Roland SR-JV80 Expansion boards for the
JV-series JV80/880/90/1000/1010/1080/2080
JD-series JD-990
XP-series XP-30/50/60/80
XV-series XV-88/3080/5080
Fantom FA76

Thanks to Roland Corporation for providing the patch lists and Paolo Di Nicolantonio (<http://www.synthmania.com/>) for the demos.

How to use these patch lists in reabanks

Copy the needed patch list and paste it into your synths reabank file under the appropriate Expansion Board bank.

Example:

You have a JV-2080 synth module and into the expansion board slot A you have installed a SR-JV80-01 Pop Expansion Board.

Find the SR-JV80-01 Pop Expansion Board patch list from this document. Since there are 145 patches in this specific board, but one bank can only hold 128 patches, copy the first 128 patch names, including the numbers. That'll be the patches 0-127.

Open the JV2080 reabank file in text editor.

Find the Expansion Board A from the reabank list and paste the first 128 patch names under Expansion A1. So it should look like this:

```
// Expansion Board A (0-127)
Bank 84 0 Expansion A1
```

```
0 770 Grand 1
1 MIDI 3 Grand
2 E. Grand 1
...
127 Cubic Lead
```

Now go back to the patch list and copy the rest of the patch names (128-144). Then find the Expansion A2 from the reabank list and paste them under there. Please note that the presets have to be renumbered to start from the 0. So the A2 list should now look like this:

```
// Expansion Board A (128-254)
Bank 84 1 Expansion A2
```

```
0 Analog Brs 1
1 Analog Brs 2
2 Brass Pad
...
15 Snare Set
16 Tom Toms
```

Save the reabank, and you are ready to use it.

For more in-depth look into reabanks, please study *The Art of Reabanks* by Joel Simpson.

Correction to this page with the help of Reaper forum member Naji, thanks.
xpander 2010-2013
