

ASME NQA-1–2019
(Revision of ASME NQA-1–2017)

Quality Assurance Requirements for Nuclear Facility Applications

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

ASME NQA-1-2019
(Revision of ASME NQA-1-2017)

Quality Assurance Requirements for Nuclear Facility Applications

AN AMERICAN NATIONAL STANDARD

**The American Society of
Mechanical Engineers**

Two Park Avenue • New York, NY • 10016 USA

Date of Issuance: December 31, 2019

The next edition of this Standard is scheduled for publication in 2021.

ASME issues written replies to inquiries concerning interpretations of technical aspects of this Standard. Interpretations are published on the ASME website under the Committee Pages at <http://cstools.asme.org/> as they are issued.

Errata to codes and standards may be posted on the ASME website under the Committee Pages to provide corrections to incorrectly published items, or to correct typographical or grammatical errors in codes and standards. Such errata shall be used on the date posted.

The Committee Pages can be found at <http://cstools.asme.org/>. There is an option available to automatically receive an e-mail notification when errata are posted to a particular code or standard. This option can be found on the appropriate Committee Page after selecting "Errata" in the "Publication Information" section.

ASME is the registered trademark of The American Society of Mechanical Engineers.

This code or standard was developed under procedures accredited as meeting the criteria for American National Standards. The Standards Committee that approved the code or standard was balanced to assure that individuals from competent and concerned interests have had an opportunity to participate. The proposed code or standard was made available for public review and comment that provides an opportunity for additional public input from industry, academia, regulatory agencies, and the public-at-large.

ASME does not "approve," "rate," or "endorse" any item, construction, proprietary device, or activity.

ASME does not take any position with respect to the validity of any patent rights asserted in connection with any items mentioned in this document, and does not undertake to insure anyone utilizing a standard against liability for infringement of any applicable letters patent, nor assume any such liability. Users of a code or standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

Participation by federal agency representative(s) or person(s) affiliated with industry is not to be interpreted as government or industry endorsement of this code or standard.

ASME accepts responsibility for only those interpretations of this document issued in accordance with the established ASME procedures and policies, which precludes the issuance of interpretations by individuals.

No part of this document may be reproduced in any form,
in an electronic retrieval system or otherwise,
without the prior written permission of the publisher.

Introduction		xxiv
Summary of Changes		xxv
Part I	Requirements for Quality Assurance Programs for Nuclear Facilities (From Former NQA-1)	1
	Introduction	1
100	Purpose	1
200	Applicability	1
300	Responsibility	1
400	Terms and Definitions	1
Requirement 1	Organization	5
100	General	5
200	Structure and Responsibility	5
300	Interface Control	5
Requirement 2	Quality Assurance Program	6
100	General	6
200	Indoctrination and Training	6
300	Qualification Requirements	6
400	Records of Qualification	8
500	Records	8
Requirement 3	Design Control	9
100	General	9
200	Design Input	9
300	Design Process	9
400	Design Analyses	9
500	Design Verification	10
600	Change Control	10
700	Interface Control	11
800	Software Design Control	11
900	Documentation and Records	11
Requirement 4	Procurement Document Control	12
100	General	12
200	Content of the Procurement Documents	12
300	Procurement Document Review	12
400	Procurement Document Changes	12

Requirement 5	Instructions, Procedures, and Drawings	13
100	General	13
Requirement 6	Document Control	14
100	General	14
200	Document Control	14
300	Document Changes	14
Requirement 7	Control of Purchased Items and Services	15
100	General	15
200	Supplier Evaluation and Selection	15
300	Bid Evaluation	15
400	Control of Supplier-Generated Documents	15
500	Acceptance of Item or Service	15
600	Control of Supplier Nonconformances	16
700	Commercial Grade Items and Services	16
800	Records	16
Requirement 8	Identification and Control of Items	18
100	General	18
200	Identification Methods	18
300	Specific Requirements	18
Requirement 9	Control of Special Processes	19
100	General	19
200	Process Control	19
300	Responsibility	19
400	Records	19
Requirement 10	Inspection	20
100	General	20
200	Inspection Requirements	20
300	Inspection Hold Points	20
400	Inspection Planning	20
500	In-Process Inspection	20
600	Final Inspections	20
700	Inspections During Operations	20
800	Records	20
Requirement 11	Test Control	22
100	General	22
200	Test Requirements	22
300	Test Procedures (Other Than for Computer Programs)	22
400	Computer Program Test Procedures	22
500	Test Results	22
600	Test Records	22
Requirement 12	Control of Measuring and Test Equipment	24
100	General	24
200	Selection	24
300	Calibration and Control	24
400	Records	24

