute the margin of safety in both dollar and percentage terms.
f.) Compute the degree of operating leverage.
g.) If sales increase by $20 \%$ in the following year, how much would net income increase (use the degree of operating leverage to compute your answer).

## 7-2A - CVP Analysis, "What if?" Analysis

Hewins Inc's projected contribution-format income statement for the upcoming year is shown below:

| Sales $(10,000$ units $)$ | $\$ 2,000,000$ |
| :--- | ---: |
| Variable expenses | $\underline{1,400,000}$ |
| Contribution margin | $\underline{600,000}$ |
| Fixed expenses | $\underline{\$ 00,000}$ |
| Net operating income | $\underline{\$ 100,000}$ |

## Required:

a.) Compute the breakeven point in units.
b.) Compute the breakeven point in dollars.
c.) If the company wishes to earn a target profit of $\$ 300,000$, how many units must be sold?
d.) Compute the company's margin of safety. State your answer in both dollar and percentage terms.
e.) The company's manager thinks that increasing advertising by $\$ 150,000$ will increase sales by $\$ 250,000$. If he is correct, what will be the net dollar advantage or disadvantage of making this change?
f.) Refer to the original data, the company's manager believes that using a slightly cheaper direct material will decrease variable expenses (per unit) by $10 \%$ will reduce units sold by $5 \%$. If he is correct, what will be the net dollar advantage or disadvantage of making this change?
g.) Refer to the original data, the company's direct labour workforce received a raise that will increase variable expenses by $\$ 10$ per unit. The manager wishes to maintain the exact same contribution margin ratio as the original data. What sales price will need to be charged to maintain the same contribution margin ratio?

## 7-2B - CVP Analysis, "What if?" Analysis

Kevin Co.'s projected contribution-format income statement for the upcoming month is shown below:

| Sales (500 units) | $\$ 10,000$ |
| :--- | ---: |
| Variable expenses | $\underline{4,000}$ |
| Contribution margin | 6,000 |
| Fixed expenses | $\underline{1,000}$ |
| Net operating income | $\underline{\$ 5,000}$ |

## Required:

a.) Compute the breakeven point in units.
b.) Compute the breakeven point in dollars.
c.) If the company wishes to earn a monthly target profit of $\$ 10,000$, how many units must be sold each month?
d.) Compute the company's margin of safety. State your answer in both dollar and percentage terms.
e.) The company's manager thinks that adding a salaried sales staff member at a cost of $\$ 2,000$ per month will increase sales by $\$ 4,000$ per month. If he is correct, what will be the net dollar advantage or disadvantage of making this change?
f.) Refer to the original data, the company's manager believes that a new production process will improve profitability. He plans to add new machinery that will cut variable expenses in half. This will increase fixed expenses by $\$ 3,000$. He expects after this change the company's unit sales will increase by $25 \%$. If he is correct, what will be the net dollar advantage or disadvantage of making this change?
g.) Refer to the original data, the company expects to decrease variable expenses by $5 \%$ and wishes to pass the savings along to customers. The manager wishes to maintain the exact same contribution margin ratio as the original data. What sales price will need to be charged to maintain the same contribution margin ratio?

## 7-3A - Multi-product CVP

Awesome Axes sells electric guitars. The company sells three models of guitar: Enthusiast, Jammer and Pro.

Information relating to next year's budget for the three models follows:

|  | Enthusiast | Jammer | Pro |
| :--- | ---: | ---: | ---: |
| Expected sales (units) | 600 | 350 | 50 |
| Sales price | $\$ 200$ | $\$ 500$ | $\$ 3,000$ |
| Variable cost | $\$ 120$ | $\$ 200$ | $\$ 800$ |

The company has annual fixed costs of $\$ 200,000$ and a tax rate of $25 \%$.

## Required:

a.) Compute the company's expected profit (net income) for the upcoming fiscal period.
b.) Compute the company's sales mix.
c.) Assuming a consistent sales mix, how many units of each product type must the company sell to break even?
d.) Assuming a consistent sales mix, if the company wishes to earn net income of $\$ 300,000$, how many units of each product type must be sold?
e.) Compute the margin of safety in both dollar and percentage terms.

## 7-3B - Multi-product CVP

Tony's is a Pizzeria located near a local university. The restaurant not only sells two types of pizza: Thin Crust and Deep Dish, but also sells Pasta.

Information relating to the three products for the next month follows:

|  | Thin Crust | Deep Dish | Pasta |
| :--- | ---: | ---: | ---: |
| Expected sales (units) | 1,000 | 400 | 200 |
| Sales price | $\$ 15$ | $\$ 20$ | $\$ 12$ |
| Variable cost | $\$ 6$ | $\$ 8$ | $\$ 5$ |

The company has monthly fixed costs of $\$ 10,000$ and a tax rate of $20 \%$.

## Required:

a.) Compute the company's expected profit (net income) for the upcoming fiscal period.
b.) Compute the company's sales mix. (Note Solve the normal way
c.) Assuming a consistent sales mix, how many units of each product type must the company sell to break even?
d.) Assuming a consistent sales mix, if the company wishes to earn monthly net income of $\$ 25,000$, how many units of each product type must be sold?
e.) Compute the margin of safety in both dollar and percentage terms.

## Module 8: Budgeting

## 8-1A - Sales Budget and Schedule of Expected Cash Collections

Baker Company shows the following estimates for unit sales for 2017:

|  | Q1 | Q2 | Q3 | Q4 | Year |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Units sold | 11,000 | 12,000 | 14,000 | 13,000 | 50,000 |

The company expects to sell its goods for $\$ 50$ per unit.

## Required:

a.) Prepare a sales budget for the year.

## Additional information

The company expects to collect $70 \%$ of sales in the quarter of the sale, and $25 \%$ in the quarter following the sale. $5 \%$ of sales are expected to be uncollectible. The company's beginning accounts receivable was $\$ 125,000$, all of which was expected to be collected in the first quarter.

## Required:

b.) Prepare a schedule of expected cash collections for the year.

## 8-1B - Sales Budget and Schedule of Expected Cash Collections

Green Company shows the following estimates for unit sales for 2017:

|  | Q1 | Q2 | Q3 | Q4 | Year |
| :--- | :---: | :---: | :---: | :---: | ---: |
| Units sold | 1,000 | 1,200 | 1,250 | 2,100 | 5,550 |

The company expects to sell its goods for $\$ 12$ per unit.

