Conference opens

11:00 AM - 11:45 AM ET
Keynote: *Building and sustaining a successful threat intelligence program*
Speaker(s): Mike Antico, CISO, CLEAR
Cybersecurity Collaborative Member

Threat intelligence has transformed the information security world for the better but it's not always leveraged in the best way possible by organizations and departments. Depending on the business, threat intelligence can take on a whole new meaning, which can make things a bit difficult when you're attempting to build a program. In his years of experience, Mike Antico, CISO at CLEAR, has created successful threat intelligence programs for an array of organizations. But it's not just about building the program, it's training the staff and being able to federate the knowledge to the right stakeholders in the business. In this fireside chat, Antico sits with SC Media Editor in Chief, Jill Aitoro, to discuss the most important steps security leaders should take to build a program, but most importantly, dive deep on the tactical versus the business risk perspective approaches they should take.

DAY 2

10:30 AM ET
Conference opens

11:00 AM - 11:45 AM ET
Keynote: *Carpe Theatrum: The Psychology behind Successful Cyberattacks*
Speaker(s): Ed Moyle, Co-founder, Security Curve and Diana Kelley, Co-founder, Security Curve and Cybersecurity Field CTO, Microsoft
In this fireside chat, Ed Moyle, founder of SecurityCurve and Diana Kelley, Cybersecurity Field CTO at Microsoft will discuss the drivers behind what makes us click. We'll explain how attackers leverage our natural instincts to launch attacks by leaning into the headlines and memes of the moment.

Takeaways from the conversation:
· *Cialdini's 6 Dimensions of influence*
· *How attackers use these dimensions*
· *Methods for more effective security awareness training*

Day 3

10:30 AM ET
Conference opens

11:00 AM - 11:45 AM ET
Keynote: Forewarned is Forearmed: Utilizing the Cyber Resiliency Level® Framework
Speaker(s): Dr. Dawn M. Beyer, Senior Fellow, Lockheed Martin and Jacquelyn Blanchard,
Space Chief Cyber Architect, Lockheed Martin

Threat intelligence is foundational to resilient systems. The Lockheed Martin Cyber Resiliency Level® (CRL™) provides a framework that organizations can use to measure how cyber secure their systems are and offers a roadmap for how to mature networks. Threat intelligence is required as systems scale the roadmap and reach the highest levels of the framework. Join us and learn more about how you can leverage CRL™ and threat intelligence to design more resilient systems.
