Styles

Styles are named collections for formatting choices that can be used instead of manual formatting. Applying a style gives a text element a specific formatting definition that can be consistently applied and easily updated. New documents automatically use the Normal style.

Exercise 5.

Apply quick styles

Heading styles

1. Go to “**Alpheius Global Enterprises**”
2. Click the **Heading 1** quick style in the **Style Gallery** on the **Home** tab

Applying this style changes the Normal text into a Heading. Word now uses the Heading definition to format this paragraph.

3. Go to “**The Founders**”
 4. Click the **Heading 2** quick style
- Heading styles are generally configured so that when Heading 2 is used, Heading 3 becomes visible in the Style Gallery, and so on, down to Heading 9.

Collapse content by Heading

1. Mouse over a heading paragraph
2. Click the **collapse arrow** to the left of the paragraph to hide the content
3. Click the **expand arrow** to expand and show the content

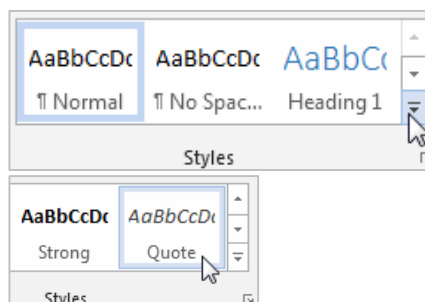

Access more styles

1. Select a normal paragraph
 2. Click the **More** button on the **Style Gallery**
- More is a downward arrow button which expands the available menu options.

3. Locate and apply the **Quote** quick style

Exercise 6.

View all quick styles

1. Click the **Styles Window** launcher in the bottom right of the **Styles** group
- This is a small square box with a diagonal arrow. The Styles Window will then open – docked on the right of screen. This window can be detached and moved around.

Notes

2. Click the **Options...** link
3. Select show **All styles**
4. Click **OK**

Use this procedure to add, and quickly access, any inbuilt style from the Style Gallery in the Ribbon.

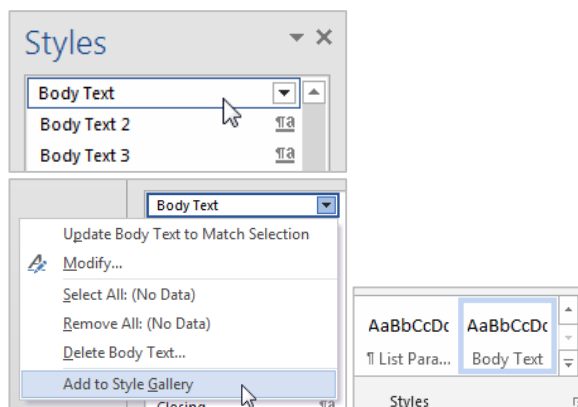

1. Select a normal paragraph
2. Locate and **apply** the **Body Text** quick style in the **Styles Window**

The style must have been used before it will appear as a quick style in the Style Gallery.

3. Right click the style or click the arrow dropdown

4. Click **Add to Style Gallery**

Thereafter you can access that style directly from the Style Gallery on the Ribbon (in this document only). You may have to click the 'More' button to see new quick styles as they usually appear last in the list.

Modify styles

Once a style is applied – modify its style definition to update all instances of the style.

Exercise 7. Modify the Normal style

Modifying Normal will change all normal styled text. Any styles based on normal, and which therefore inherit selected Normal style characteristics, will update at the same time.

1. Select a normal styled paragraph
2. Right click on the **Normal** quick style in the **Styles Gallery**
3. Click **Modify**

4. Select **Arial** font
5. Click text align: **Justified**

6. Click **Format > Paragraph**

Line spacing and paragraph spacing reduce the need for extra enter characters and enforce spacing consistency.

7. Select line spacing: **1.5 lines**
8. Click **OK** to close the Paragraph dialog box
9. Click **OK** to confirm the style modification

Exercise 8.

Modify heading styles

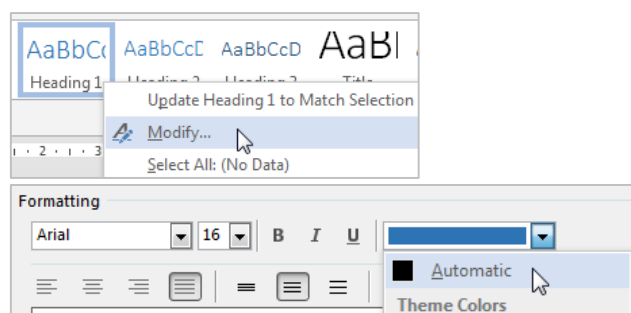

Heading styles are best reserved for headings within the body of your work because of their link with multilevel numbering and Table of Contents features. This means heading styles should generally not be used on title pages and preface pages.

While this exercises uses the Heading 1 and Heading 2 styles only – styles Heading 3 to Heading 9 are available for more complex heading structures.

Themes and style sets

Microsoft has introduced the Design tab to the Word 2013 Ribbon and used it to more closely integrate style sets into theme tools of the Office Suite.