## Required:

a.) Prepare a sales budget for the year.

## Additional information

The company expects to collect $90 \%$ of sales in the quarter of the sale, and $8 \%$ in the quarter following the sale. $2 \%$ of sales are expected to be uncollectible. The company's beginning accounts receivable was $\$ 900$, all of which was expected to be collected in the first quarter.

## Required:

b.) Prepare a schedule of expected cash collections for the year.

## 8-2A - Production Budget

Danny Company shows the following estimates for unit sales for the first quarter of its upcoming fiscal year:

|  | January | February | March | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Units sold | 3,000 | 3,500 | 4,500 | 11,000 |

The company requires finished goods inventory on hand equal to $20 \%$ of the next month's expected sales.

The company expects to begin January with 600 units in inventory. The expected unit sales for April are 5,000.

## Required:

Prepare a production budget for the quarter.

## 8-2B - Production Budget

Joanne Company shows the following estimates for unit sales for the third quarter of its upcoming fiscal year:

|  | July | August | September | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Units sold | 5,000 | 4,000 | 3,500 | 12,500 |

The company requires finished goods inventory on hand equal to $30 \%$ of the next month's expected sales.

The company expects to begin July with 1,500 units in inventory. The expected unit sales for October are 3,800.

## Required:

Prepare a production budget for the quarter.

## 8-3A - Materials Purchases Budget

Sheng Company manufactures faux-leather bags. Each bag takes 0.5 yards of material. The material costs $\$ 5$ per yard. The company had 1,500 yards of material on hand at the beginning of January and required enough ending monthly materials to be on hand to meet $10 \%$ of the following month's production requirements.

The company's production budget follows:

|  | January | February | March | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Required Production | 30,000 | 35,000 | 38,000 | 103,000 |

The company expects to produce 40,000 units in April.

## Required:

Prepare a materials purchases budget for the quarter. Provide both the number of yards, and dollar value of inventory to be purchased.

## 8-3B - Materials Purchases Budget

Brown Company manufactures wood tables. Each table requires 15 board-feet of wood. Wood costs $\$ 6$ per board foot. The company had 2,000 board feet wood on hand at the beginning of July and required enough wood inventory to be on hand to meet $20 \%$ of the following month's production requirements.

|  | July | August | September | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Required Production | 5,000 | 7,000 | 10,000 | 22,000 |

The company expects to produce 8,000 units in October.

## Required:

Prepare a materials purchases budget for the quarter. Provide both the number of board feet, and dollar value of inventory to be purchased.

## 8-4A - Direct Labour Budget

McCluskey Company's production requirements are as follows:

|  | January | February | March | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Units to be produced | 5,000 | 6,000 | 7,000 | 18,000 |

Each unit requires two direct labour hours to produce and workers are paid $\$ 15.00$ per hour.

## Required

a.) Assuming a completely flexible labour force, prepare the company's direct labour budget for the quarter.
b.) Refer to the original data. Assume the company has permanent employees who are guaranteed to be paid for at least 11,500 hours of work per month. If production requires less than 11,500 hours, they will be paid for 11,500 hours anyway. Any amount of work above 11,500 hours will be paid at 1.5 times their normal hourly rate.

## 8-4B - Direct Labour Budget

McFarlane Company's production requirements are as follows:

|  | April | May | June | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Units to be produced | 12,000 | 20,000 | 18,000 | 50,000 |

Each unit requires 1.5 direct labour hours to produce and workers are paid $\$ 10.00$ per hour.

## Required

a.) Assuming a completely flexible labour force, prepare the company's direct labour budget for the quarter.
b.) Refer to the original data. Assume the company has permanent employees who are guaranteed to be paid for at least 25,000 hours of work per month. If production requires less than 25,000 hours, they will be paid for 25,000 hours anyway. Any amount of work above 25,000 hours will be paid at 1.5 times their normal hourly rate.

## 8-5A - Manufacturing Overhead Budget

Plural Inc. budgets direct labour hours for the first quarter as follows:

|  | January | February | March | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Direct labour hours | 75,000 | 80,000 | 95,000 | 250,000 |

The company's variable overhead rate is $\$ 10$ per direct labour hour. The company's fixed overhead is $\$ 100,000$ per month - this number includes monthly depreciation of $\$ 25,000$.

## Required

Prepare the company's manufacturing overhead budget for the quarter.

## 8-5B - Manufacturing Overhead Budget

Singular Company budgets machine hours for the first quarter as follows:

|  | October | November | December | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Machine hours | 200 | 160 | 180 | 540 |

The company's variable overhead rate is $\$ 5$ per machine hour. The company's fixed overhead is $\$ 2,000$ per month - this number includes monthly depreciation of $\$ 500$.

## Required

Prepare the company's manufacturing overhead budget for the quarter.

# 8-6A - Selling and Administrative Expenses Budget 

The budgeted unit sales for Jana Corporation for the upcoming quarter are as follows:

|  | July | August | September | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Units sold | 30,000 | 25,000 | 22,000 | 77,000 |

The company's variable expenses include:
Shipping expenses: $\$ 2.00$ per unit
Sales commissions: $\$ 5.00$ per unit
Other expenses: $\quad \$ 6.00$ per unit
The company's fixed expenses are:
Advertising: $\quad \$ 75,000$ per month
Executive salaries: $\quad \$ 90,000$ per month
Depreciation: $\quad \$ 20,000$ per month
Also, executive bonus payments of $\$ 25,000$ will be made in the July and September, and a major building repair of $\$ 35,000$ will be paid in August.

## Required:

Prepare the company's selling and administrative budget for the upcoming quarter.
Disclose both total selling and administrative expenses and cash disbursements for selling and administrative expenses.

## 8-6B - Selling and Administrative Expenses Budget

The budgeted unit sales for Chris Corporation for the upcoming quarter are as follows:

|  | April | May | June | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Units sold | 10,000 | 15,000 | 25,000 | 50,000 |

The company's variable expenses include:
Wages: $\quad \$ 4.00$ per unit
Sales commissions: $\$ 1.00$ per unit
Other expenses: $\quad \$ 3.00$ per unit
The company's fixed expenses are:
Rent: $\quad \$ 15,000$ per month
Salaries: $\quad \$ 35,000$ per month
Depreciation: $\quad \$ 10,000$ per month
Also, the company expects to pay accounting fees of $\$ 12,000$ at the end of April, and employee bonuses of $\$ 30,000$ will be paid in June.