Requirement 13	Handling, Storage, and Shipping	26
100	General	26
200	Special Requirements	26
300	Procedures	26
400	Tools and Equipment	26
500	Operators	26
600	Marking or Labeling	26
Requirement 14	Inspection, Test, and Operating Status	27
100	General	27
200	Authority	27
300	Status Indication	27
Requirement 15	Control of Nonconforming Items	28
100	General	28
200	Identification	28
300	Segregation	28
400	Disposition	28
Requirement 16	Corrective Action	29
100	General	29
Requirement 17	Quality Assurance Records	30
100	General	30
200	Generation of Records	30
300	Authentication of Records	30
400	Classification	30
500	Receipt Control of Records	30
600	Storage	30
700	Retention	31
800	Maintenance of Records	31
Requirement 18	Audits	32
100	General	32
200	Scheduling	32
300	Preparation	32
400	Performance	33
500	Reporting	33
600	Response	33
700	Follow-Up Action	33
800	Records	33
Part II	Quality Assurance Requirements for Nuclear Facility Applications .	34
	Introduction	34
100	Purpose	34
200	Applicability	34
300	Responsibility	34
400	Planning and Procedures	34
500	Definitions	35
600	Multiunit Facility Provisions	35

Subpart 2.1	Quality Assurance Requirements for Cleaning of Fluid Systems and Associated Components for Nuclear Facilities	36
100	General	36
200	General Requirements	37
300	Cleanness Criteria	38
400	Manufacturing Phase Cleanness	40
500	Cleanness Prior to Installation	41
600	Cleanness During Installation	42
700	Maintenance of Installation Cleanness	42
800	Preoperational Cleaning	42
900	Layup and Postlayup Cleaning	43
1000	Postoperational Repairs and Modifications	43
1100	Records	44
Subpart 2.2	Quality Assurance Requirements for Packaging, Shipping, Receiving, Storage, and Handling of Items for Nuclear Facilities	45
100	General	45
200	General Requirements	45
300	Packaging	46
400	Shipping	52
500	Receiving	53
600	Storage	54
700	Handling	56
800	Records	56
Subpart 2.3	Quality Assurance Requirements for Housekeeping at Nuclear Facilities	57
100	General	57
200	General Requirements	57
300	Requirements	57
400	Records	59
Subpart 2.5	Quality Assurance Requirements for Installation, Inspection, and Testing of Structural Concrete, Structural Steel, Soils, and Foundations for Nuclear Facilities	60
100	General	60
200	General Requirements	61
300	Requirements	61
400	Preconstruction Verification	61
500	Inspection of Soils and Earthwork	62
600	Inspection of Foundation Pile and Caisson Construction	63
700	Inspection of Concrete Construction	65
800	Inspection of Steel Construction	68
900	Data Analysis and Evaluation	69
1000	Records	70
Subpart 2.7	Quality Assurance Requirements for Computer Software for Nuclear Facility Applications	71
100	General	71
200	General Requirements	72

300	Software Acquisition	74
400	Software Engineering Method	74
500	Standards, Conventions, and Other Work Practices	76
600	Support Software	76
700	References	76
Subpart 2.8	Quality Assurance Requirements for Installation, Inspection, and Testing of Mechanical Items for Nuclear Facilities	77
100	General	77
200	General Requirements	77
300	Preinstallation Verification	78
400	Installation Inspections	79
500	Systems Turnover Inspection and Tests	80
600	Data Analysis and Evaluation	82
700	Records	82
Subpart 2.14	Quality Assurance Requirements for Commercial Grade Items and Services	83
100	General	83
200	CGI Definition Applications	84
300	Utilization	84
400	Technical Evaluation	84
500	Critical Characteristics	85
600	Methods of Accepting Commercial Grade Items and Services	85
700	Commercial Grade Services	88
800	Documentation	88
900	References	88
Subpart 2.15	Quality Assurance Requirements for Hoisting, Rigging, and Transporting of Items for Nuclear Power Plants	90
Subpart 2.17	Quality Assurance Requirements for Electronic Quality Assurance Records Systems	91
100	General	91
200	General Requirements	91
300	Record Recovery	91
400	Access Control and Retrieval	92
500	Digital and Physical Security	92
600	Electronic Data Integrity	92
700	Disposal of Records	92
800	Acquisition, Development, and Maintenance of Electronic Records Systems	92
Subpart 2.18	Quality Assurance Requirements for Maintenance of Nuclear Facilities	93
100	General	93
200	General Requirements	93
300	Preventive Maintenance	94
400	Corrective Maintenance	95
500	Records	95
Subpart 2.19	Quality Assurance Requirements for the Use of Supplier Accreditation for Calibration or Testing Services	96
100	General	96

