

Live: Initial-10/5/20—Roll out to rest of Ancillary Positions-1-21-21

The Table of Contents (TOC) menu will be enhanced from the Immunization Schedule to Immunization View (Forecast).

The new change contains a dynamic view and improved logic that incorporates recommendations by the CDC for suggested, upcoming, and historical immunizations information. The Immunization component's enhanced layout has the same features and functionality as the Immunizations Schedule, but with a different look.

The following is a list of the most utilized features and functionality within the 'Immunization View'. Please see each component's respective section in this document for more information.

- 1. View Forecast
- 2. Print Immunization Record
- 3. Import/Load records from the MD Registry (ImmuNet)
- 4. Chart/Document administered and historical vaccines
- 5. Uncharted/In Error Vaccines
- 6. Modify
- 7. Drop Down Options
- 8. How enter Immunizations orders
