FLUID TRANSFER SYSTEMS

PUSH THE LIMITS

MEETS DOT/TUV FMVSS 106 SPECIFICATIONS

CUSTOM KITS

All Goodridge Brakeline Kits are available in extended or shortened lengths.

To extend the length add a + sign and the extended length.

For example:

Part number *HD0001-1FCH* extended by 2.00" would be *HD0001-1FCH+2*

To shorten a kit add a – sign and the shortened length.

For example:

Part number *HD0001-1FCH* shortened by 2.00" would be *HD0001-1FCH-2*

Please note:

All extended or shortened lengths on Trifront kits are taken to the upper line.

AMERICAN BIG TWIN PRODUCTS 2014

GOODRIDGE
FLUID TRANSFER SYSTEMS

WHY GOODRIDGE?

The bitterness of Poor Quality lingers long after the sweetness of Low Cost is forgotten.

- Goodridge brake hose assemblies feature bare or coated stainless steel braided hoses, with polished stainless steel and chrome or black zinc plated mild steel hardware.
- The coated hoses feature a durable PVC coating, Teflon inner liner, and premium stainless steel braided armor.
- The PVC hose coating adds great looks, abrasion protection to expensive parts, is easy to clean, and contains a UV inhibitor. All clear coated brake hoses meet ASTM G155 criteria, which is a synergetic weatherability test that checks for hose discoloration by simulating a one year tropical UV environment at 263.125kj/m2, unlike plastic or vinyl coatings.
- The Teflon inner liner is an inert material, which is compatible with all hydraulic and brake fluids, has a heat range of -158° to 500°, and shields brake systems from moisture, unlike other materials like nylon.
- The stainless steel braid has a total of 72 wires per hose and is superior in pressure rating, flame resistance, and volumetric expansion than all other materials, including Kevlar or copper, resulting in unmatched stopping power.
- All Goodridge brake kit hardware exceeds the 48 hour salt spray criteria established by the Department of Transportation. Our black zinc plated mild steel meets a 72 hour threshold on the salt spray tester, while our chromed mild steel checks in with a 96 hour salt spray test rating. Our mild steel and stainless steel components are shatter proof unlike other common metals used in brakelines, such as brass and aluminum.
- Kits ship complete in clamshell or box packaging with bolts and washers.

GOODRIDGE BRAKE LINE MAINTENANCE

Like any other parts on your bike, Goodridge coated brake, clutch, and hydraulic hose assemblies require regular maintenance. Our coated hoses require regular applications of a mild spray wax with a UV inhibitor. We have found **"Protect All"** is perfect for the needed extra protection.

HOSES

- Apply spray wax on a clean polishing cloth.
- Make a complete swipe to your hose, covering the entire hose length.

FITTINGS

- Our chromed or zinc plated mild steel fittings need a shot of any lightweight spray lubricant, like WD40.
- Apply spray lubricant wax on a clean polishing cloth.
- Wipe a light coat of polish to all plated fittings, avoiding the hose.
- Our stainless steel fittings simply need a quick rub with your polishing cloth to remove any built up road grime.

Average maintenance time is about 1 minute, 37 second

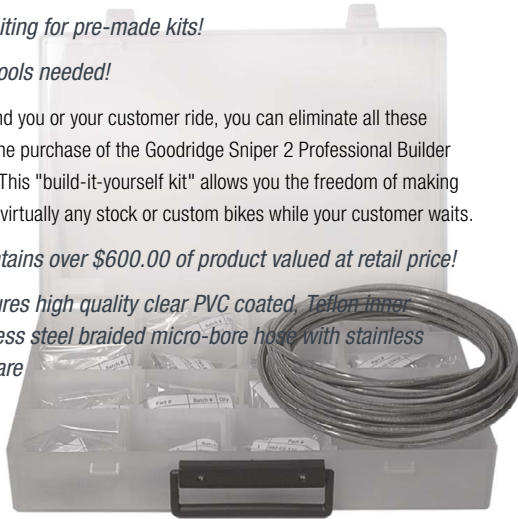

SNIPER 2 METALLIC BUILDER KIT

- Tired of special ordering brake line kits?
- Prices of pre-made kits too expensive?
- Customer will not wait for custom kits?
- No more waiting for pre-made kits!
- No special tools needed!

Whatever brand you or your customer ride, you can eliminate all these hassles with the purchase of the Goodridge Sniper 2 Professional Builder Brakeline Kit. This "build-it-yourself kit" allows you the freedom of making brakelines for virtually any stock or custom bikes while your customer waits.

- Each kit contains over \$600.00 of product valued at retail price!
- The kit features high quality clear PVC coated, Teflon inner lined, stainless steel braided micro-bore hose with stainless steel hardware

2014 ECONOLINE, OEM STYLE, AND PLATINUM SERIES BRAKELINE KITS

- Econoline Kits feature clear PVC coated stainless braided hose and chrome hardware. You can pay more for brakeline kits, but you cannot buy a more durable kit than Econoline.
- DOT Kits meet DOT / TUV FMVSS106 specifications, which make them street legal on any street or highway worldwide. These kits feature PVC stainless steel braided hose with a Teflon inner liner and chrome mild steel hardware.
- Platinum Series Kits feature a bright copper braided cover woven over our stainless braided hose, with a clear PVC coating and chrome hardware.