200	Requirements	96
Subpart 2.20	Quality Assurance Requirements for Subsurface Investigations for Nuclear Facilities	98
100	General	98
200	General Requirements	98
300	Verification	99
400	Field Investigation	100
500	Laboratory Testing	102
600	Engineering Evaluation and Analysis	103
700	Records	103
Subpart 2.22	Quality Assurance Requirements for Management Assessment and Quality Improvement for Compliance With 10 CFR 830 and Department of Energy (DOE) Order 414.1 for DOE Nuclear Facilities	104
100	General	104
200	Management Assessment Requirements	105
300	Quality Improvement	106
400	Records	107
500	References	107
Subpart 2.25	Quality Assurance Requirements for High-Level Waste Custodians	108
100	General	108
200	Requirements	108
Part III	Guidance for Implementing Parts I and II Requirements	113
	Introduction	113
100	Purpose	113
200	Applicability	113
Subpart 3.1	Guidance for Implementing Part I Requirements	114
Subpart 3.1-1.1	Implementing Guidance for Part I, Requirement 1: Organization	115
100	General	115
200	Organizational Structure	115
300	Basic Principles	115
Subpart 3.1-2.1	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs	116
100	General	116
200	Program Format	116
300	Program Development	116
400	Work Requirements and Performance	117
500	Work Processes	117
600	Training and Qualification	117
700	Assessment of Performance	118
Subpart 3.1-2.2	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs, Lead Auditor Qualification	119
100	General	119
200	Education and Experience	119
300	Records	119

Subpart 3.1-2.3	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs, Inspection and Test Personnel Qualification	122
100	General	122
200	Functional Qualifications	122
300	Education and Experience Qualifications	122
400	Use of Inspection and Test Personnel	123
Subpart 3.1-2.4	Implementing Guidance for Part I, Requirement 2: Quality Assurance Programs, Management Assessment of the QA Program Using Surveillance	124
100	General	124
200	Planning and Scheduling	124
300	Preparation	124
400	Performance	125
500	Reporting and Communication	126
600	Resolution of Issues	126
Subpart 3.1-3.1	Implementing Guidance for Part I, Requirement 3: Design Control	127
100	General	127
200	Design Input	127
300	Design Process	128
400	Design Analysis	129
500	Design Verification	130
600	Change Control	130
700	Use of Reverse-Engineering Techniques	131
800	Interface Control	132
900	Documentation and Records	132
1000	Reference	132
Subpart 3.1-4.1	Implementing Guidance for Part I, Requirement 4: Procurement Document Control	133
100	General	133
200	Procurement Document Review	133
300	Typical Scope of Procurement Effort	133
400	Categorization of Procurement Actions	134
500	General Logic Considerations	134
600	Logic Chart	135
700	Methods of Specifying Quality Assurance Program Requirements	135
Subpart 3.1-7.1	Implementing Guidance for Part I, Requirement 7: Control of Purchased Items and Services	138
100	General	138
200	Procurement Planning	138
300	Supplier Selection	138
400	Bid Evaluation	139
500	Purchaser/Supplier Communications	139
600	Control of Changes in Items or Services	139
700	Product Acceptance	139
Subpart 3.1-10.1	Implementing Guidance for Part I, Requirement 10: Inspection	141
100	General	141

200	Inspection and Process Monitoring	141
300	In-Service Inspection	141
Subpart 3.1-15.1	Implementing Guidance for Part I, Requirement 15: Control of Nonconforming Items	142
100	General	142
200	Identification	142
300	Segregation	142
400	Disposition	142
Subpart 3.1-16.1	Implementing Guidance for Part I, Requirement 16: Corrective Action	145
100	General	145
200	Corrective Action	145
300	Basic corrective Action Elements	145
400	Management Involvement	147
500	Process Chart	147
Subpart 3.1-16.2	Implementing Guidance for Part I, Requirement 16: Trend Analysis	148
100	General	148
200	Definitions	148
300	Trending Program	148
400	Data Collection	149
500	Trend Analysis Process	149
600	Trend Reporting	150
700	Records	151
800	References and Recommended Reading	151
Subpart 3.1-17.1	Implementing Guidance for Part I, Requirement 17: Quality Assurance Records	152
100	General	152
200	List of Typical Lifetime Records	153
Subpart 3.1-17.2	Implementing Guidance for Part I, Requirement 17: Quality Assurance Records, Electronic Records	156
100	General	156
200	Authentication of Records	156
300	Generation of Records	157
400	Receipt Control of Records	157
500	Storage	158
600	Access Control and Retrieval	158
700	Disposal of Records	159
800	Maintenance of Records System	159
900	System Integrity and Record Recovery	160
Subpart 3.1-18.1	Implementing Guidance for Part I, Requirement 18: Audits	161
100	General	161
200	Audit Administration	161
300	Preparation for Auditing	162
400	Audit Performance	163
500	Reporting	164
600	Response	164
700	Follow-Up Action	164