## Required:

Prepare the company's selling and administrative budget for the upcoming quarter.
Disclose both total selling and administrative expenses and cash disbursements for selling and administrative expenses.

## 8-7A - Cash Budget

Cookie Crunchers had the following estimated cash flows for the first quarter:

|  | January | February | March | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Cash receipts | $\$ 50,000$ | $\$ 140,000$ | $\$ 90,000$ | $\$ 280,000$ |
| Cash disbursements | 80,000 | 90,000 | 100,000 | 270,000 |

The company begins the year with $\$ 20,000$ in cash and requires a minimum cash balance of $\$ 10,000$. The company may borrow any amount from a local bank at an annual interest rate of $6 \%$, The borrowing must occur at the beginning of any month and all repayments must be made at the end of any month. Interest must be repaid at the time of loan repayment.

## Required:

In good form, prepare the company's cash budget for the upcoming year.

## 8-7B - Cash Budget

Corrugated Box Company had the following estimated cash flows for the third quarter:

|  | August | September | October | Quarter |
| :--- | ---: | ---: | ---: | ---: |
| Cash receipts | $\$ 900,000$ | $\$ 1,000,000$ | $\$ 1,300,000$ | $\$ 3,200,000$ |
| Cash disbursements | $1,100,000$ | $1,000,000$ | $1,000,000$ | $3,100,000$ |

The company begins the year with $\$ 100,000$ in cash and requires a minimum cash balance of $\$ 25,000$. The company may borrow any amount from a local bank at an annual interest rate of $3 \%$, The borrowing must occur at the beginning of any month and all repayments must be made at the end of any month. Interest must be repaid at the time of loan repayment.

## Required:

In good form, prepare the company's cash budget for the upcoming year.

## 8-8A -Cash Budget, Income Statement, Balance Sheet

Mullins Company manufactures didgeridoos. The company's June 30 balance sheet follows:

| Mullins Company Balance Sheet June 30 |  |
| :---: | :---: |
| ASSETS |  |
| Cash | \$ 20,000 |
| Accounts receivable, net | 30,000 |
| Inventory | 50,000 |
| Property, plant and equipment, net | 150,000 |
| Total assets | \$ 250,000 |
| LIABILITIES AND SHAREHOLDERS' EQUITY |  |
| Accounts payable, net | \$ 50,000 |
| Bank loan payable | 20,000 |
| Common shares | 140,000 |
| Retained earnings | 40,000 |
| Total liabilities and shareholders' equity | \$ 250,000 |

The company shows the following budget items for July:
a.) Sales are expected to be $\$ 100,000$ in July. $60 \%$ are expected to be collected in July, $40 \%$ will be collected in August.
b.) The full $\$ 30,000$ of accounts receivable on the June 30 balance sheet (above) is expected to be collected in July.
c.) Cost of goods sold is expected to be $45 \%$ of sales.
d.) The company plans to purchase $\$ 50,000$ in inventory during July. The company's purchases are all on account. Of the company's purchases, $20 \%$ are paid in the month of the purchase, and $80 \%$ are paid in the following month.
e.) The full $\$ 50,000$ of accounts payable on the June 30 balance sheet (above) is expected to be paid off in July.
f.) The company's operating expenses are expected to be $\$ 40,000$ including depreciation of $\$ 1,000$. All operating expenses except depreciation are cash expenses.
g.) The company's bank loan will be paid in full with $\$ 200$ interest.
h.) New equipment costing $\$ 15,000$ will be purchased using cash.
i.) The company wishes to keep a minimum cash balance of $\$ 10,000$ and has access to borrow up to $\$ 100,000$ from a local bank.

## Required:

a.) Compute the expected cash collections for July.
b.) Compute the expected cash disbursements for July.
c.) Based on your answers for part a.) and b.), prepare a cash budget for July.
d.) Prepare a budgeted income statement for July.
e.) Prepare a balance sheet dated July 31.

## 8-8B -Cash Budget, Income Statement, Balance Sheet

Noskova Company manufactures boomerangs. The company's September 30 balance sheet follows:

| Noskova Company <br> Balance Sheet <br> September 30 |  |
| :--- | ---: |
| ASSETS |  |
| Cash | 50,000 <br> Accounts receivable, net <br> Inventory <br> Property, plant and equipment, net <br> Total assets <br>  <br> Accounts payable, net <br> Bank loan payable <br> Common shares <br> Retained earnings <br> Total liabilities and shareholders' equity |

The company shows the following budget items for October:
a.) Sales are expected to be $\$ 600,000$ in October. $70 \%$ are expected to be collected in October, $30 \%$ will be collected in November.
b.) The full $\$ 125,000$ of accounts receivable on the September 30 balance sheet (above) is expected to be collected in October.
c.) Cost of goods sold is expected to be $40 \%$ of sales.
d.) The company plans to purchase $\$ 300,000$ in inventory during October. The company's purchases are all on account. Of the company's purchases, $25 \%$ are paid in the month of the purchase, and $75 \%$ are paid in the following month.
e.) The full $\$ 200,000$ of accounts payable on the September 30 balance sheet (above) is expected to be paid off in October.
f.) The company's operating expenses are expected to be $\$ 250,000$ including depreciation of $\$ 20,000$. All operating expenses except depreciation are cash expenses.
g.) The company's bank loan will be paid in full with $\$ 10,000$ interest.
h.) New equipment costing $\$ 50,000$ will be purchased for cash.
i.) The company wishes to keep a minimum cash balance of $\$ 20,000$ and has access to borrow up to $\$ 500,000$ from a local bank.

## Required:

a.) Compute the expected cash collections for October.
b.) Compute the expected cash disbursements for October.
c.) Based on your answers for part a.) and b.), prepare a cash budget for October.
d.) Prepare a budgeted income statement for October.
e.) Prepare a balance sheet dated October 31.

