Monroe County Marriage Records Index, 1906-1960

Preface

Marriage Application Books

This index is based on the Monroe County, Indiana, Marriage Application Books 11 through 44 (book 41 does not exist; it was skipped by the Clerk's Office), covering the years 1906-1960. Applications contain much more information about grooms, brides, and parents, than appears in the index. The extra information is valuable for family researchers, and includes:

- “Color”
- Place of Birth
- Place of Residence
- Occupation
- Prior Marriage (groom and bride only)
- Children by Prior Marriage (groom only)
- Communicable Diseases and Mental Disabilities (groom and bride only)
- Name of Marrying Official

Groom & Bride Sections

This index is divided into two sections separated by a colored sheet, the first alphabetically by bride's surname, and the second by the groom's surname.

Column Descriptions

Columns 1 and 4: Names of the groom or bride, surname first.

Columns 2 and 5: Birthdate of the groom or bride, in Month/Day/Year format. Years from 1800's show up as 70's, 80's, and 90's.

Columns 3 and 6: Names of parents of groom or bride. Father's first and middle (if recorded) names only are given if his surname is the same as the groom or bride. If the names are different, father's first, middle (if recorded), and last names are given. However, if a middle name is given in the record, there are instances where it might appear to be a last name in the index. (For example, “John Alexander” might be a first and middle name, or first and last name with no middle name recorded.) The actual marriage record must be consulted to clarify this ambiguity.

Column 7: Date of marriage in Month/Day/Year format. In cases where there is no record that the marriage actually took place, the notation “NR” (not recorded) follows the application date. This means either that the marriage did not occur, or the marrying official failed to come to the county clerk's office to verify it. In most cases it is not possible to know which.

Column 8: Marriage Book number, 32 through 44, followed by page number.

Spelling Variations & Handwriting Problems

The entries usually involve at least two different persons, the clerk and the official performing the marriage. Sometimes there are two or more clerks entering different parts of the application. Therefore, there are variations in spelling and handwriting. The index includes some double entries, with two different spellings of surnames, when the two

different persons disagreed on the name, or when the handwriting is difficult to interpret. For example, a surname might be “Lee” or “See,” depending on one’s interpretation. Both names have been entered. Similarly, the clerk might write “Coons” and the marrying official “Koons.” Again, both are entered. When there is a difference in first names or middle names or initials, the alternative is put in parens with a question mark.

Editions

This edition was created by checking the revised first edition indexes against the entries in each original marriage application book, and making necessary corrections. The re-indexing was done by Lee Ehman in January, 2017 through December, 2018. The revised first edition was computerized and indexed by Rachel Rice and coordinated and assembled by Claude F. Rice and Betty L. Rice, and was published by the Monroe County Historical Society in 1997.

Copies

Each page of the original marriage application books has been digitized. Copies are not made from the original books in order to prevent damage. Copies from the digital files can be made by Research Library staff for a fee.