Subpart 3.1-18.2	Implementing Guidance on Classification and Handling Audit Issues	165
100	General	165
200	Introduction	165
300	Classification of Issues	165
400	Responses to Issues	166
500	Follow-Up	166
Subpart 3.2	Guidance for Implementing Part II Requirements	167
Subpart 3.2-2.1	Implementing Guidance for Part II, Requirement 2.1: Cleaning of Fluid Systems	168
100	General	168
200	Applicability	168
300	Cleaning Recommendations and Precautions	168
400	Guidelines for Assigning Cleanness Classifications	168
Subpart 3.2-2.7.1	Implementing Guidance for Part II, Requirement 2.7: Quality Assurance Requirements for Computer Software for Nuclear Facility Applications	169
	Introduction	169
100	General	169
200	General Requirements	171
300	Software Acquisition	172
400	Software Engineering Method	172
500	Standards, Conventions, and Other Work Practices	176
600	Support Software	176
700	References	176
Subpart 3.2-2.7.2	Implementation Guidance on the Requirements of NQA-1, Parts I and II for Software Used for Nuclear Facility Applications	178
	Introduction	178
100	General	178
200	Flowchart Approach	178
Subpart 3.2-2.14	Implementing Guidance for Part II, Requirement 2.14: Quality Assurance Requirements for Commercial Grade Items and Services, Commercial Grade Computer Programs, and Software Services	200
100	General	200
200	Definition Applications	201
300	Utilization	201
400	Technical Evaluation	201
500	Critical Characteristics	202
600	Methods for Accepting Commercial Grade Items and Services	203
700	Commercial Grade Software Services	209
800	Documentation	209
900	References	210
Subpart 3.2-2.15	Implementing Guidance for Part II, Requirement 2.15: Hoisting, Rigging, and Transportation	211
100	General	211
200	Recommended Design Criteria	211
300	Recommended Control of the Use of Handling Equipment	211

Subpart 3.2-2.18.1	Implementing Guidance for Part II, Requirement 2.18: Maintenance of Nuclear Facilities, Establishing and Maintaining Equipment Histories	212
100	General	212
200	Developing an Equipment History	212
300	Maintaining Historical Data	212
400	Using Maintenance History	212
Subpart 3.2-2.18.2	Implementing Guidance for Part II, Requirement 2.18: Maintenance of Nuclear Facilities, Engineering Evaluations of Equipment Failures	213
100	Introduction	213
200	Engineering Evaluations	213
Subpart 3.2-2.20	Implementing Guidance for Part II, Requirement 2.20: Subsurface Investigations for Nuclear Power Plants, Sample Control and Identification	215
100	General	215
200	Control of Subsurface Investigations	215
300	Identification of Samples	215
400	Control of Samples	215
Subpart 3.3	Nonmandatory Guidance on Quality Assurance Program Requirements for Collection of Scientific and Technical Information for Site Characterization of High-Level Nuclear Waste Repositories	216
Part IV	Guidance on the Application and Use of NQA-1	217
	Introduction	217
100	Purpose	217
200	Applicability	217
Subpart 4.1	Guides on Use and Comparison of NQA-1 With Other Quality Requirements	218
Subpart 4.1.1	Guidance to Modification of an ISO 9001:2015 Quality Management System for Compliance With NQA-1-2015, Part I	218
100	Purpose and Scope	218
200	Background	218
300	Terms and Definitions	218
400	Comparison Tables	218
Subpart 4.1.2	Guidance on the Use of NQA-1-2008/1a-2009 for Compliance With Department of Energy Quality Assurance Requirements 10 CFR 830, Subpart A and DOE O 414.1	232
100	Purpose	232
200	Introduction	232
300	DOE Rule and Order General QAP Requirements	232
400	DOE Rule and Order QA Criteria	232
Subpart 4.1.3	Guidance on the Use of NQA-1-2015 for Compliance With 10 CFR 71 and/or 10 CFR 72 Requirements	237
100	Purpose	237
200	Introduction	237
300	Summary Results	237
Subpart 4.1.4	Guidance to Modification of an IAEA GS-R-3 Quality Program to Meet NQA-1a-2009 Requirements and Modification of an NQA-1a-2009 Quality Program to Meet IAEA GS-R-3 Requirements	243

100	Purpose and Scope	243
200	Applicability	243
300	Background	243
400	How to Use This Guide to Achieve Compliance With IAEA GS-R-3 or NQA-1	244
Subpart 4.1.5	Guidance to Modification of an ANSI/ANS-15.8-1995 (R2005; R2013) Quality Program to Meet NQA-1-2012 Requirements	262
100	Introduction	262
200	Applicability	262
300	Background	262
400	Terms and Definitions	262
500	How to Use the Guide to Achieve Compliance With NQA-1 or an ANSI/ANS-15.8 Quality Program	262
Subpart 4.2	Guides on Application of NQA-1 to Work Processes and Activities .	276
Subpart 4.2.1	Guidance on Graded Application of Nuclear Quality Assurance (NQA) Standard for Research and Development	276
100	Introduction	276
200	Research and Development Quality Assurance Through Peer Review . . .	277
300	A Graded Approach	278
400	Quality Assurance Research and Development Applications	278
500	Research and Development Quality Assurance Glossary of Terms	279
600	Application of NQA-1 to Research and Development Activities	279
700	Technology Life Cycle (Subpart 4.2.1) and Technology Readiness Levels	284
Subpart 4.2.3	Guidance on Qualification of Existing Data	286
100	General	286
200	Selecting Data Sets for Qualification	286
300	Data Qualification Process	286
400	Qualification Methods	286
500	Documentation of Results	287
Subpart 4.2.4	Guidance on the Control of Scientific Investigations	288
100	General	288
200	Planning and Performing Scientific Investigations	288
300	Technical Data	289
400	Sample Control	289
500	Peer Review	290
Subpart 4.2.5	Guidance on the Transition From Construction to Operation for Nuclear Facilities	291
100	General	291
200	Applicability	291
300	Transition Recommendations	291
400	Records	293
Subpart 4.2.6	Guidance on Quality Assurance for Decommissioning of Nuclear Facilities	295
100	General	295
200	Prerequisites	295
300	Predecommissioning Checks	296
400	Control During Decommissioning	298