ORDERING INSTRUCTIONS

- To order Econoline Kits, insert the numerals 82 in place of the XX.
Eg: An Econoline Front Kit for a 2008 ABS FLHR is part# HD8291-B
- To order DOT Kits, insert the numerals 92 in place of the XX.
Eg: An OEM Style Front Kit for a 2008 ABS FLHR is part# HD9291-B
- To order Platinum Kits, insert the numerals 22 in place of the XX.
Eg: A Platinum Front Kit for a 2008 ABS FLHR is part# HD2291-B

All Econoline ABS Kits Are Available With Choice of Clear, Black, or Carbo Coated Hoses.

Kits ship standard with clear coated stainless braided hose. To order black hose kits add a /BK suffix to kit part number. For Carbo hose add a /CB suffix.

UNIVERSAL BRAKELINES

Universal Brakeline product is the most efficient brakeline solution for virtually all street bikes. Universal brakelines are pre-assembled brakelines that are equipped with -3 female swivels to mate with the accompanying universal hardware. Goodridge offers a variety of fitment options to match the appearance and geometry of any bike. Among your options are bare or coated stainless steel hoses and black zinc or chrome plated mild steel.

ORDERING INSTRUCTIONS

- To order clear coated hose assemblies with chrome swivels, **insert 80 in place of the XX**
- To order clear coated DOT hose assemblies with chrome swivels, **insert D-80 in place of the XX**
- To order Ebony Series 'All Black' hose assemblies, **insert 11 in place of the XX**
- To order Platinum Series hose assemblies with chrome swivels, **insert 22 in place of the XX**
- To order bare stainless hose assemblies with chrome swivels, **insert 30 in place of the XX.**

UNIVERSAL BRAKELINE ADAPTERS

All Goodridge hardware for Harleys is produced from durable polished stainless steel or plated mild steel. All Goodridge hardware exceeds the 48 hour salt spray criteria established by the Department of Transportation. Our chromed mild steel meets a 96 hour salt spray test rating, while our black zinc plated mild steel meets a 72 hour salt spray test. All our stainless and mild steel components are shatter proof unlike other common metals used in brakelines, such as brass and aluminum.

DELUXE PROFESSIONAL BUILDER BRAKELINE KIT**

The original build your own custom brakelines

- Tired of special ordering brake line kits?
- Prices of pre-made kits out of control
- Customer will not wait for custom kits?

Whatever brand is on the tank you can now eliminate all these hassles with the purchase of the Goodridge "Deluxe Professional Builder" Brakeline Kit.

This "build-it-yourself-kit" allows you the freedom of making brakelines for stock or custom Big Twins while your customer waits. No more waiting for pre-made kits.

The kit features high quality clear-coated stainless braided hose and re-usable chrome banjos, bolts and fittings. Each kit contains over \$1300 of product valued at retail price, which is enough to build several complete front and rear brakelines. Plus, it all comes in a convenient carrying case, which includes speciality tools to simplify assembly!

GOODRIDGE QD FUEL CROSSOVER LINES

Fuel Crossover Lines With Quick Disconnect

QD Fuel Crossovers are available with Motorsport quality black textile or stainless braided hose.

- All QD Fuel Crossovers feature a high quality quick disconnect valve and durable hose finishers for simple attachment to standard hose barbs.
- The braided hoses are compatible with gasoline and ethanol.
- The hose finishers feature a stainless gear drive hose clamp for a reliable, long lasting seal.
- Chrome plated quick disconnect features durable Viton o-rings to prevent leakage, stainless shut off valves eliminate fuel loss during tank removal, and QD assembly is rated at 250 PSI.
- Universal design fits most models with split tanks.

Part No.	Description
HDFL002	QD Fuel Crossover with Black Hose
HDFL001	QD Fuel Crossover with Stainless Braided Hose
730804-2	Replacement Viton O-Rings, 2 Paks

GOODRIDGE HARLEY BRAKE PADS

Goodridge Brake Pads are available for popular Harley models. And like all Goodridge products, they were developed with years of testing at the track and in the street.

Goodridge pads are available in two distinct styles; Sintered and Organic.

The organic pads are made from a high friction, low abrasion compound that is great for touring and perfect for stainless or polished rotors. Sintered pads are best used for aggressive riding. They meet the HH friction rating, provide long life service, and have a similar feel to OEM pads.

BRAKE LIGHT BOLTS

Goodridge BL Bolts are banjo bolts with a built in pressure switch and are wired to adapt to virtually any model that utilizes a hydraulic stop light system.

- They are perfect for eliminating brake tees in rear HD brakeline applications, or converting Offroad bikes to street legal.
- Available in gold cad or silver zinc plated mild steel in common thread pitches.

BL993-32CH	10mm X 1.25 BL Banjo Bolt

P= Gold Cad Plated, CH-Silver Zinc

SPEEDBLEEDERS

Speedbleeders, the patented bleeder screw with the built in check valve. To bleed brakes, simply loosen each bleeder 1/4 turn and pump the lever. When the job is completed re-tighten the bleeder and it becomes a permanent part of your brake system. Use this chart as a guide for street bikes only, some models may vary.

For more comprehensive information, please visit www.speedbleeder.com

Please note: Brembo uses SB1010, Nissin uses SB8125L, Tokico uses SB7100
