
Programming in HTML5 with JavaScript and CSS3

Duration: 5 Days Course Code: M20480 Version: A

Overview:

This course provides an introduction to HTML5, CSS3, and JavaScript. This course helps students gain basic HTML5/CSS3/JavaScript programming skills. This course is an entry point into both the Web application and Windows Store apps training paths. The course focuses on using HTML5/CSS3/JavaScript to implement programming logic, define and use variables, perform looping and branching, develop user interfaces, capture and validate user input, store data, and create well-structured applications.

The lab scenarios in this course are selected to support and demonstrate the structure of various application scenarios. They are intended to focus on the principals and coding components/structures that are used to establish an HTML5 software application.

This course uses Visual Studio 2012, running on Windows 8.

Target Audience:

The course is intended for developers who have at least six months of professional experience and who are interested in developing applications using HTML5 with JavaScript and CSS3 (either Windows Store apps or IE10 apps for the Web). While the students may have little or no HTML5 coding experience, they should have some experience with HTML4.

Students choosing to attend this course without a developer background should pay special attention to the training prerequisites. Developers who have more than 5 years programming experience may find that portions of this training are fundamental in nature when presenting the syntax associated with certain programming tasks.

Individuals who are interested in taking exam 70-480: Programming in HTML5 with JavaScript and CSS3, can also attend this course.

Objectives:

- Explain how to use Visual Studio 2012 to create and run a Web application.
-
- Describe the new features of HTML5, and create and style HTML5 pages.
-
- Add interactivity to an HTML5 page by using JavaScript.
-
- Create HTML5 forms by using different input types, and validate user input by using HTML5 attributes and JavaScript code.
-
- Send and receive data to and from a remote data source by using XMLHttpRequest objects and jQuery AJAX operations.
-
- Style HTML5 pages by using CSS3.
-
- Create well-structured and easily-maintainable JavaScript code.
-
- Use common HTML5 APIs in interactive Web applications.
-
- Create Web applications that support offline operations.
-
- Create HTML5 Web pages that can adapt to different devices and form factors.
-
- Add advanced graphics to an HTML5 page by using Canvas elements, and by using and Scalable Vector Graphics.
-
- Enhance the user experience by adding animations to an HTML5 page.
-
- Use Web Sockets to send and receive data between a Web application and a server.
-
- Improve the responsiveness of a Web application that performs long-running operations by using Web Worker processes.

Prerequisites:

Before attending this course, students must have at least three months professional development experience.

In addition to their professional experience, students who attend this training should have a combination of practical and conceptual knowledge related to HTML5 programming. This includes the following prerequisites:

- Understand the basic HTML document structure:
 - Use HTML tags to display text content.
 - Use HTML tags to display graphics.
 - Use HTML APIs.
 - Understand how to style common HTML elements using CSS, including:
 - Separating presentation from content.
 - Managing content flow.
 - Managing positioning of individual elements.
 - Managing content overflow.
 - Basic CSS styling.
-

Content:

Module 1: Overview of HTML and CSS

- Overview of HTML
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by

Module 6: Styling HTML5 by Using CSS3

- Styling Text
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context

Module 10: Implementing an Adaptive User Interface

- Supporting Multiple Form Factors
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 11: Creating Advanced Graphics

- Creating Interactive Graphics by Using Scalable Vector Graphics
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects

- Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 2: Creating and Styling HTML5 Pages

- Creating an HTML5 Page
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 3: Introduction to JavaScript

- Overview of JavaScript Syntax
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements

- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 7: Creating Objects and Methods by Using JavaScript

- Writing Well-Structured JavaScript
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5

- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 12: Animating the User Interface

- Applying CSS Transitions
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes

- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 4: Creating Forms to Collect Data and Validate User Input

- Overview of Forms and Input Types
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript

- Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 8: Creating Interactive Pages using HTML5 APIs

- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 13: Implementing Real-Time Communications by Using Web Sockets

- Introduction to Web Sockets
- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 14: Creating a Web Worker Process

- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 5: Communicating with a Remote Data Source

- Sending and Receiving Data by Using XMLHttpRequest

Interacting with Files

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the

Introduction to Web Workers

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas

- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker

Module 9: Adding Offline Support to Web Applications

- Reading and Writing Data Locally

- Overview of CSS
- Creating a Web Application by Using Visual Studio 2012
- Styling an HTML5 Page
- Programming the HTML DOM with JavaScript
- Introduction to jQuery
- Validating User Input by Using HTML5 Attributes
- Validating User Input by Using JavaScript
- Sending and Receiving Data by Using

- jQuery AJAX operations
- Styling Block Elements
- CSS3 Selectors
- Enhancing Graphical Effects by Using CSS3
- Creating Custom Objects
- Extending Objects
- Incorporating Multimedia
- Reacting to Browser Location and Context
- Debugging and Profiling a Web Application
- Adding Offline Support by Using the Application Cache
- Creating an Adaptive User Interface
- Programmatically Drawing Graphics by Using a Canvas
- Transforming Elements
- Applying CSS Key-frame Animations
- Sending and Receiving Data by Using Web Sockets
- Performing Asynchronous Processing by Using a Web Worker