500	Postdecommissioning Checks	299
600	Records	299
Subpart 4.2.7	Guidance on Peer Review	300
100	General	300
200	Terms and Definitions	300
300	Performance	300
400	Reviewer Selection	302
500	Comment Resolution	302
600	Peer Review Report	302
700	Records	303
Figures		
300	Sample Form for Record of Lead Auditor Qualification	120
600	Logic Chart for Determining Appropriate Quality Requirements	136
100	Nonconforming Item Process Chart	144
300	Corrective Action Process Chart	146
201-1	Software Engineering	180
201-2	Software Design Requirements	185
201-3	Software Configuration Management	186
201-4	Support Software and Tools	187
201-5	Problem Reporting and Corrective Action	188
201-6	Software Design	189
201-7	Software Reviews	190
201-8	Software Design Implementation	191
201-9	Computer Program Testing	192
201-10	Software Operation, Maintenance, and Retirement	195
201-11	Software Acquisition	196
201-12	Computer Program Use in Design Analysis	198
202-1	Legend for Flowcharts	199
103	Technology Life Cycle	277
Tables		
302.5	Summary Table for Cleanliness Classes	40
304.1	Water Requirements	40
304.4	Flushing Requirements for Hydraulic, Instrument Control, and Lubrication Systems	41
506	Required In-Process Tests for Compacted Fill	63
401.4	Scenarios for Use of Computer Programs in Design Analysis	131
501	Typical Critical Characteristics to Consider for Computer Programs	204
400-1	NQA-1, Part I, Requirement 1 (Organization) and Corresponding ISO 9001 Clauses	219
400-2	NQA-1, Part I, Requirement 2 (Quality Assurance Program) and Corresponding ISO 9001 Clauses	220
400-3	NQA-1, Part I, Requirement 3 (Design Control) and Corresponding ISO 9001 Clauses	221

400-4	NQA-1, Part I, Requirement 4 (Procurement Document Control) and Corresponding ISO 9001 Clauses	222
400-5	NQA-1, Part I, Requirement 5 (Instructions, Procedures, and Drawings) and Corresponding ISO 9001 Clauses	222
400-6	NQA-1, Part I, Requirement 6 (Document Control) and Corresponding ISO 9001 Clauses	223
400-7	NQA-1, Part I, Requirement 7 (Control of Purchased Items and Services) and Corresponding ISO 9001 Clauses	224

FOREWORD

This Standard is intended to serve the global nuclear industry responsible for the safety and quality of nuclear facilities and activities.

It is intended to be applied to any structure, system, component, activity, or organization that is essential to the safe, reliable, and efficient performance of a nuclear facility and any activities independent of a facility that may affect performance. It is also intended to be applied to all phases of a nuclear facility life cycle and to related activities.

This Standard reflects industry experience and current understanding of the quality assurance requirements necessary to achieve safe, reliable, and efficient utilization of nuclear energy and management and processing of radioactive materials. The Committee on Nuclear Quality Assurance (NQA) actively endorses the growing worldwide movement toward rational, cost-effective quality assurance practices — practices that focus on results. The NQA Committee also maintains liaison with national and international groups that have similar interests in quality to assure consistency and maximum applicability of the Standard in a global setting. Consequently, the NQA Committee has regularly updated and revised the Standard since its first edition was issued in 1979 to improve its utility, effect on nuclear safety, and value to the nuclear industry.

This Standard includes requirements and guidance and is organized in the following four parts:

(a) **Part I** contains requirements for a Quality Assurance Program for nuclear facility applications.

(b) **Part II** contains additional quality assurance requirements for the planning and conduct of specific work activities conducted under a Quality Assurance Program developed in accordance with **Part I**.

(c) **Part III** contains guidance for implementing the requirements of **Parts I** and **II**.

(d) **Part IV** contains guidance for the application of NQA-1 and comparisons of NQA-1 with other quality requirements.

Early in 1975, the American National Standards Institute (ANSI) assigned overall responsibility for coordination among technical societies and development and maintenance of nuclear power quality assurance standards to the American Society of Mechanical Engineers (ASME). The ASME Committee on NQA was constituted on October 3, 1975, and assumed responsibility for the ANSI/ASME N45 series documents. Currently, the NQA Committee operates under the ASME requirements for Nuclear Codes and Standards Development Committees.