# Module 9: Standard Costs and Variance Analysis 

## 9-1A Direct Materials Variances

Steve's Sausages begins business in March. In planning his business, Steve sets the following materials standard: Each sausage should take 250 grams of pork, and pork should cost $\$ 10$ per kilogram, therefore each sausage should contain $\$ 2.50$ of direct material.

In March, Steve purchases 80 kilograms of pork for $\$ 750$. Steve makes and sells 300 sausages and has 2 kilograms of pork remaining on hand at the end of the month.

## Required:

Compute the company's direct materials price and quantity variances.

## 9-1B Direct Materials Variances

Relief Inc. manufactures portable toilets for use on construction sites. Each toilet requires 40 kilograms of plastic and plastic is estimated to cost $\$ 5$ per kilogram.

At the beginning of June, the company had no plastic inventory on hand. During the month, the company purchased 4,500 kilograms of plastic for $\$ 24,000$. The company produced 100 toilets during the month and had 300 kilograms of plastic on hand at the end of the month.

## Required:

Compute the company's direct materials price and quantity variances.

## 9-2A Direct Labour Variances

Frank's Bikes makes fixed gear bicycles. The company set the following standards related to labour: Each bike should take four direct labour hours to manufacture at a cost of $\$ 15$ per hour.

For August, the company produced 160 bicycles and employees worked 700 direct labour hours. The company's total labour cost for the month was $\$ 10,000$.

## Required:

Compute the company's direct labour rate and efficiency variances.

## 9-2B Direct Labour Variances

Chi Hou's Noodles makes noodles by hand and supplies local Chinese restaurants. The company has the following standards for direct labour: Staff should be able to make 10 kilograms per hour and the labour wage rate is $\$ 9$ per hour.

For September, the company produced 15,000 kilograms of noodles. The direct labour workforce worked for 1,400 hours and the labour cost for the month was $\$ 13,600$.

## Required:

Compute the company's direct labour rate and efficiency variances.

## 9-3A Variable Overhead Variances

Widgets R Us applies variable overhead costs to jobs based on machine hours. The company's predetermined variable overhead rate is $\$ 6$ per machine hour, and it is estimated that each machine can produce 2 widgets per hour.

For January, the company produced 600 widgets and machines were active for 320 machine hours. The company's total variable manufacturing overhead cost for the month was $\$ 1,400$.

## Required:

Compute the company's variable manufacturing overhead spending and efficiency variances.

## 9-3B Variable Overhead Variances

Batter Up produces small baseball bats for young baseball players. The company applies variable overhead costs to jobs based on machine hours. The company's predetermined variable overhead rate is $\$ 15$ per machine hour, and it is estimated that the company's lone machine can produce 10 bats per hour.

For June, the company produced 2000 bats and the machine was active for 180 machine hours. The company's variable manufacturing overhead cost for the month was $\$ 2,500$.

## Required:

Compute the company's variable manufacturing overhead spending and efficiency variances.

## 9-4A Fixed Overhead Variances

XYZ Company manufactures tables. The company budgets fixed overhead to be $\$ 10,000$ for the month of August. The company applies overhead costs to jobs on the basis of direct labour hours. The company has the following direct labour standards: It expects each table will take two hours to make, and the company anticipates making 1,000 tables (direct labour workers are budgeted to work for 2,000 hours during the month).

During August, the company produced 1,200 tables and workers worked a total of 2,200 hours. Actual fixed overhead incurred for August was \$10,500.

## Required:

Compute the company's fixed manufacturing overhead spending and volume variances.

## 9-4B Fixed Overhead Variances

ABC Company manufactures chairs. The company budgets fixed overhead to be $\$ 25,000$ for the month of August. The company applies overhead costs to jobs on the basis of direct labour hours. The company has the following direct labour standards: It expects each chair takes four hours to make, and the company anticipates making 800 chairs (direct labour workers are budgeted to work for 3,200 hours during the month).

During August, the company produced 700 chairs and workers worked a total of 3,000 hours. Actual fixed overhead incurred for August was $\$ 23,500$.

## Required:

Compute the company's fixed manufacturing overhead spending and volume variances.

## 9-5A Comprehensive Variance Analysis Problem

Chemco produces chemicals for cleaning pools. It sells the chemicals (a powder) in four kilogram buckets. The company's standard costs per unit follow:

|  | Quantity | Cost | Total |
| :--- | :---: | ---: | ---: |
| Direct materials | 5 kilograms | $\$ 4.00$ per kg | $\$ 20.00$ |
| Direct labour | 0.25 hours | $\$ 10$ per DL hour | 2.50 |
| Manufacturing overhead | 0.25 hours | $\$ 8$ per DL hour | $\underline{\underline{2.00}}$ |
|  |  |  | $\underline{\underline{24.50}}$ |

During the month, the company produced 1,000 buckets of chemicals. The following information is known:
1.) The company purchased 5,500 kilograms of direct material at a cost of $\$ 21,450$.
2.) The company had no beginning inventory, and had 700 kilograms of material on hand at the end of the year.
3.) The direct labour workforce worked a total of 220 hours and was paid a total of $\$ 2,640$.
4.) Variable overhead of $\$ 1,050$ and fixed overhead of $\$ 800$ were incurred.

The manufacturing overhead rate of $\$ 8$ per direct labour hour can be further broken down. The company estimates variable overhead to be $\$ 5$ per direct labour hour. The company expected to produce 1,100 buckets using 275 direct-labour hours during the month, and based on those estimates, variable overhead was budgeted to be $\$ 1,375$ for the month. Fixed overhead was budgeted to be $\$ 825$ for the month.

## Required:

Compute:
a.) Direct Materials price and quantity variances.
i. The company recently entered into a contract with a new supplier who is eager for their business. Should the company continue to work with this new supplier, or should they look for a new one.
b.) Direct Labour rate and efficiency variances.
i. The company experimented using more senior staff and fewer junior employees this month. Was the experiment successful?
c.) Variable Overhead spending and efficiency variances.
d.) Fixed Overhead spending and volume variances.