- Style sets are collections of complementary styles in the same way a style is a collection of formatting choices.
- Themes are a wider concept which incorporates style sets, colours and effects to theme a document or a series of documents consistently.

Exercise 10.

After you have applied a Style Set/made any style changes as required:

Notes

Document structure

Using styles for paragraph spacing reduces the number of times you need to use the ENTER key in a document. Page and section breaks are another best practice way of reducing document formatting and placing content on a desired page or within a particular section.

Exercise 17.

Insert page and section breaks

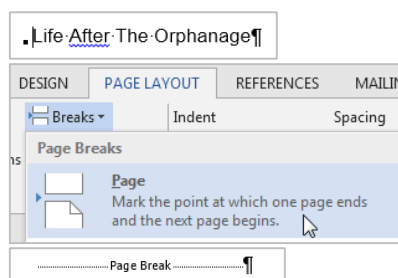

Page breaks

Use page breaks to end the current page and start at the top of the next page.

1. Place your cursor directly before a chapter section heading
2. Click the **Page Layout** tab > **Breaks** tool > **Page**

OR

- Use the **CTRL + ENTER** shortcut
The page break ends the current page.
- 3. Remove any surplus paragraphs

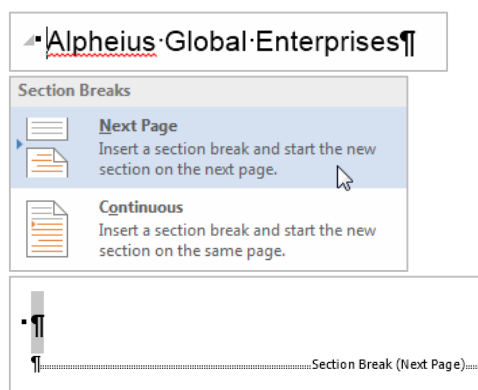

Section breaks

Use section breaks to end the current section and to isolate section specific formatting including margins, page orientation and header and footer content.

1. Place your cursor directly before the chapter heading
2. Click the **Page Layout** tab > **Breaks** tool > **Sections Breaks** section > **Next Page**

Always use Section Break (Next Page) rather than a section break continuous and a page break.

3. Reapply the **Normal** style or remove any pilcrow which may still have heading styling applied.

Exercise 18.

Remove page or section breaks

1. Ensure formatting symbols are enabled
2. **Locate** and **delete** the page or section break element

If you remove a section break separating two sections with different formatting settings – the first section will adopt the settings of the second: margins, page orientation and header and footer text etc.

Notes

Headers and footers

Use the Header and Footer Workspace to include document information independent of the main content area.

Exercise 19.

Add header or footer text

At the top of the document:

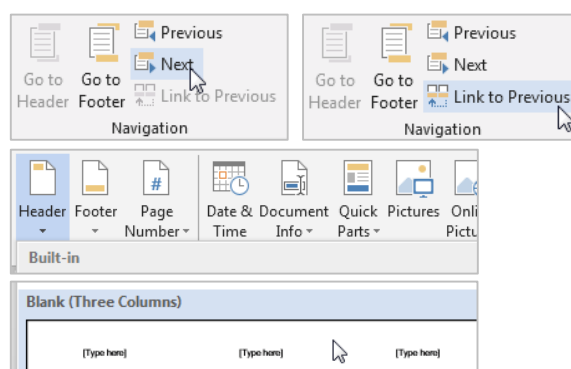

- Double click into the document **Header and Footer Workspace** within the top margin

- Click the **Header** button
- Choose the **Blank (Three Column)** header option

- Highlight the left placeholder and type **'Created:'**
- Click **Date & Time** from the **Insert** group
- Select a date format
- Uncheck **'Update Automatically'**
- Click **OK**

- Select the right placeholder and type **'Updated:'**
- Click **Date & Time**
- Check **'Update automatically'**
This inserts a field that updates the date/time when the document is saved.
- Click **OK**
- Delete the middle placeholder

Notes

Exercise 20.

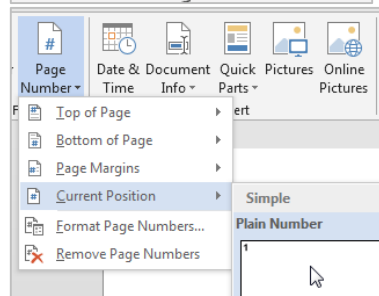

Add page numbers

Within the Header and Footer Workspace:

1. Click **Go to Footer**
2. Delink the footer by clicking **Link to Previous** so the button is off
3. Press the **TAB** key twice
4. Click **Page Number > Current Position > Plain Number**

Using 'Current Position' retains any current Header or Footer text. The other options (Top/Bottom) will overwrite any current formatting – even if it looks like parts of the building block are blank.

5. Click **Page Number > Format Page Numbers...**
6. Click the **Start at:** button and ensure the count is **1**
7. Click **OK**