This Committee initially prepared

ANSI/ASME NQA-1-1979

Quality Assurance Program Requirements for Nuclear Power Plants

ANSI/ASME NQA-2-1983

Quality Assurance Requirements for Nuclear Power Plants

ANSI/ASME NQA-3-1989

Quality Assurance Requirements for High Level Waste Management

For a detailed history of the NQA Committee and evolution of the Standard, go to: <http://cstools.asme.org/csconnect/CommitteePages.cfm?Committee=010500000&Action=16897>.

Requests for interpretation or suggestions for improvement of this Standard should be submitted in accordance with Correspondence With the NQA Committee.

For a listing of the NQA publication history, refer to the following table:

Historical Listing of NQA Publications

13 th Ed.	NQA-1-2019	12/31/2019

GENERAL NOTE: NQA editions and addenda prior to 1989 were titled ANSI/ASME NQA.

NOTE: (1) This edition is a consolidation of NQA-1 and NQA-2.

CORRESPONDENCE WITH THE NQA COMMITTEE

General. ASME Standards are developed and maintained with the intent to represent the consensus of concerned interests. As such, users of this Standard may interact with the Committee by requesting interpretations, proposing revisions, and attending Committee meetings. Correspondence should be addressed to:

Secretary, NQA Standards Committee
The American Society of Mechanical Engineers
Two Park Avenue
New York, NY 10016-5990
<http://go.asme.org/Inquiry>

Proposing Revisions. Revisions are made periodically to the Standard to incorporate changes that appear necessary or desirable, as demonstrated by the experience gained from the application of the Standard. Approved revisions will be published periodically.

The Committee welcomes proposals for revisions to this Standard. Such proposals should be as specific as possible, citing the paragraph number(s), the proposed wording, and a detailed description of the reasons for the proposal, including any pertinent documentation.

Interpretations. Upon request, the NQA Standards Committee will render an interpretation of any requirement of the Standard. Interpretations can only be rendered in response to a written request sent to the Secretary of the NQA Standards Committee.

Requests for interpretation should preferably be submitted through the online Interpretation Submittal Form. The form is accessible at <http://go.asme.org/InterpretationRequest>. Upon submittal of the form, the Inquirer will receive an automatic e-mail confirming receipt.

If the Inquirer is unable to use the online form, he/she may mail the request to the Secretary of the NQA Standards Committee at the above address. The request for an interpretation should be clear and unambiguous. It is further recommended that the Inquirer submit his/her request in the following format:

Subject:	Cite the applicable paragraph number(s) and the topic of the inquiry in one or two words.
Edition:	Cite the applicable edition of the Standard for which the interpretation is being requested.
Question:	Phrase the question as a request for an interpretation of a specific requirement suitable for general understanding and use, not as a request for an approval of a proprietary design or situation. Please provide a condensed and precise question, composed in such a way that a "yes" or "no" reply is acceptable.
Proposed Reply(ies):	Provide a proposed reply(ies) in the form of "Yes" or "No," with explanation as needed. If entering replies to more than one question, please number the questions and replies.
Background Information:	Provide the Committee with any background information that will assist the Committee in understanding the inquiry. The Inquirer may also include any plans or drawings that are necessary to explain the question; however, they should not contain proprietary names or information.

Requests that are not in the format described above may be rewritten in the appropriate format by the Committee prior to being answered, which may inadvertently change the intent of the original request.

Moreover, ASME does not act as a consultant for specific engineering problems or for the general application or understanding of the Standard requirements. If, based on the inquiry information submitted, it is the opinion of the Committee that the Inquirer should seek assistance, the inquiry will be returned with the recommendation that such assistance be obtained.

ASME procedures provide for reconsideration of any interpretation when or if additional information that might affect an interpretation is available. Further, persons aggrieved by an interpretation may appeal to the cognizant ASME Committee or Subcommittee. ASME does not “approve,” “certify,” “rate,” or “endorse” any item, construction, proprietary device, or activity.

Attending Committee Meetings. The NQA Standards Committee regularly holds meetings and/or telephone conferences that are open to the public. Persons wishing to attend any meeting and/or telephone conference should contact the Secretary of the NQA Standards Committee.

ASME NQA COMMITTEE

Nuclear Quality Assurance

(The following is the roster of the Committee at the time of approval of this Standard.)