## 9-5B Comprehensive Variance Analysis Problem

Smithco produces a plastic furniture set for outdoor use. The company's standard costs per set follow:
Direct materials
Direct labour
Manufacturing overhead
Quantity
10 kilograms
2 hours
2 hours

| Cost | Total |
| :---: | ---: |
| $\$ 6.00$ per kg | $\$ 60.00$ |
| $\$ 15$ per DL hour | 30.00 |
| $\$ 5$ per DL hour | $\underline{10.00}$ |
|  | $\underline{\$ 100.00}$ |

During the month, the company produced 200 furniture sets. The following information is known:
1.) The company purchased 2,300 kilograms of direct material at a cost of $\$ 13,000$.
2.) The company had no beginning inventory and had 50 kilograms of material on hand at the end of the year.
3.) The direct labour workforce worked a total of 420 hours and was paid a total of $\$ 5,800$.
4.) Variable overhead of $\$ 1,555$ and fixed overhead of $\$ 600$ were incurred.

The manufacturing overhead rate of $\$ 5$ per direct labour hour can be further broken down. The company estimates variable overhead to be $\$ 3.75$ per direct labour hour. The company planned to make 180 furniture sets during the month and budgeted to use 360 direct labour hours.
Accordingly, the company's variable overhead was budgeted to be $\$ 1,350$ for the month. Fixed overhead was budgeted to be $\$ 450$ for the month.

## Required:

Compute:
a.) Direct Materials price and quantity variances.
i. The company recently entered into a contract with a new supplier who is eager for their business. Should the company continue to work with this new supplier, or should they look for a new one.
b.) Direct Labour rate and efficiency variances.
i. The company experimented using more junior staff and fewer senior employees this month. Was the experiment successful?
c.) Variable Overhead spending and efficiency variances.
d.) Fixed Overhead spending and volume variances.

## Module 10: Flexible Budgeting

## 10-1A Flexible Budget

The Greatest Friends is a dog rescue group that specializes in finding homes for the Great Dane breed. The company produces the following cost report for June.

# The Greatest Friends <br> Cost Variance Report <br> For the Month Ended June 30 

|  | Budget | Actual | Variance |
| :---: | :---: | :---: | :---: |
| Number of dogs in care | 10 | 4 | 6 U |
| Variable costs |  |  |  |
| Grooming | \$2,000 | \$1,300 | \$700 F |
| Dog food | 10,000 | 6,500 | 3,500 F |
| Cleaning supplies | 500 | 400 | $\underline{100 \mathrm{~F}}$ |
| Total variable costs | 12,500 | 8,200 | 4,300 F |
| Fixed costs |  |  |  |
| Salaries | 1,500 | 1,600 | 100 U |
| Property taxes | 400 | 400 | - |
| Total fixed costs | 1,900 | 2,000 | 100 U |
| Total costs | \$14,400 | \$10,200 | \$4,200 F |

Valerie Pringle, the manager of the rescue group comments on the report: "I'm certainly proud of this cost report, it shows that I'm not only doing a great job caring for the animals in our care, I'm also keeping costs under control".

## Required:

a.) Comment on the major flaw in the report above.
b.) Prepare a revised report using a flexible budget.
c.) Comment on Pringle's assertion that she is doing a "great job" keeping costs under control.

## 10-1B Flexible Budget

Refined Touch is a dating service. Rather than using algorithms, the company uses a traditional matchmaker. The company had the following income statement for April:

## Refined Touch <br> Income Statement (Actual vs Budget)

For the Month Ended April 30

|  | Budget | Actual | Variance |
| :---: | :---: | :---: | :---: |
| Number of matches | 120 | 150 | 30 F |
| Revenues | \$12,000 | \$14,500 | \$2,500 F |
| Variable costs |  |  |  |
| Matching | \$3,000 | \$3,600 | \$600 U |
| Customer screening | 2,400 | 1,500 | 900 F |
| Payment processing | 1,200 | 1,450 | 250 U |
| Total variable costs | 6,600 | 6,550 | 50 F |
| Fixed costs |  |  |  |
| Office expenses | 2,000 | 1,800 | 200 F |
| Rent expense | $\underline{900}$ | $\underline{950}$ | 50 U |
| Total fixed costs | 2,900 | 2,750 | 150 F |
| Total costs | 9,500 | 9,300 | 200 F |
| Net income | \$2,500 | \$5,200 | \$2,700 F |

Linda Frost, the manager and matchmaker comments on the report: "What a great month. We were busier than we expected to be and we still managed to keep costs down - I just wish every month could be this good".

## Required:

a.) Comment on the major flaw in the report above.
b.) Prepare a revised report using a flexible budget.
c.) Comment on Frost's assertion that it was a "great month".
d.) Which variance(s) ought to be investigated further?

Module 11: Performance Measurement: ROI, Residual Income and the Balanced Scorecard

## 11-1A - Computing ROI and Residual Income

The CEO of Grace Company, Nicole Grace is debating an investment. The investment is projected to earn $\$ 20,000$ annually and will require the company to acquire $\$ 100,000$ in assets. The following chart summarizes Grace's decision:

|  | Before Investment | After Investment |
| :--- | ---: | ---: |
| Operating income | 75,000 | 95,000 |
| Average operating assets | 300,000 | 400,000 |

## Required:

a.) Assume Grace is evaluated based on growth in the company's ROI. Compute the Return on Investment for the company before and after the investment. Would you recommend Grace make the investment?
b.) Assume Grace is evaluated based on growth in the company's residual income. The company's required rate of return is $15 \%$. Compute the company's residual income before and after the investment. Would you recommend Grace make the investment?
c.) Give at least one advantage and one disadvantage of using measures like ROI and residual income to evaluate company performance.

## 11-1B - Computing ROI and Residual Income

The CFO of Gentry Autogroup, Allison Gentry is debating an investment. The investment is projected to earn $\$ 100,000$ annually and will require the company to acquire $\$ 600,000$ in assets. The following chart summarizes Gentry's decision:

|  | Before Investment | After Investment |
| :--- | ---: | ---: |
| Operating income | 600,000 | 700,000 |
| Average operating assets | $3,000,000$ | $3,600,000$ |

## Required:

a.) Assume Gentry is evaluated based on growth in the company's ROI. Compute the Return on Investment for the company before and after the investment. Would you recommend Gentry make the investment?
b.) Assume Gentry is evaluated based on growth in the company's residual income. The company's required rate of return is $15 \%$. Compute the company's residual income before and after the investment. Would you recommend Gentry make the investment?
c.) Give at least one advantage and one disadvantage of using measures like ROI and residual income to evaluate company performance.

