

# **Neuroradiology & Functional Neuroanatomy: Correlating Anatomical, Brain Imaging and Clinical Studies**

*Organized by Prof Naidich, Prof Yeo and Prof Yousry*

**Monday 16 April – Thursday 19 April 2018**

Lecture Theatre, 33 Queen Square, London

## **PROGRAMME**

Anatomical localisation of function is a fundamental principle in the neurosciences. This four day course will correlate gross anatomy with neuroimaging and functional MRI to illustrate normal neurological function, the alterations that attend disease, and the bases for the clinical features seen in patients.