STANDARDS COMMITTEE ON NUCLEAR QUALITY ASSURANCE

R. Schrotke, *Chair*, Ron Schrotke, LLC
J. W. McIntyre, *Vice Chair*, Sargent & Lundy
T. S. Van Valkenburg, *Vice Chair*, Los Alamos National Laboratory
D. Miro-Quesada, *Secretary*, The American Society of Mechanical Engineers
J. G. Adkins, Consultant
D. C. Agarwal, U.S. Department of Energy
N. R. Barker, Atkins Global — Member of the SNC-Lavalin Group
J. E. Bergstrom, Bergstrom Consulting
R. L. Blyth, North Wind Portage
D. Brown, Sargent & Lundy
W. J. Bryan, ANSYS, Inc.
G. Danielson, Unaffiliated
C. Givens, Bechtel National, Inc.
M. A. Hayse, Unaffiliated
D. K. Jensen, Optimum Performance Solutions
R. S. Jolly, Bechtel Power Corp.
C. R. Martin, Office of Congresswoman Marcy Kaptur
N. Moreau, Theseus Professional Services, LLC
K. A. Morrell, Mission Support and Test Services, LLC
C. H. Moseley, Edgewater Technical Associates
T. Muraki, Advanced Technology
M. F. Nicol, Unaffiliated
P. F. Prescott, U.S. Nuclear Regulatory Commission
D. W. Prigel, Argonne National Laboratory
K. L. Rhoads, Unaffiliated
R. A. Sacco, SHINE Medical Technologies
W. Sowder, Quality Management Services, LLC
D. R. Sparkman, Sparkman & Associates, LLC
C. A. Spletter, Unaffiliated
R. A. Symes, Unaffiliated
G. Szabatura, Framatome, Inc.
M. H. Tannenbaum, Electric Power Research Institute
W. G. Ware, Southern Nuclear Operating Co.
D. A. Winchester, PSEG Nuclear
J. R. Yanek, Executive Services NQA ESH
J. W. Anderson, *Contributing Member*, Performance Dev Corp.
M. Concepcion-Robles, *Contributing Member*, Dominion Energy Services, Inc.
J. DeKleine, *Contributing Member*, Axion Technical Services, LLC
S. Bernsen, *Honorary Member*, Unaffiliated

EXECUTIVE COMMITTEE ON NUCLEAR QUALITY

J. W. McIntyre, *Chair*, Sargent & Lundy
T. S. Van Valkenburg, *Chair*, Los Alamos National Laboratory
R. Schrotke, *Vice Chair*, Ron Schrotke, LLC
D. Miro-Quesada, *Secretary*, The American Society of Mechanical Engineers
R. L. Blyth, North Wind Portage
G. Danielson, Unaffiliated
C. Givens, Bechtel National, Inc.
M. A. Hayse, Unaffiliated
D. K. Jensen, Optimum Performance Solutions
R. S. Jolly, Bechtel Power Corp.
N. Moreau, Theseus Professional Services, LLC
M. F. Nicol, Unaffiliated
P. F. Prescott, U.S. Nuclear Regulatory Commission
R. A. Sacco, SHINE Medical Technologies
D. R. Sparkman, Sparkman & Associates, LLC
C. A. Spletter, Unaffiliated

SUBCOMMITTEE ON APPLICATIONS

D. K. Jensen, *Chair*, Optimum Performance Solutions
S. D. Diffey, *Vice Chair*, Los Alamos National Laboratory
T. M. Grace, *Vice Chair*, Bechtel – Nuclear, Security, and Environmental
D. Barrera, *Secretary*, Sandia National Laboratory
D. C. Agarwal, U.S. Department of Energy
R. Brown, Atkins Global — Member of the SNC-Lavalin Group
G. Danielson, Unaffiliated
R. Daudt, Pacific Northwest National Laboratory
D. A. Morley, S. A. Technologies
C. H. Moseley, Edgewater Technical Associates
R. Schrotke, Ron Schrotke, LLC
G. Udent, Unaffiliated
J. W. Anderson, *Contributing Member*, Performance Development Corp.

SUBCOMMITTEE ON ASSESSMENT AND VERIFICATION

M. A. Hayse, *Chair*, Unaffiliated
J. M. Ziemba, *Vice Chair*, Atkins Global — Member of the SNC-Lavalin Group
K. L. Morris, *Secretary*, Ellis and Watts Global Industries, Inc.
B. Blum, Unaffiliated
S. F. Borland, Unaffiliated

R. Carboneau, Unaffiliated
G. Deaton, HSB Global Standards
T. B. Franchuk, Curtiss-Wright, QualTech NP
E. D. Groover, N/A
J. G. Ice, Exelon
K. Iwasawa, Toshiba Corp. Power Systems Co.
D. J. Jantosik, Sequoia Consulting Group, Inc.
R. M. Joschak, Framatome, Inc.
E. C. Love, U.S. Nuclear Regulatory Commission

J. W. McIntyre, Sargent & Lundy
K. Miller, Sargent & Lundy
J. A. Ortega-Luciano, U.S. Nuclear Regulatory Commission
G. C. Smolens, Department of Energy, National Nuclear Security Administration
T. T. Suzuki, Chubu Electric Power Co.
R. A. Symes, Unaffiliated
T. S. Van Valkenburg, Los Alamos National Laboratory
W. Sowder, *Contributing Member*, Quality Management Services, LLC