## 11-2A - Balanced Scorecard

For each of the balanced scorecard targets listed below, identify the matching perspective: Organizational learning and growth (L), Internal business processes (I), Customer (C), Financial(F).
a.) Product returns as a percentage of sales decreases by $5 \%$.
b.) Employee satisfaction score above $4 / 5$.
c.) Percentage of products with defects below $1 \%$
d.) Over $90 \%$ of employees participate in new service training session.
e.) Share price increases by $\$ 5$.
f.) Sales grow by $15 \%$.
g.) Number of complaints reduced below 10 per week.
h.) Setup time reduced by $20 \%$.

## 11-2B - Balanced Scorecard

For each of the balanced scorecard targets listed below, identify the matching perspective: Organizational learning and growth (L), Internal business processes (I), Customer (C), Financial(F).
a.) Customer satisfaction survey improves to $4.5 / 5$
b.) Customer retention is held above $70 \%$
c.) Customer hold time average below 2 minutes.
d.) Percentage of on time delivery over $95 \%$
e.) Employee turnover of below $20 \%$.
f.) Average employee training hours of over 20 per year.
g.) Return on investment increases by $10 \%$.
h.) Profit grows by $20 \%$.

## 11-3A - Transfer Pricing

PhonyTel Inc. was a massive media company that controlled a cable company, a 4G wireless data network, and several other related businesses. PhonyTel Inc. was a highly decentralized organization, where managers were encouraged to make decisions that were most profitable for their own divisions. One of PhonyTel Inc's subsidiary businesses was PhonyTel Data (PD), an installer of data servers. PhonyTel Data's manager, Steve Frost, had a large job that would require the installation of two thousand servers. The request received 3 bids: One from PhonyTel Networking (PN), a subsidiary of PhonyTel Inc.; one from Little Guys Data (LGD); and one from Big Name Competitor (BNC). Details of the bids are below:

| Company | Bid (Per server) | Notes |
| :---: | :---: | :---: |
| PhonyTel Networking | \$1,800 | - The company would purchase the processors from PhonyTel Chips (a subsidiary of PhonyTel Inc.) <br> The final product would be of a very high quality |
| Little Guys Data | \$1,600 | - The company would purchase the processors from PhonyTel Chips (a subsidiary of PhonyTel Inc.) <br> - The final product would be of equal quality to that produced by PhonyTel Networking |
| Big Name Competitor | \$1,550 | - The company would manufacture its own parts, <br> - The final product would be of equal quality to that produced by PhonyTel Networking |

Frost was frustrated by the bids, and phoned Kianna Chang, the manager of PhonyTel Networking, "How on earth is it that the only internal bid is by far the highest! You're not anywhere near capacity, shouldn't you be cutting me a deal? You've got to drop below $\$ 1,550$ or I'll buy from BNC."
Chang replied, "Look, I understand where you're coming from, but I have margins to protect, I simply can't offer you a better deal. The bosses are stressing a focus on higher margins and higher average selling-prices, I can't tell all my salespeople to pitch the high-end, only to kill the firm's just to make you guys look good."
Frustrated, Frost called Teegan Bertuzzi, the CFO of the parent company. "I'll have a look at the issue", said Bertuzzi, and she noted the following details:

- PhonyTel Data would incur $\$ 300$ in variable costs on top of its purchase price, and sell the installation for $\$ 2,400$ per server.
- PhonyTel Networking's variable costs would be $\$ 1,400$, and included the cost of the processors purchased from PhonyTel Chips.
- PhonyTel Chips sold this type of processor for $\$ 500$. Their contribution margins were typically $20 \%$.
- PhonyTel Chips had excess capacity.

## Required:

a.) Give the dollar advantage or disadvantage of accepting each deal (for the parent company, PhonyTel Inc.)
b.) What are Teegan Bertuzzi's options? What should she do?

## Module 12: Relevant Costs for Decision Making

## 12-1A - Make or Buy

Carol's Cupcakes sells cupcakes and other desserts through its retail store. The company has always made all of its ingredients from scratch, but has recently been approached by a supplier that specializes in icing. Carol believes that the supplier's icing is of equal quality to her own, and believes their offer of $\$ 3.00$ per liter may enable her to save money. Carol is evaluating her own cost of producing icing:

|  | Per Liter | $\mathbf{5 , 0 0 0}$ liters <br> per year |
| :--- | ---: | ---: |
| Direct materials | $\$ 1.00$ | $\$ 5,000$ |
| Direct labour | 0.50 | 2,500 |
| Variable manufacturing overhead | 0.25 | 1,250 |
| Fixed manufacturing overhead - traceable* | 1.00 | 5,000 |
| Fixed manufacturing overhead - allocated | $\underline{\underline{1.75}}$ | $\underline{8,50}$ |
| Total | $\underline{\underline{82,5050}}$ |  |
| $* 40 \%$ relates to cleaning and maintenance of the icing equipment and $60 \%$ relates to depreciation of icing equipment (with no resale value) |  |  |

Examining the report, Carol says, "Their icing is just as good, and it would save me $\$ 1.50$ per liter, that's over $\$ 7,500$ for the year. I think I'm going to take the deal."

## Required

a.) Assuming there is no other use for the icing equipment or the space it uses in the kitchen, what is the net dollar advantage or disadvantage of accepting the supplier's offer?
b.) If the offer is accepted, Carol's Cupcakes could use the space that had been previously used for making icing as a bacon-frying space. Carol believes that a new bacon line of cupcakes would produce margins of $\$ 5,000$ per year. Should Carol's Cupcakes accept the supplier's offer?

## 12-1B - Make or Buy

Howard Grills makes high-end barbecues. The company has recently been approached by a supplier who has offered to provide the company igniters (the barbecue part that provides a spark to start the flame). The company has offered a price of $\$ 5.00$ per igniter. Howard's internal costs of producing the igniter follow:

|  | Per Igniter | 30,000 igniters per year |
| :---: | :---: | :---: |
| Direct materials | \$1.25 | \$37,500 |
| Direct labour | 0.25 | 7,500 |
| Variable manufacturing overhead | 0.50 | 15,000 |
| Fixed manufacturing overhead - traceable* | 3.00 | 90,000 |
| Fixed manufacturing overhead - allocated | $\underline{1.50}$ | 45,000 |
| Total | \$6.50 | \$195,000 |

Gloria Howard, the owner and CEO of Howard Grills notes: "To make 30,000 igniters costs us $\$ 195,000$, their starters are just as good and buying from them will only cost us $\$ 150,000$, I'm no accountant, but it seems obvious we should take this deal."

## Required

a.) Assuming there is no other use for the space used to make the starters, what is the net dollar advantage or disadvantage of accepting the supplier's offer?
b.) If the offer is accepted, the company could use the space to develop a new product line that would generate estimated margins of $\$ 25,000$. Should the company accept the supplier's offer?

## 12-2A - Drop or Retain a Segment

All-Mart is a department store with three major departments: Housewares, Hardware, and Electronics. Company management is very concerned about the performance of the electronics department, noting that it seems to be a drag on the company based on its most recent fiscal quarter. A company-wide segmented income statement follows:

|  | Housewares | Hardware | Electronics | Total |
| :--- | ---: | ---: | ---: | :---: |
| Sales | $\$ 150,000$ | $\$ 220,000$ | $\$ 200,000$ | $\$ 570,000$ |
| Variable expenses | $\underline{60,000}$ | $\underline{100,000}$ | $\underline{140,000}$ | $\underline{300,000}$ |
| Contribution margin | 90,000 | 120,000 | 60,000 | 270,000 |
| Fixed expenses | $\underline{50,000}$ | $\underline{100,000}$ | $\underline{90,000}$ | $\underline{240,000}$ |
| Operating income (loss) | $\underline{\$ 40,000}$ | $\underline{\$ 20,000}$ | $\underline{\$(30,000)}$ | $\underline{\$ 30,000}$ |

The company notes that if the electronics department were dropped, the other departments could expect a $10 \%$ decrease in foot traffic and sales. Also, $\$ 20,000$ of the electronics department's fixed costs are allocated and would continue even if the department was dropped. The company has no planned use for the space currently used by the electronics department.
Required
Compute the net dollar advantage or disadvantage of dropping the electronics department.

## 12-2B - Drop or Retain a Segment

Fresh Juice has three locations in Kamloops: Downtown, North Shore and Dufferin.
Management is concerned about the performance of the downtown location, the rent is high and management is debating closing the store. A company-wide segmented income statement follows:

|  | Downtown | North Shore | Dufferin | Total |
| :--- | ---: | ---: | ---: | ---: |
| Sales | $\$ 300,000$ | $\$ 350,000$ | $\$ 250,000$ | $\$ 900,000$ |
| Variable expenses | $\underline{210,000}$ | $\underline{225,000}$ | $\underline{175,000}$ | $\underline{610,000}$ |
| Contribution margin | 90,000 | 125,000 | 75,000 | 290,000 |
| Fixed expenses | $\underline{150,000}$ | $\underline{75,000}$ | $\underline{40,000}$ | $\underline{265,000}$ |
| Operating income (loss) | $\underline{\$ 50,000)}$ | $\underline{\$ 50,000}$ | $\underline{\$ 35,000}$ | $\underline{\$ 25,000}$ |

An analysis of expenses reveals that if $\$ 40,000$ of the downtown location's fixed expenses are allocated costs that would continue even if the store was closed. The North Shore and Dufferin locations could expect a 5\% decrease in revenues due to lost promotional synergies closing the prominent downtown location.
Required
Compute the net dollar advantage or disadvantage of dropping the downtown location.

## 12-3A - Special Order

Duty Gear manufactures and sells high-quality gear for firefighters. Operating at capacity, the company can produce and sell up to 10,000 uniforms per year. Costs associated with this level of production and sales are as follows:

|  | $\underline{\text { Per }}$ | $\underline{\text { At Capacity }}$ |
| :--- | ---: | ---: |
| Direct materials | $\underline{\text { unit }}$ | $\underline{(10,000 \text { units })}$ |
| Direct labour | 500 | $\$ 8,000,000$ |
| Variable manufacturing overhead | 700 | $5,000,000$ |
| Fixed manufacturing overhead | $\underline{1,000}$ | $\underline{10,000,000}$ |
| Total costs | $\underline{\$ 3,000}$ | $\underline{\$ 30,000,000}$ |

The firefighter gear normally sells for $\$ 5,000$ per unit. Despite this high price, the company regularly expects to sell 8,000 units in the upcoming year. Fixed overhead is constant at $\$ 10,000,000$ between 6,000 and 10,000 units.

A filmmaker wishes to purchase 250 authentic firefighting uniforms from the company. The company's regular price is $\$ 5,000$, but the filmmaker would like volume discount and asks the company to reduce its price to $\$ 3,000$ for this large purchase. Accepting this deal would not affect the company's normal business. To fill the order, the company would have to purchase a machine to provide a special rubber coating each unit of fire gear. The machine would cost $\$ 100,000$ and would have no use outside of the order. The additional rubber coating would add a cost of $\$ 50$ per unit.

## Required

Determine the net dollar advantage or disadvantage of accepting the order.

## 12-3B - Special Order

Eversharp is a knife manufacturer. The company normally sells 5,000 sets of high quality knives each year and, with its current staff and machinery, has the capacity to produce up to 6,000 sets of knives. At this level of output, the company estimates its costs of producing and selling one set of knives as follows:

|  | $\underline{\text { Per }}$ |
| :--- | ---: |
| Direct materials | $\underline{\text { unit }}$ |
| Direct labour | 1.50 |
| Variable manufacturing overhead | 1.00 |
| Fixed manufacturing overhead | 2.00 |
| Sales commissions | 1.50 |
| Fixed selling and administrative expenses | $\underline{4.00}$ |
| Total costs | $\underline{\$ 15.00}$ |

The company's selling price is $\$ 20$ per unit. An order has been received for 500 units, but because it's a bulk purchase, the buyer has requested a $40 \%$ price discount. If the order were accepted it would not affect the company's regular sales. There would be no sales commissions on this deal, and fixed costs would not be affected. The purchasing company would like their logo engraved into the handle of each knife, which would increase labour costs by $\$ 0.25$ per unit and require the purchase of a new machine for $\$ 2,000$.