SUBCOMMITTEE ON ENGINEERING AND PROCUREMENT

R. S. Jolly, *Chair*, Bechtel Power Corp.
V. J. Grosso, *Vice Chair*, National Security Technologies, LLC
P. Kilroy, *Secretary*, Waste Treatment Completion Co., LLC
P. J. Anderson, Dominion Energy
N. R. Barker, Atkins Global — Member of the SNC-Lavalin Group
R. L. Boler, Unaffiliated
T. Bolt, AZZ Nuclear
J. Cook, Unaffiliated
R. Czuba, Sonic Systems International, Inc.
J. DeKleine, Axion Technical Services, LLC
R. W. Dillman, Savannah River Nuclear Solutions
D. Ethington, NuScale Power
S. T. Fairburn, BWX Technologies, Inc.
R. Horst, National Nuclear Security Administration
K. Kavanagh, U.S. Nuclear Regulatory Commission

J. D. Lipsky, Department of Energy, Savannah River Site
J. Marsden, NuScale Power
G. Oliveros, Tecnatom
P. F. Prescott, U.S. Nuclear Regulatory Commission
E. Renaud, Westinghouse Electric Co.
T. N. Rezk, Bechtel Power Corp.
D. Y. Roberts, Engine Systems, Inc.
N. Sakamoto, Mitsubishi Heavy Industries, Ltd.
G. Szabatura, Framatome, Inc.
M. H. Tannenbaum, Electric Power Research Institute
M. Vann Mitchell, Mitsubishi Nuclear Energy Systems
W. G. Ware, Southern Nuclear Operating Co.
J. R. Yaneck, Executive Services NQA ESH
T. L. Montgomery, *Contributing Member*, Unaffiliated
D. W. Tuttel, *Contributing Member*, Parsons

SUBCOMMITTEE ON INTERFACES AND ADMINISTRATION

R. A. Sacco, *Chair*, SHINE Medical Technologies
C. H. Moseley, *Vice Chair*, Edgewater Technical Associates
D. R. Sparkman, *Vice Chair*, Sparkman & Associates, LLC
L. F. Taggart, *Secretary*, AZZ Nuclear
S. Berner, QAISO, Inc.
D. Brown, Sargent & Lundy

M. Mahar, Los Alamos National Laboratory
D. W. Prigel, Argonne National Laboratory
J. W. Anderson, *Contributing Member*, Performance Development Corp.
M. E. Smith, *Contributing Member*, Nuclear Innovation North America

SUBCOMMITTEE ON INTERNATIONAL ACTIVITIES

C. A. Spletter, *Chair*, N/A
D. W. Prigel, *Vice Chair*, Argonne National Laboratory
R. W. VonRoble, *Secretary*, VonRoble Consulting
D. C. Agarwal, U.S. Department of Energy

INTRODUCTION

This Standard is to be applied to any structure, system, component, activity, or organization that is essential to the safe, reliable, and efficient performance of a nuclear facility and any activities independent of a facility that may affect performance (e.g., transportation of nuclear materials) of those activities. The extent to which this Standard should be applied depends upon the specific type of facility, items, or services involved and the nature, scope, and relative importance of the activity being performed. It is also to be applied to all phases of a nuclear facility life cycle (e.g., siting, design, construction, operation, and decommissioning) and all types of activities (e.g., training, testing, software development or use).

The Standard also applies to activities that could affect the quality of nuclear material applications, structures, systems, and components of nuclear facilities.

Examples of nuclear facilities are those for power generation, spent fuel storage, waste management, fuel reprocessing, nuclear material processing, fuel fabrication, nuclear research, and other related facilities. Examples of activities include siting, designing, procuring, developing or using software, fabricating, constructing, handling, shipping, receiving, storing, cleaning, erecting, installing, inspecting, testing, operating, maintaining, repairing, refueling, modifying, and decommissioning.

This Standard is organized in the following four parts:

(a) **Part I** contains requirements for developing and implementing a Quality Assurance Program for nuclear facility applications.

(b) **Part II** contains additional quality assurance requirements for the planning and conduct of specific work activities under a Quality Assurance Program developed in accordance with **Part I**.

(c) **Part III** contains guidance for implementing the requirements of **Parts I** and **II**.

(d) **Part IV** contains guidance for application of NQA-1 and comparisons of NQA-1 with other quality requirements.

The arrangement of the requirements in **Parts I** and **II** and the guidance in **Parts III** and **IV** permit the judicious application of the Standard or portions of the Standard. Applicable requirements of **Parts I** and **II** are to be implemented to ensure conformance with NQA-1. The application of this Standard, or portions thereof, shall be invoked by written contracts, policies, procedures, specifications, or other appropriate documents.

This Standard reflects industry experience and current understanding of the quality assurance requirements necessary to achieve safe, reliable, and efficient utilization of nuclear energy and management and processing of radioactive materials. The Standard focuses on the achievement of results, emphasizes the role of the individual and line management in the achievement and sustainment of quality, and fosters the application of these requirements in a manner consistent with the relative importance of the item or activity (i.e., a "graded approach").