## Required

a.) Determine the net dollar advantage or disadvantage of accepting the order.
b.) Separate from a.), assume the company finds a box from 1994 containing 1,000 old steak knives, although styles have changed, the knives are still of a reasonably good quality and sharpness. Assuming manufacturing cost data was similar in 1994 to the chart above, what is the minimum selling price that should be accepted?

## 12-4A - Sell or Process Further

Peter's Grocery is an Italian market that sells imported meats and cheeses. The company is thinking of using a portion of their store space to sell ready-made sandwiches with ingredients from the store. The main components of the sandwiches are 100 grams of salami (meat), 1 slice of provolone (cheese) and one bun. The salami sells for $\$ 2$ per 100 grams and costs the company $\$ 0.75$ per 100 grams. Provolone sells for $\$ 0.50$ per slice and costs the store $\$ 0.35$ per slice. The buns cost the company $\$ 2.40$ per dozen to make, and sell for $\$ 4.80$ per dozen. The company expects it can sell the sandwiches for $\$ 4$ each. The labour costs associated with making a sandwich are $\$ 0.25$ and the variable overhead is expected to cost $\$ 0.75$ per sandwich. Required
Should the company introduce the new sandwich item?
Determine the net dollar advantage or disadvantage of selling the sandwich as compared to selling the meat, cheese and bun separately.

## 12-4B - Sell or Process Further

U-Junk Auto is a car lot that has just received a 1991 Toyota Tercel that is barely in running condition. The company paid $\$ 400$ for the car has already received an offer to be sold (as is) for $\$ 600$. The shop's mechanic does not wish to sell the car as is, he believes that the company should replace the damaged parts at a cost of $\$ 200$ and have him repair the car. It would take him 30 hours of work at $\$ 20$ per hour. The company applies variable overhead costs to jobs at a rate of $\$ 10$ per direct labour hour. If the upgrades are made, the car could be sold for $\$ 1,500$.

## Required

Determine the net dollar advantage or disadvantage of selling the car now instead of repairing it.

## 12-5A - Constrained Resource

Wondrous Aromas Company has three lines of perfume: Red, Green, and Blue. After megacelebrity Caitlyn Spencer tweeted that this was her favourite line of perfume, demand for all three products has been off the charts. The company has a problem, it has a limited supply of orchid nectar, a common ingredient in all three products. Orchid nectar costs $\$ 5$ per gram and is the major selling feature of all three perfumes. Cost data follow:

|  | Red | Green | Blue |
| :--- | ---: | ---: | ---: |
| Price | $\$ 200$ | $\$ 160$ | $\$ 80$ |
| Variable expenses | 50 | 30 | 20 |
| Orchid nectar | 15 | 25 | 15 |
| Other direct materials | 20 | 25 | 10 |
| Direct labour | $\underline{15}$ | $\underline{10}$ | $\underline{10}$ |
| Variable manufacturing overhead | $\underline{\underline{100}}$ | $\underline{\underline{90}}$ | $\underline{\underline{\$ 70}}$ |
| Total variable cost | $\underline{\underline{\$ 25}}$ |  |  |

## Required

a.) Which product would you recommend the company focus on producing first? Second? Third?
b.) A supplier emerges willing to provide the company with more orchid nectar, but for a major premium. What is the maximum the company should be willing to pay per gram of orchid nectar as long as there is unfilled demand for all three perfumes?

## 12-5B - Constrained Resource

Anthony Bertuzzi is a very busy man. He runs an event planning business that organizes weddings, birthday parties, and corporate events. Anthony's business is so busy that he has recently started turning away customers. Anthony tried to bring in a partner, but customers wanted Anthony's magic touch. Anthony enjoys all three types of events - wedding, birthday parties, and corporate events - equally, and would like your help in determining which events he should prioritize. Although all events are different, he has laid out the following information about "typical" events of each type:

|  | Weddings | Birthday <br> Parties | Corporate <br> Events |
| :--- | ---: | ---: | ---: |
| Price | $\$ 10,000$ | $\$ 2,000$ | $\$ 5,000$ |
| Variable expenses | $\underline{6,000}$ | $\underline{1,000}$ | $\underline{2,000}$ |
| Contribution margin | $\underline{\$ 4,000}$ | $\underline{\$ 1,000}$ | $\underline{\$ 3,000}$ |

Typically, weddings take 40 planning hours, birthday parties take 15 planning hours and Corporate Events take 20 planning hours.

## 7Required

Which event requests should Anthony take first? Second? Third? (Explain your answer.)

Module 13: Capital Budgeting

## 13-1A - Payback Period and NPV

Grey Animations is considering replacing its current network of computers with newer, faster, more efficient models. It purchased its current computers three years ago for $\$ 100,000$ and at that time the company expected the computers to last for five years with a residual value of $\$ 10,000$. If the computers were sold today, they would fetch $\$ 35,000$.
New computers could be purchased today for $\$ 150,000$ and would have an expected life of five years. Over the five-year life, the computers would reduce operating expenses by an estimated $\$ 40,000$ per year for the first three years, and by $\$ 20,000$ in the last two years. The estimate residual value of the new computers is $\$ 12,000$. The project's cost of capital is $12 \%$.
a.) Calculate the project's cash payback period.
b.) Calculate the project's net present value.

## 13-2A - IRR

Using the information from 13-1A, compute the internal rate of return.

## 13-1B - Payback Period and NPV

Barry Cabs is a sole proprietorship that owns and operates one taxi cab. The company purchased its cab 5 years ago for $\$ 40,000$. When it purchased the cab it expected it to be useful for 8 years with a residual value of $\$ 5,000$. Barry thinks he could sell the cab today for $\$ 14,000$.

Barry is considering replacing the old cab with a new, all-electric taxi. The all electric car would cost $\$ 60,000$ and would have an expected useful life of 8 years. Over its 8 year life, the cab would reduce annual operating costs (mostly gas and maintenance) by $\$ 8,000$ per year for the first 6 years, and $\$ 10,000$ per year thereafter. After 8 years, it is expected the taxi would have a $\$ 2,000$ residual value. Barry's cost of borrowing is $15 \%$.
a.) Calculate the project's cash payback period.
b.) Calculate the project's net present value.

## 13-2B - IRR

Using the information from $13-1 \mathrm{~B}$, compute the internal rate of return.
